From the Editor

In the past 10 years, Marine Forces Reserve has been redefined. Serving alongside the active component, every Reserve unit was activated in support of Operation Enduring Freedom or Operation Iraqi Freedom. With 1,600 Reservists currently deployed in support of OEF, and hundreds of others activated to meet missions globally, the Marine Forces Reserve is fully operational and very much active.

Continental Marines magazine provides a snapshot of recent operations, from the deserts of Afghanistan to multinational training in the steamy jungles of Southeast Asia with Landing Force CARAT.

MARINES OF ALL MOS BACKGROUNDS NEEDED TO SERVE WORLDWIDE IN FULL AND PART-TIME BILLETS

If you are a former active-duty member or a non-obligated Reserve Marine, you can find temporary jobs back in the ranks. Go to www.i-mef.usmc.mil and click the *Reserve Mobilizations (OCONUS and CONUS) Billets link*.

CHANGE YOUR MOS LATMOVE PROGRAM

Marine Corps to grant Reservists the opportunity to change MOS. This bulletin outlines the eligibility requirements for the lateral move program and provides select Marines with the chance to transfer to a new MOS. Marines must be E-3 through E-5 or O-2 through O-3 and a current member of a Selected Marine Corps Reserve unit. All requests will be considered based on the needs of the Corps. Spaces are limited. See *MARADMIN 285/11*

\$10,000 - \$15,000 BONUSES TO JOIN THE RESERVE

The USMC Reserve is seeking former active-duty Marines and current Selected Marine Corps Reserve Marines to affiliate with units. E-4s get paid a \$10,000 lump sum bonus and E-5 through E-6 may be eligible for \$15,000. Program ends Sept. 30, 2011. Contact your prior service recruiter today. www.marines.com/rmi

BILINGUAL MARINES OF CERTAIN LANGUAGES TO GET ADDITIONAL MOS

If you speak a second language from the Middle East, Africa or Asia, you may qualify for an additional MOS. There are nearly 50 eligible languages. See *MARADMIN 286/10*

BASE PRIVILEGES

Take advantage of MWR programs at more than 250 installations worldwide. Get discounted tickets, use recreational facilities, hobby shops, paintball, boating, camping equipment and more. You and your family have access to any Army, Navy, Air Force, Marine or Coast Guard base with a valid ID card. Find installations here:

www.militaryinstallations.dod.mil

AUTO REPAIR GUIDES

The Auto Repair Reference Center Web site contains step-by-step guides on most automobiles including photographs and information. Find repair tips and troubleshooting guides for free! www.militaryonesource.com

OFFICERS EARN \$10,000 BONUS FOR AFFILIATING WITH RESERVE UNITS

If you are an O-1 through O-3 of any MOS or an O-4 with PMOS 7532, you may be eligible to receive a \$10,000 bonus as part of this recruitment program. Eligibility extends to all components to include current members of the Selected Marine Corps Reserve, active duty, Individual Ready Reserve, Active Reserve, or Individual Mobilization Augmentees Detachment that are recruited for specific hot fills.

See *MARADMIN 283/11*

Our Legacy

June 25, 1950:

Shortly before dawn, eight divisions of the North Korean People's Army crossed the 38th Parallel and invaded South Korea, starting the Korean War. During the war, the Marine Corps expanded from 75,000 to 261,000, most of whom were Reservists.

June 26, 1918:

Belleau Wood would henceforth bear the name, "Bois de la Brigade de Marine," or "Wood of the Marine Brigade," following the Marines actions on the battlefield.

July 7, 1941: The 1st Marine Aircraft Wing was activated at Quantico, Va.

August 7, 1990:

President George W. Bush ordered U.S. military aircraft and troops to Saudi Arabia as part of a multinational force to defend that nation against possible Iraqi invasion. This would come to be known as Operation Desert Shield.

Sgt. Dakota Meyer being awarded the Navy Achievement medal while in Afghanistan. (Photo courtesy of U.S. Marine Corps)

"THE MARINE WAY": SGT. DAKOTA MEYER

MARINE TO RECEIVE THE NATION'S HIGHEST
HONOR FOR ACTIONS WHILE SERVING IN
OPERATION ENDURING FREEDOM

Story by Cpl. Reece Lodder

MARINE CORPS BASE HAWAII - Removed from an ambushed platoon of Marines and soldiers in a remote Afghan village on Sept. 8, 2009, his reality viciously shaken by an onslaught of enemy fighters, Cpl. Dakota Meyer simply reacted as he knew best — tackling what he called “extraordinary circumstances” by “doing the right thing ... whatever it takes.”

Nearly two years later, the White House announced, Aug. 12, the 23-year-old Marine scout sniper from Columbia, Ky., who has since left the Marine Corps, will become the first living Marine to be awarded the Medal of Honor in 38 years. Retired Sgt. Maj. Allan Kellogg, Jr. received the medal in 1973 for gallantry in Vietnam three years earlier.

Meyer is the second Marine to receive the medal for actions in Iraq or Afghanistan. Cpl. Jason Dunham was awarded the medal posthumously for covering a grenade with his body to save two Marines in Iraq in 2004. President Barack Obama will present the award to Meyer at the White House, Sept. 15.

“The award honors the men who gave their lives that day, and the men who were in that fight,” Meyer said. “I didn’t do anything more than any other Marine would. I was put in an extraordi-

nary circumstance, and I just did my job.”

Though bleeding from shrapnel wounds in his right arm, Meyer, aided by fellow Marines and Army advisors from Embedded Training Team 2-8, braved a vicious hail of enemy machine gun and rocket-propelled grenade fire in the village of Ganjgal to help rescue and evacuate more than 15 wounded Afghan soldiers, and recover the bodies of four fallen fighters — 1st Lt. Michael Johnson, Gunnery Sgts. Aaron Kenefick and Edwin Johnson Jr., and Navy Petty Officer 3rd Class James Layton.

ETT advisor Army Sgt. 1st Class Kenneth Westbrook died at Walter Reed Army Medical Center, Washington, D.C., Oct. 7, 2009, from wounds sustained in the firefight.

Meyer charged through the battle zone five times to recover his fallen comrades and injured Afghan soldiers, risking his life even when a medical evacuation helicopter wouldn’t land because of the blazing gunfire.

“There’s not a day — not a second that goes by where I don’t think about what happened that day,” Meyer said. “I didn’t just lose four Marines that day; I lost four brothers.”

“When you leave the perimeter, you don’t know what’s going to happen, regardless of what war you’re fighting in,” Kellogg, who lives in Kailua, Hawaii, said. “Once you get to a point where you make the decision — ‘I’m probably going to die, so let the party begin’ — once you say in your mind you aren’t getting out of there, you fight harder and harder.”

Beginning his career with the same regiment from which Kellogg retired in 1990, Meyer deployed with 3rd Battalion, 3rd Marine Regiment, to Fallujah, Iraq, in 2007, and earned a meritorious promotion to corporal in late 2008 after

returning from the deployment.

In February 2009, Meyer volunteered to deploy to Afghanistan’s dangerous Kunar province and mentor Afghan soldiers as part of an embedded training team, the type of role usually filled by U.S. Special Forces.

“A Marine who seeks the challenge of joining his unit’s scout sniper platoon has to have a lot of drive and determination,” said Col. Nathan Nastase, commanding officer of 3rd Marine Regiment and formerly Meyer’s battalion commander at 3/3. “Being assigned to the ETT was a huge vote of confidence in his abilities.”

Meyer deployed to Afghanistan on the ETT in July 2009.

Meyer is the 86th living Medal of Honor recipient, and he joins a small, elite group of heroes, a reality that will often require him to conjure up haunting reminders of the battles he has fought, the friends he has lost and the painful regret he bears.

“I’m not a hero, by any means. — I’m a Marine, that’s what I am,” he said. “The heroes are the men and women still serving, and the guys who gave their lives for their country. At the end of the day, I went in there to do the right thing ... and it all boils down to doing the right thing ... whatever it takes. All those things we learn stick in your head, and when you live by it, that’s the Marine way.”

Though Meyer will receive the Medal of Honor for what he did in Ganjgal, he insists he will wear the five-pointed medallion and blue silk ribbon to honor his fallen brothers, their families and his fellow Marines.

“Being a Marine is a way of life,” Meyer said. “It isn’t just a word, and it’s not just about the uniform — it’s about brotherhood. Brotherhood means that when you turn around, they’re there, through thick and thin. If you can’t take care of your brothers, what can you do in life?”

Marine Reservists conduct security cooperation events throughout the Central Command area of responsibility.

SEA BREEZE

SEA BREEZE is an annual combined air, land and maritime exercise with the goals of enhancing amphibious operations, improving multinational maritime capabilities and fostering trust and cooperation among participating nations. This year's exercise includes active and Reserve forces from the United States, Ukraine, Macedonia, Moldova and Georgia. Training will include amphibious operations, maritime interdiction, counter improvised explosive devices, convoy operations and other platoon level training.

LF CARAT

LANDING FORCE CARAT

LF CARAT mobilized Marines to form an infantry company and assault amphibian vehicle platoon from 23rd Marine Regiment and 4th Assault Amphibian Battalion to conduct theater security cooperation and amphibious training with various partner nations.

TALISMAN SABER

TALISMAN SABER

TALISMAN SABER is a biennial joint exercise with the Australian Defence Force. U.S. Navy assets provide support for amphibious assault training and various U.S. Marine Corps fixed-wing and support squadrons. The exercise is designed to practice close air support with the Australian Army in preparation for future joint combat operations.

Contingency Operations

Operation Enduring Freedom

Service members from the Marine Corps, Danish Army and British Army sit down to talk with Afghans in the village of Now Abad about final details regarding the village's first elementary school, May 5. (Photo by Cpl. Katherine Keleher)

Lonestar Battalion helps Afghan troops open village's first school

Story by Cpl. Katherine Keleher

CAMP LEATHERNECK, Afghanistan -- The town of Now Abad opened its first school, May 5, with the assistance of Afghan National Army soldiers and coalition forces.

The village has high hopes for the 50 students expected to attend.

"In a society that there is no school, there is no education. It will be dark like night," said ANA Lt. Col. Haje Obied Ulla, an education and religion officer with the 215th Maiwand Corps.

"Education is like light, which brightens everything in the present and the future," he said.

"This elementary school we established today will give the chance to the people to study, become teachers, doctors, engineers and officers. Our people need everybody, and it would be possible via education and knowledge," said Ulla.

The idea of a school being built was first thought of by ANA troops. After the initial planning, they proposed the idea to Marines with 1st Battalion, 23rd Marine Regiment. It was then U.S., British, Danish and Afghan troops began working together to make the idea a reality.

"Our only wish is to pave the way for our kids and youth to study," Ulla explained.

The classes will be held in a pre-existing building, with the permission of the Now Abad village elder. Children will attend class with others of the same gender, boys going in the mornings and girls in the afternoons, explained Maj. Christopher Toland, commanding officer of Headquarters and Service Company, 1/23.

"This has been in the works for about two months, ever since we arrived into the [area of operation]," said Toland, of Houston. "We've been working on it with the ANA as our partner and talking to some other people over here on Leatherneck, regarding

what kind of resources we can provide." Toland, a 1992 graduate of Texas A&M University, continued to explain how coalition forces have been working closely with the ANA troops to allow the Afghans to begin taking the lead in their country's plans and future.

"We've tried to make sure they're part of everything that we do," he explained. "While we've been doing a lot of work on the school project, we've made sure that the ANA is taking the lead on it so that when we do at some point have to move on, they'll be able to take over and run this thing."

"So they've been working with us greatly. They've got a great attitude, very professional and the Marines like working with them, so it's been a win-win situation."

Both ANA soldiers and coalition forces hope to build more schools in the future in the surrounding areas of Now Abad.

TAKING COMMAND

Commander, MarForRes and MarForNorth: LT. GEN. STEVEN A. HUMMER

Story and photos by Cpl. Jad A. Sleiman

NEW ORLEANS — Lt. Gen. Steven A. Hummer assumed command of Marine Forces Reserve and Marine Forces North, Aug. 10, during a ceremony at Marine Corps Support Facility New Orleans.

“Marine Forces Reserve has absolutely been in on the last 10 years,” said Hummer, referring to Reserve Marines’ participation in Operations Iraqi Freedom and Enduring Freedom as well as theater security operations across the globe. “They are an operational Reserve in every aspect of the definition.”

The ceremony was unlike most customary changes of command where the flag is passed from the outgoing party to the incoming party. Instead, Sgt. Maj. Kim Davis, command sergeant major, and Command Master Chief Petty Officer Eric E. Cousin, the MarForRes command master chief, passed the flags of MarForRes and MarForNorth directly to Hummer, symbolizing his assumption.

Before Hummer took charge, Maj. Gen. Darrell L. Moore led MarForRes while also acting as director of Reserve Affairs.

“Folks would say he’s been the acting commander of Marine Forces Reserve and I, as the commandant, have made the decision, in my book, you have been the commander of Marine Forces Reserve, Darrell,” said Commandant of the Marine Corps Gen. James F.

Lt. Gen. Steven A. Hummer returns a salute as the Marines and officers of Marine Forces Reserve and Marine Forces North recognize him as their new commander, Aug. 10, during an assumption of command ceremony at Marine Corps Support Facility New Orleans.

Amos, “You have done the work and taken care of the Marines and Sailors of this wonderful organization.”

Marine Forces Reserve, which is composed of approximately 100,000 Marines and 183 training centers throughout the U.S., is the largest command in the Marine Corps and is the first force-level command for Hummer. The previous commander of MarForRes was Lt. Gen. John F. Kelly who commanded MarForRes from October 2009 to March 2011. He is currently serving as the senior military assistant to the secretary of defense.

Hummer first enlisted in the Marine Corps in 1970 and was later honorably discharged as a sergeant in 1973. Hummer was later commissioned following graduation from Albright College, Reading, Pa., where he received a degree in psychobiology.

Marines form up, Aug. 10, during the assumption of command ceremony at Marine Corps Support Facility New Orleans. Lt. Gen. Steven A. Hummer assumed command of Marine Forces Reserve and Marine Forces North after completing a tour as the director of operations for U.S. Forces – Iraq and serving as the chief of staff for the Don't Ask, Don't Tell Repeal Implementation Team.

As a company grade officer, he served with 3rd Battalion, 3rd Marine Regiment and 1st Battalion, 9th Marine Regiment and held the billets of rifle platoon commander, battalion training officer, battalion operations officer and company commander.

As a field grade officer, he served with 1st Marine Division, I Marine Expeditionary Force and III Marine Expeditionary Force. His assignments included officer-in-charge for 1st Marines Regimental Enhanced Training Section, 1st MARDIV; operations officer for the 31st Marine Expeditionary Unit, officer-in-charge for III MEF's Special Operations Training Group; assistant future plans officer, 1st MARDIV; commanding officer for Battalion Landing Team 1/1 under 13th MEU and 15th MEU; and as the commanding officer for 7th Marines during Operation Iraqi Freedom I. Hummer most recently completed a tour as the director of operations for U.S. Forces – Iraq and served as the chief of staff for the Don't Ask, Don't Tell Repeal Implementation Team.

"There's no shortage of work for Marine Forces Reserve. There's no shortage of sacrifice by Marine Forces Reserve," said Amos, noting that more than 1,000 MarForRes Marines are currently deployed to Northern Africa. Today's Reserve is the most combat experienced he's seen in his 40 years as a Marine, he said.

Marine Forces Reserve augments and reinforces active Marine forces in a time of war, national emergency or contingency operations, provide personnel and operational tempo relief for the active forces in peacetime, and provide service to the community. Hummer ended his remarks with a promise to the Marines he would now lead.

"I promise you that I will be your best advocate," he said, adding, "Laissez le bon temps rouler -- let the good times roll."

Marines with Company C, 1st Battalion, 23rd Marine Regiment, talk with a local village elder near Camp Leatherneck, Afghanistan. (Photo by Cpl Adam Leyendecker)

Latin roots help ‘Carlos’ Company Marines succeed in Helmand

Story by Cpl. Adam Leyendecker, II MEF (FWD)

CAMP LEATHERNECK, Afghanistan — Through the course of the recent Iraq wars, and now in Afghanistan, Company C, 1st Battalion, 23rd Marine Regiment, has literally grown up together, using their experiences from back home to unite and strengthen them on the battlefield.

Since deploying this past winter, Company C has provided security in the area around Camp Leatherneck, Helmand province and made advancements in establishing relationships with local villagers.

Company C, nicknamed “Carlos,” is a Reserve unit out of Corpus Christi and Harlingen, Texas. The Marines of Carlos Company credit their common background as a contributor to their success. Unlike active-duty Marines, who often switch units every three to four years, Reservists typically stay with the same unit longer, so the company is full of familiar faces.

“Marines from our company are from Texas, we all have jobs in Texas, we have family in Texas, and we all train together in Texas,” said Staff Sgt. Israel Maldonado, platoon commander for Headquarters Platoon, Company C, and a native of Weslaco, Texas. “We see each other all the time and stay together throughout our careers.”

While the company shares a geographic tie, the Marines also share a cultural understanding. Ninety percent of Carlos Company shares some form of Latino heritage, said Maldonado. The Marines get together for cookouts and other functions on a weekly basis with one another back home. Several Marines in the company are related in some way, while others went to school together or played high school sports against one another.

The similarities don’t end there. Many of the Marines in Carlos Company are in some kind of law enforcement back in Texas.

Almost all speak Spanish fluently.

Maldonado, who has been with the company for 10 years, played football and attended grade school with Gunnery Sgt. Mario Moreno, platoon sergeant for 1st platoon. Maldonado and Moreno have taken their sons together to watch their favorite National Football League team, the Dallas Cowboys.

"Marines naturally are able to adapt and overcome together, but this particular unit is unique in that they all already know each other and have grown together," said 2nd Lt. Edward E. Arrington, 2nd platoon commander.

The Marines focus much of their training back home in Texas on infantry tactics, such as shooting ranges and land navigation. In addition to already being acclimated to the dry heat of Helmand province thanks to the similar climate back home, the Marines say this training has helped them be successful during this deployment.

"I don't know any company as close as Carlos Company," said 1st Sgt. David M. Dyess, company first sergeant for Carlos Company. "Nobody can come between these Marines and their mission. They all know what [one] another is thinking."

The Marines in Carlos Company deploy for their brothers to the left and right of them, said Maldonado, whose son attends the school alongside children of other Marines in the company.

"Morale is very high here, and we help lift each other up," he explained. "We can literally ask how someone's family is doing because we actually know everyone's family on a personal level."

The Marines have remained close during their deployment, which may be a reason they've suffered no serious casualties despite hitting several IEDs and encountering insurgent attacks during their tour.

The company has managed operations around Camp Leatherneck, the largest coalition base in Helmand province, and has successfully limited any insurgent activities in the area.

Marines with Carlos Company are scheduled to return to their families in the Lone Star State in the near future. However, most of the Marines will remain in touch with one another as friends, family or neighbors, until their next call to duty.

Lance Cpl. Adolfo Guerra, an assaultman with Company C, 1st Battalion, 23rd Marine Regiment, and Cpl. Brandon Mundine, a rifleman also with Carlos Company, stand post at an entry-control point during a training evolution, Jan. 19, at Camp Pendleton, Calif. Guerra is a Mexican-American from Texas.

Tradewinds - Caribbean

RIOT GAMES

Marines train Caribbean forces to combat civil uprisings

Story and photos by Sgt. Tyler Hlavac

ST. JOHNS, Antigua and Barbuda —

When the rioters first hit the defender's lines, there is a brief moment of disorder and confusion as dozens of screaming protestors throw bottles, kick, punch and taunt the defenders. The defenders step back, quickly reorganize their lines and begin to slowly move forward, pushing the aggressors back with shields, batons and oleoresin capsicum spray. The confrontation is loud, messy, aggressive, chaotic and over within minutes as the defenders snatch up the riot leader, bringing an end to the hostilities.

The riot is simply training for the U.S. and Caribbean service members and police assembled at the Antigua and Barbuda Royal Police Force's training school, but it's a subject the participants could easily find themselves tested on in the near future.

SUBMISSION GUIDELINES

Continental Marines welcomes suggestions for publishing outside material. Guidelines are listed below.

- ❑ All stories and photos must be of original production or given permission by the original producer.
- ❑ All stories and photos should focus on Marine Forces Reserve or any of its subordinate units.
- ❑ If not focused on the MFR, all products must be relevant to the Reserve component.

If your suggestion meets the criteria, contact:

1st Lt. Ryan E. Alvis
(504) 697-8199
ryan.alvis@usmc.mil

Rioters are quickly repulsed after being sprayed with inert oleoresin capicum spray during riot control training as part of exercise, Tradewinds 2011, held in St. Johns, Antigua and Barbuda. (Photo by Sgt. Tyler J. Hlavac)

Tradewinds - Caribbean

The training began in the morning with basic instruction for the students on how to handle a riot. The students spent the early part of the day practicing formations, learning commands and learning how to use riot shields effectively. Monitoring the training were military police from Military Police Companies A and B, Headquarters and Service Battalion, 4th Marine Logistics Group, who had spent the previous days teaching the students such subjects as hand-to-hand combat and the use of non-lethal weapons, such as tasers and batons.

The bulk of the training concentrated around perfecting formations, which are the lifeblood of defenders during a riot. The majority of the formations revolved around using riot shields similar to the Spartan style of defense popularized in the movie “300.” Groups form a line of shields and are able to push back an even a larger group of enemies.

After becoming confident with the basics, the students then suited up in full riot gear, including face shields, flak jackets, kevlar helmets, riot shields and thick pads to protect their legs. The defenders then faced off against their fellow students posing as rioters. The groups took turns, each as rioters and defenders, and spent the day clashing with each other, with each new group of rioters getting more serious about their role.

The climax of the training occurred when the rioters and defenders took up their positions in what would be the last scenario of the training. Eager to make the training more realistic, Cpl. Wilson Sylvain, a SWAT team member from Haiti, volunteered to lead the rioters.

Drawing upon his past experiences, Sylvain quickly organized his fellow students-turned-protestors and the training began to take on a more serious tone. The protestors, now organized, began to heavily taunt and antagonize the defenders, chanting “Pigs go home!” stomping and clapping in unison and throwing packages of Meals Ready-to-Eat at the defenders.

Above: Lance Cpl. Sean Lough, a military police Marine with Military Police Company A, Headquarters and Service Battalion, 4th Marine Logistics Group and Louisville, Ky., native, puts on riot gear as he prepares to participate in a mock riot during riot control training as part of exercise Tradewinds 2011 located in St. Johns, Antigua and Barbuda.

Left: A display of the gear commonly used by U.S. Marines during riot control training.

Faced with a surprising level of intensity from the rioters, defender leader Lance Cpl. Von Richcreek, a squad automatic weapon gunner with Company I, 3rd Battalion, 24th Marine Regiment and Nashville, Tenn., native, organized his defenders into solid lines. He then led his defenders, as they grunted loudly, in unison at each step in an attempt to demoralize the rioters.

The two groups quickly met and hostilities started slowly with a few rioters throwing punches and kicks at the defender shields, which quickly

escalated with both groups in an all out brawl with each other, with cries of “Hold the line!” coming from the defenders.

The rioters broke contact after a few minutes and withdrew in an attempt to regroup.

“The man in the brown shirt! He’s in charge!” shouted Richcreek. In an attempt to shut the rioters down permanently, several defenders made a grab for Sylvain, who quickly realized he was now the main target and broke free and sprinted behind other rioters for cover. Sylvain bought himself a few

minutes as the defenders made one last aggressive push forward, utilizing a liberal dose of mock OC spray to chase away enough rioters to snatch up Sylvain and bring the riot and the training to a close.

After the training, Sylvain, speaking through an interpreter, explained that the training was very realistic.

“This is what the people do during a riot. They will throw bottles, stones, tree stumps or whatever they can get their hands on. The techniques we used today are similar to what we use back home and the dangers today are also similar,” he said.

Many of the students gained a sense of camaraderie from the training as well as preparation for the future.

“People say, ‘Man, this is the Caribbean, it can never happen here,’ but it can,” said Royal Barbados Police Force Constable Richard Walkes. “It builds bonds and it’s nice to have someone in another country you can correspond with if you go there, and you don’t have to think twice. You know their level of training.”

Despite the level of intensity involved in the training, there was an element of fun for the students involved.

“It’s really chaotic. You have to watch your guys and watch the mob, it’s a whole lot of input at once,” said Richcreek, describing his experience as defender leader. “It’s nice when you call a command, like ‘snatch team up’ and they grab up a guy.”

When asked which group performed better, Richcreek, unhesitantly named his group as the best performers.

“I didn’t expect the rioters to get that into it, at one point a guy slammed into me and I had to beat him down,” said Richcreek. “However, we all pulled together despite the language barrier and we definitely won.”

Above: A group of Reserve U.S. Marines take down a mock rioter during riot control training as part of exercise Tradewinds 2011 held in St. Johns, Antigua and Barbuda.

Army Sgt. Marshall Day, infantryman and Raven-B operator, observes Romanian soldiers assemble the Raven, a small unmanned aerial vehicle after a flight. Day is supporting Black Sea Rotational Force 11.

RAVEN IN ROMANIA

Marines teach Romanian Army tactical benefits of UAVs

Black Sea Rotational Force is a rotational deployment of Marines sent to the Black Sea, Balkan and Caucasus regions to work with foreign nations and help build their military training capacity, promote stability throughout the region, and build enduring partnerships with 13 nations throughout Eastern Europe.

Story and photos by Sgt. Matt Lyman

BUZAU, Romania — U.S. Marines and soldiers with Black Sea Rotational Force 11 traveled to Buzau, Romania, to provide the Romanian Army a familiarization course to display the capabilities of the Raven-B, unmanned aerial vehicle.

This familiarization course was presented over five days and was split between classroom lectures and practical application exercises, where Romanian soldiers were given some stick time on the Raven system.

The Raven is classified as a SUAV (Small Unmanned Aerial Vehicle), operates at a maximum service ceiling of 10,500 feet and

each unit costs about \$36,000, which is a small price to pay for the immense advantage the Raven system can generate on the battlefield.

"It's a reconnaissance bird. Once it's in the air we can achieve a certain altitude where people on the ground can't see it above and we can loiter over them and see what they're doing, see if they're friend or foe and give a view of the battlefield before we get there," said U.S. Army Staff Sgt. Stephen Provence, Raven operator.

"It has night and day capabilities, so we can see white hot or black

hot. It's easy to pick up signatures from above and it's a great asset to the team."

At only four pounds the Raven weighs less than a loaded M-4 service carbine with magazine. Coupled with the flight systems it weighs less than a M-249 Squad Automatic Weapon with a combat load of ammunition. The Raven is constructed of thin Kevlar material, making it a hardy piece of gear that is water resistant.

The Raven can be equipped with up to three cameras, one aiming forward and one on either side of the nose cone. These cameras can capture video footage and still

photographs, regardless of the time of day.

Adding a Raven system at the squad level would equip them to have an immediate eye in the sky, affording troops on the ground the capability to not only conduct route reconnaissance but shoot back real-time video to the company commander, keeping him one step ahead of the enemy and allowing him to move resources as the battlefield or scenario dictates.

"[The Raven] is great for smaller level things: base security for small bases, route recon, patrolling, and things like that,"

A Romanian soldier executes proper technique for launching the Raven, an unmanned aerial vehicle, during a familiarization course for a class of 24 Romanian soldiers at their base in Buzau, Romania. (Photo illustration by Master Sgt. Peter Walz)

explained Sgt. Joshua WatersJackson, intelligence specialist/RAVEN operator, BSRF-11.

"If we would've had the Raven during my deployments our confidence level would've been way higher. There were several times when an asset like that would've been a force multiplier; we would've been able to get behind the bad guys, stop them from running away or at least follow them, because our biggest issue was positive identification of the enemy," added WatersJackson.

During this familiarization course, the Romanian soldiers were given classes illustrating the physical characteristics of the Raven system to include: materials, assembly, maintenance, storage and components.

Once the soldiers had a basic understanding of

the physical specifications of the Raven, they were taught how to use the operating system, which includes a laptop computer and a global positioning system. The soldiers were given the opportunity to input missions, establish waypoints and synchronize the GPS.

"We were able to learn many things in the classes," said Warrant Officer Marius Enache, Romanian Army.

"I like this equipment. I like using it and it is simple to use. It is a small and intelligent air vehicle and I hope we get the opportunity to explore its' capabilities more in the future."

Learning the Raven system could prove important for Romanian soldiers, as the system is widely used in Afghanistan by U.S. forces, who work with and patrol alongside Romanian soldiers there.

3 MINUTES OR LESS

Marines with Mortars Platoon, Weapons Company, 3rd Battalion, 24th Marine Regiment take cover after dropping a mortar during a live-fire range, June 8, as part of exercise SEA BREEZE 2011 in Shirokyi lan, Ukraine

Marines with Mortars Platoon, Weapons Company, 3 Battalion, 24th Marine Regiment pass out mortar rounds during a live-fire range, June 8, as part of exercise SEA BREEZE 2011 in Shirokyi lan, Ukraine

Story and photos by Sgt. Tyler J. Hlavac

SHIROKYI LAN, Ukraine – As soon as the call comes in from the forward observer, the countdown begins. Three minutes is all the Marines from Mortars Platoon, Weapons Company, 3rd Battalion, 24th Marine Regiment have.

Three minutes to plot the direction, distance and elevation of a round, apply this information to their mortar tubes, launch the round and destroy the target. It's three minutes of chaotic action, but for the Marines involved the payoff is worth it.

Mortars Platoon spent the day honing their craft at one of the firing ranges at the Shirokyi Lan Training Area, an area used by Ukrainian Armed Forces for training, June 8, during exercise SEA BREEZE 2011.

The Marines began the firing day by splitting into two groups: fire direction controllers and gun teams. A fire direction controller's job is to receive a fire request from a forward observer and then using maps of their area of operations, which are divided into grids, relay the direction, deflection, distance and elevation data that will be needed to drop a mortar onto the target.

The gun teams then apply this information to their mortar tubes and send the mortar downrange.

The Marines took up their positions and waited for the range to go hot. Marines spent minutes waiting for a call and just when they started to get comfortable, the radio would suddenly come to life. "Fire for effect!" someone yelled over the radio and the gun teams snap to life. Marines scramble to hand out rounds and quickly send fire downrange. The mortarman went through this scenario several times throughout the day.

As the Marines fired rounds, occasionally mistakes or delays would happen; rounds would be slightly off target or the tubes would need to be cleaned, causing the Marines to run dangerously close to their three-minute deadline.

Each gun team would race to fire first and do their best to call out other teams who were running slowly. Shouts of "brush your tube" or "hurry up" filled the air to complete their mission, mingling in with commands over the radio from the fire direction controllers, such as "Watch your pod" or "Make sure your gunner is bracing," commands that other teams had no problem repeating out loud in an effort to call out other teams.

Despite the brief moments of excitement and stress every time a fire request comes in, the Marines find the effort worthwhile.

"I like hearing the orders (radio commands)... it's like the build up and the explosion at the end is the quick release, it's a rush," said

Lance Cpl. Eric Winkler, a Kansas City, Mo., native and former infantryman who has been training with the platoon since February to become a mortarman.

"It's really cool, when you hear that metal on metal sound...when the round hits a tank, it works in a different location and carries different weapons than their rifleman counterparts.

However, they often steal the show when it comes to large-scale training events.

"People are often unfamiliar with us because we use a lot of math," said Gunnery Sgt. Ben Ramsey, an Aurora, Mo., native and platoon commander for mortars platoon. "They think what we do is mysterious, kind of like magic, but they are always drawn in because we make a good size boom."

During the course of the day the Marines fired approximately 230 rounds. They will spend the next two days firing mortars during both the day and night as part of exercise SEA BREEZE 2011.

SEA BREEZE is an annual combined air, land and maritime exercise with the goals of enhancing amphibious operations, improving multinational maritime capabilities and fostering trust and cooperation among participating nations.

MARINES TRAIN WITH PARTNER NATIONS IN MORTUARY AFFAIRS

Story and photo by Pfc. Zach Altemus

CAMP PEPELISHTA, Macedonia— Partner nations put everything they learned about mortuary affairs from Personnel Retrieval and Processing Company, 4th Marine Logistics Group, to the test in a hands-on training event as part of 2011 Medical Training Exercise in Central and Eastern Europe, June 12.

The PRP team from Smyrna, Ga., and Washington, D.C., have been teaching partner nations the U.S. military's mortuary affairs processes for the past three days.

The Macedonian team, comprised of armed forces members and policemen, worked together inside a morgue, where two litters were set up with human remains pouches. They started working slow, but as the ambulance rolled up with more simulated bodies, they fell into a rhythm.

When an ambulance would arrive, they all gathered quickly outside to get the simulated body out and transfer it into the morgue in a timely fashion.

"The training teaches us how to connect with other forces and manage a crisis," said Sgt. Vesna Kisuovska, Macedonian armed forces medical technician. "It's good to see how other forces do that."

Once inside the morgue, the team would start to process the simulated body by removing and noting all personal items and assessing the remains carefully as the PRP Marines observed their actions.

"I think well-trained people managed the training," she said. "They were excellent because they involved actual [hands-on] training [during their presentations], not just talking."

As the afternoon came around they received a rush of multiple simulated bodies. "I was learning how to handle dead bodies and how the organizational structure should be organized in a time of crisis," said Staff Sgt. Svetlana Jovevska, central medical supply commander in the Macedonian Armed Forces.

"We definitely learned something because we don't really have this kind of job," said Staff Sgt. Vesna Spaseska, a nurse in the Macedonian armed forces. "We can show all soldiers how to react when dealing with dead bodies. The training was very complete and very well presented."

Cpl. Eric Ahn, a PRP specialist, assessed the students and said they were very cooperative and helpful to each other.

"It was great to see that they retained the knowledge earlier, and how students from earlier classes were teaching other students who missed the classes how to process the bodies," Ahn said.

MEDCEUR is an annual regional and multilateral exercise designed to provide medical training and operational experience in a deployed environment for U.S. and partner nations.

MARINES END TRAINING WITH A BANG

2,000 U.S. service members and 900 members of the Royal Moroccan armed forces participate in African Lion

Story and photos by Pfc. Ariel Solomon

TAN TAN, Morocco – The Marines with Company F, 4th Light Armored Reconnaissance Battalion, 4th Marine Division, held their final field training exercise for African Lion 2011 at Cap Draa May 24.

The final exercise consisted of firing eight tube-launched, optically-tracked, wire command missiles, combining fire with four anti-tank 84mm single-use rockets and finished up with simulated bounding live fire and maneuver alongside light-armored vehicles.

“This was the best training we’ve had so far,” said Sgt. Alan Carson, a scout chief with Company F. “We got to combine LAV’s with the small arms.”

The majority of the LAV crews waited in a staging area a few kilometers away from the LAV that launched the TOW missiles. The crews rested and waited until all eight missiles were fired before moving up to the range.

After a dusty ride to the range, the Marines dismounted and prepared to fire several AT-4 shoulder-fired single-use rockets alongside suppressing fire from the vehicles.

The Marines walked forward to the firing line, well away from their vehicles to ensure the back blast from the rocket wouldn’t harm any Marines or their equipment. The Marine with the rocket prepared to fire the AT-4 as fellow Marines suppressed targets with a hail of bullets.

The Marine and the range officers called out “rocket” just before the blast of the rocket shook the range and the nearby Marines disappeared in a cloud of dust.

Each team of Marines fired the rockets until all of them were expended and the exercise moved into its final phase.

The final phase involved a bounding exercise with live rounds and the massive 25mm bushmaster chaingun onboard their LAVs. The Marines simulated covering each other as if

they were moving forward by taking turns firing their weapons while others held their fire.

Next, they squeezed six Marines into the back of the armored transports, weapons in condition three, magazines loaded but no round in the chamber.

The bumpy ride up to the next firing line took only moments and once the firing began the Marines

support area after being in the field for seven days.

"It feels good knowing this is the final exercise, knowing there is a hot shower at the end," said Lance Cpl. Rimer Joseph.

African Lion is an annually scheduled, bilateral exercise between the Kingdom of Morocco and the U.S. that involves more than 2,000 U.S. service members and approximately 900 members of the Royal Moroccan armed forces.

African Lion is the largest exercise within U.S. Africa Command and is designed to promote interoperability and mutual understanding of each nation's military tactics, techniques and procedures.

hopped out and lined up alongside their vehicle, the 25mm bushmaster chaingun thumping in bursts of three as the Marines began firing as if they were bounding forward. One group of Marines fired, then the next, providing cover fire for each other.

As the final exercise came to an end, the Marines were busy cleaning up empty ammunition cans and getting ready to head back to the logistics

‘Red Patchers’

“We hit the shore as quick as possible and get our people and gear back on the ship even quicker”

A Marine from 4th Landing Support Battalion, 4th Marine Logistics Group supervised the vehicle and equipment wash-down of exercise African Lion 2011, May 29, at the Port of Agadir, Morocco. (Photo by Cpl. Nana Dannsaappiah)

Unit: 4th Landing Support Battalion (4th LSB)

Mission: 4th LSB conducts landing support operations in support of the Marine Air-Ground Task Force in order to enable expeditionary operations ashore and coordinate combat service support to the MAGTF in both a direct and general support relationship. Landing support specialists conduct helicopter support teams, port, rail and beach operations, similar to how they did back in World War II. Landing support specialists also assist with the preparation, planning and execution of strategic mobility plans in accordance with the Timed Phased Force Deployment Data, which is used to deploy and sustain forward deployed forces.

End strength: 1,428 Marines and Sailors

Engagements:

- Deployed during March 1944 to Pearl Harbor, Hawaii
- Participated in World War II campaigns: Kwajalein, Saipan, Tinian, Iwo Jima
- Participated in support of Operations Desert Shield and Desert Storm, SW Asia, August 1990-June 1991
- Elements mobilized and participated in Operations Iraqi Freedom and Enduring Freedom, Iraq and Afghanistan, 2009-2011

Aptly nicknamed “Red Patchers” due to small squares of red cloth affixed to their uniforms, LSB Marines are the backbone of ship-to-shore and retrograde operations. They are the experts of loading and offloading personnel and equipment.

“We hit the shore as quick as possible and get our people and gear back on the ship even quicker,” said Sgt. Franky Fergurgur, platoon sergeant of First Beach Terminal Operations Platoon, Company A, 4th LSB.

The red patch was first used in WWII to identify the landing support teams assigned to assist in the off-load of Marines and equipment during amphibious landings.

LANDING FORCE CARAT JUNGLE OPS

CARAT: Cooperation Afloat Readiness and Training

Mobilized Marine Reservists formed an infantry company and assault amphibian vehicle platoon, from 23rd Marine Regiment and 4th Assault Amphibian Battalion, to conduct theater security cooperation and amphibious training with various partner nations in the Pacific Command area of responsibility. Activation and predeployment training occurs during January through February at Marine Corps Base Camp Pendleton, Calif., and Okinawa, Japan. The landing force got underway in March and concluded in August, when the landing force visited and trained with military forces from Thailand, Indonesia and Malaysia. The deployment concluded with training from the Republic of Korea Marine Corps in the Korean Integrated Training Program.

AVIATION COMBAT ELEMENT TACTICAL AIR COMMAND CENTER DEMONSTRATES OPERATION OF A STAND-ALONE RESERVE FORCE

JAVELIN THRUST 2011

Story by Lance Cpl. Chelsea Flowers

MARINE CORPS AIR STATION YUMA, Ariz. — The Marine Corps is bringing new meaning to the operational reserve concept during exercise Javelin Thrust 2011.

For the first time ever, Marine Tactical Air Command Squadron 48 set up, organized and ran a complete tactical air command center, or TACC, as part of a Reserve Aviation Combat Element, or ACE.

“Javelin Thrust is the first time that the Marine Corps has had a stand-alone Reserve force,” said Col. Kevin M. Iiams, Marine Aircraft Group 41 commanding officer and Javelin Thrust ACE Commander. “It is setting the tone for an operating reserve.”

Prior to this, the Marine Corps has never had a TACC that is run solely by reserve Marines in support of an all reserve ACE during an exercise of this magnitude. The success of Javelin Thrust confirmed that Reserve Marines are capable of performing in an operational environment on their own.

This TACC was one of the most complete ever achieved, with the technology to keep all the elements of the Marine Air Ground Task Force operating smoothly and efficiently.

The basic purpose of the TACC is to keep communication flowing between each of

the elements of the MAGTF. Sgt. Robert C. Voelker, Marine Air Control Group 48 air control electronics operator from Chicago, ensures maintenance issues don’t impede the flow of communication.

“People depend on a working network,” said Voelker. “Without our work, minor problems become big ones. Then the job doesn’t get done effectively.”

The TACC possesses the ability to maintain visibility of all aircraft within the operational area. Additionally, Marines can gather the speed, direction and altitude of the aircraft, as well as the aircraft’s mission. This allows accountability of friendly and enemy forces.

The various operating elements tap into the information obtained through the TACC’s radar data link technology to stay informed on current missions.

“We are basically the heart of operations,” said Cpl. Jordan M. Schoon, MACG-48 tactical data systems administrator from Watsea, Ill.

The TACC isn’t just useful for the aviation combat element of the MAGTF, it provides a bridge between the ground and the air components.

“We help provide feedback to the ground and get them support if they need it,” said Staff Sgt. Christopher J. Ohlsen, MACG-48 air support operations operator from Gurnee, Ill. “It gives them comfort that they’re not alone and removes any limits on them through good communication.”

Through a mess of high tech antennas, linked radars, wires and computers, the TACC also provides command and control oversight between the three training locations during Javelin Thrust to keep the exercise running smoothly.

In addition to being the first independently Reserve TACC, the exercise is unique because of its diversity of forces.

“Marines are coming from all over the United States to participate in this exercise,” said Col. Barry E. Federici, MTACS-48 commanding officer. “They are learning to work together smoothly and efficiently.”

Unlike active forces where Marines regularly work alongside others in their unit, the exercise is taking Marines from locations scattered across the U.S. and creating one unified, self-sufficient force.

MARINES GATEWAY MARINE

Story by Lance Cpl. Jacob Osborne

ST. LOUIS - Marine Week began with Francis G. Slay, the mayor of St. Louis, kicking off the events at the proclamation ceremony June 20, during which a 24-hour honor guard was posted at the War Memorial.

Throughout the week, Marines displayed their land, air and sea vehicles and capabilities.

The week was more than just showing off equipment and capabilities; it focused on a desire to help the community, with Marines volunteering at dozens of locations throughout the city. During the closing ceremony, Maj. Gen. Anthony L. Jackson, commanding general of Marine Corps Installations West, thanked the city of St. Louis for their support and hospitality.

STORM THE TO THE MIDWEST: WEEK: ST. LOUIS

He added, "As you return to your daily lives, I ask you remember the Marines still in combat. I ask you all, thank the servicemen for their sacrifices, thank their families for their sacrifices and St. Louis, thank you for being so warm to us."

The 24-hour honor guards were relieved of their post by Lt. Col. T. Shane Tomko, Inspector-Instructor officer, 3rd Battalion, 24th Marine Regiment, commander Special Purpose Marine Air Ground Task Force Marine Week, concluding Marine Week St. Louis 2011.

"Thank you for coming here today and thank you for letting us honor you and your families," said Tomko.
