

HAWAII MARINE

MCAS, Kaneohe Bay, HI

Vol. 8 #50

December 21, 1979

Sunset Parade highlights 3d Marines' anniversary

It was 63 years ago yesterday that Marine detachments from U.S. ships belonging to the Atlantic Fleet formed the original 3d Marines. The ships were at anchor in Guantanamo Bay, Cuba. The year was 1916 and World War I was in full swing.

Until 1922 the regiment served in Mexico and the Dominican Republic. Following the war, the 3d Marines was redesignated as a reserve unit and stationed in San Francisco. The regiment disbanded in December 1937.

Due to the increased requirement for Marines during World War II, the Corps expanded its numbers. As a part of this expansion program the 3d Marines was reactivated on June 16, 1942 at New River, N.C.

Throughout the war the regiment fought on many Pacific islands and took part in memorable battles such as Bougainville and Guam. In fact, it was during those two battles two that a sergeant and two privates first class were awarded Medals of Honor. After the war the regiment deployed to assist the Chinese Nationalist Forces against the communists.

The American involvement in the Korean Conflict resulted in the regiment training in Okinawa, Japan and Hawaii. Elements of the 3d Marines were used to form the 1st Provisional Marine Air-Ground Task Force, forerunner of today's 1st Marine Brigade.

Elements of the regiment moved to Vietnam in 1965 to provide security for the air base at Danang. While in Vietnam, six members of the regiment received

Medals of Honor including Private First Class James Anderson, in whose honor the 3d Marines' dining facility is named.

Following Vietnam the regiment was attached to the 5th Marine Amphibious Brigade at Camp Pendleton, Calif. In early 1971 it was transferred to the 1st Marine Division. But the stay was for only two months, as in June the regiment moved to Marine Corps Air Station, Kaneohe Bay to become the ground element of the 1st Marine Brigade.

Today the 3d Marines remains unique in several ways. It is the largest Marine Corps regiment. It is the only regimental-sized unit in the Corps to have artillery, reconnaissance and an amphibious assault element as organic parts of its organization. And, it is the only Marine Corps combat unit to both live and continuously train with an air element.

The regiment's 63d year has had many highlights. Colonel Robert Loche arrived in June and took command. Elements of the regiment took part in training exercises Team Spirit-79 in Korea, Fortress Gale in Okinawa and Kangaroo-III in Australia. Additionally, the regiment maintained a combat ready battalion landing team in the Western Pacific as a component of the 31st Marine Amphibious unit, known as the "cutting edge" of Marine forces in the Pacific.

Always ready, constantly willing and able, the 3d Marines stand prepared today even as their predecessors did at Guantanamo Bay 63 years ago.

Photo by Sgt. Jim O'Leary

MELE KALIKIMAKA — Children received candy-filled stockings from Santa Claus at the Family Services' Children's Christmas Party held at the Family Theater Saturday. Approximately 600 keikis greeted Santa and his helpers as they arrived by fire truck. The party then moved inside the theater and the children were treated to a free movie and cartoons.

New tactics for crisis situations

A dynamic new program, Maritime Prepositioning, will give the Marine Corps an enhanced capability for rapid response to crisis situations in the 1980s.

This program, approved by Defense Secretary Harold Brown, calls for Marine air-ground task forces to be flown overseas in emergencies and supported from prepositioned multi-purpose ships containing heavy equipment and combat supplies.

The plan will not detract from the Corps' existing amphibious assault capability; the requirement to be able to project Marine amphibious forces in an opposed landing will still remain.

But the plan will give the President the option to deploy a fully-supported Marine Air-Ground Team by airlift for use in crisis situations when a rapid response is required.

The Maritime Prepositioning plan calls for three Marine Amphibious Brigades (MAB) to be ready for immediate deployment by airlift. Each brigade would be supported by five cargo ships which would be located near likely crisis areas.

These multi-purpose ships will have a "Roll-On/Roll-Off" capability for ease of loading and unloading vehicles and cargo without the need for a port facility. In storage aboard the five "Ro-Ro" ships will be a MAB's heavy equipment and 30 days worth of supplies — food, ammunition and fuel.

The Fiscal Year 1981 budget includes sufficient funds for the first two ships. The goal is to complete approximately 15 ships, enough to support three MAB's, by the mid-1980s.

Maritime Prepositioning is expected to enhance the usefulness of the Marine Corps by taking full advantage of the Air-Ground team in emergency situations requiring a rapid response. In a matter of days, a self-sustained fully-integrated Air-Ground team could be ready for operations as required. — MC News

A Christmas wish

Snow fell silently in the yard outside. The family was gathered about the dinner table that was laden with turkey, ham, mashed potatoes with gravy, and pitchers of nog. The smell of bread puddings and pumpkin pies wafted from the kitchen. Bing Crosby sang "White Christmas" on the stereo. It was Christmas Day.

But something was missing on this day of Yuletide cheer. An empty chair sat at the head of the table. It belonged to the family's youngest. It belonged to a Marine.

The young Marine wasn't home this day. He was half a world away in a rain-filled foxhole. His Christmas feast consisted of a cold C-ration version of boneless chicken, cheddar spread, crackers and a chocolate disc. The American Forces Vietnam Network broadcast an Elvis rendition of "I'll Be Home For Christmas," a dream shared with many of his buddies.

Scenes like these are behind us now. Many Marines around the world will be with their families this year. Some will not. And in a different country half a world away brother and sister Americans and Marines wait and pray.

With these things in mind, we have much to think of and much to be thankful for. We have time to pray.

This Christmas holiday, take a moment to think of fellow Marines and fellow Americans. Consider your blessings. But most importantly, give of your heart to those less fortunate and who need to share your love.

We at the Joint Public Affairs Office wish you and all your families everywhere a Mele Kalikimaka.

Sgt. Victor Bradley

63D ANNIVERSARY — The 3d Marines' color guard participated in a SNCO Sunset Parade at Platt

Field Tuesday in observance of the 3d Marines' 63d anniversary.

Help yourself and the Corps

Any more at home like you?

That is the question the Commandant of the Marine Corps, General Robert H. Barrow, wants all Marines to think about.

In a new command recruiting advertising campaign, the Commandant says, "When you're home next time, check around for a few more good Marines. It'll help you, and it'll help the Corps."

The command recruiting program, outlined in Marine Corps Order 1130.60 of October, 1977, allows for privates and privates first class to be meritoriously promoted for referring applicants who enlist. Lance corporals and corporals can receive a 20-point addition to their composite scores for each individual enlistee they refer (up to five); sergeants and above will receive a favorable mention in their fitness reports for similar activity.

Credit for referrals goes to those Marines who take

an individual to see a recruiter or give the names of prospective Marines to recruiters who then process the man or woman into the Corps.

Due to the travel cost which restricts many of our Marines from going home on leave, the Brigade Recruiting Office has initiated a program which will provide the same benefits for Marines that do not go home on leave. Unit career planners have referral forms through which any Marine can provide names of friends that he or she feels would make good Marines. These referral forms will be forwarded to the appropriate recruiting station via the Brigade Recruiting Office and Marine Corps Recruit Depot, San Diego, California, to ensure that the Marine providing the referral will receive recognition.

Special recognition will be given to those Marines/units providing the most referrals, during the period of December 14 through March 30, that result in enlistments.

Street Scoop

"What is going to be your New Year's resolution for 1980?"

Staff Sergeant Lee Holloway, Company D, 3d Assault Amphibian Battalion: "My New Year's resolution is to enjoy Hawaii."

Lance Corporal James Scroggins, Headquarters and Maintenance Squadron-24: "In 1980 I'm going to be a better Marine and work hard on continuing my education."

Carolyn Lessard, Dependent: "To be a better wife and mother."

HMI Armando Galarza, Battalion Aid Station, 2nd Battalion, 3d Marines: "This year I'm going to lose weight and stop smoking."

Captain Alexander Kaonohi, Maintenance Company, Brigade Service Support Group: "To quit my vices I have and devote all my efforts to my family and keeping us united."

From: The President of the United States
Christmas and New Year remind us to thank each of you for helping to defend the peace that is so closely associated with this time of the year, and to pray for the many others throughout the world for whom it is but a hope and dream.
You who serve in the Armed Forces symbolize our nation's determination to sustain the high ideals that have made America a protector of freedom and a haven for the persecuted. Within your ranks thrives the spirit of patriotism and the love of country that are emblematic of our national vitality and strength.
Reassure and I send you and your families our warmest good wishes for a joyous holiday season and a satisfying and Happy New Year.

Jimmy Carter

From: Secretary of the Navy
It is a pleasure to convey to all of you in the Navy-Marine Corps team, and to your families, the warmest wishes for this holiday season.
As you know, Christmas is a very special occasion, for religious and countless other reasons that derive from the traditions of each person's life. Christmas can thus mean many things to many people, and each person has a right to attach that meaning to it that his or her own philosophy attributes to this particular time of year.
I remember well the Christmas of 1944, which I spent aboard the carrier *Essex*, with 2,000 other men, far, far away from those we love. But in a sense we were very near to something else we loved — that was to make our contribution to the peace of the world. That's what all of you are doing today.

Those of you who are separated from your loved ones and your friends are making a real sacrifice, but I hope you also feel the satisfaction of knowing that you are making a very real contribution to the strength of our great nation and the preservation of peace.

You have my very best wishes for a happy holiday, and you have the thanks and appreciation of all the American people. Merry Christmas.

Edward Nidalgo

From: The Commandant of the Marine Corps
To all Marines, their families and friends I extend warm greetings and best wishes for a most joyous and memorable Christmas and Holiday season. May this time of the year enrich your devotion to one another and your service to our nation.

As I bid you a Merry Christmas and Happy New Year, it is my earnest prayer that the peace on earth heralded at Bethlehem will be a reality during the coming year.

General R.H. Barrow

Mele Kalikimaka

From: Chief of Naval Operations

At this holiday season, when peace is foremost in our minds, many of our shipmates and friends are at sea helping to preserve that peace for all men of good will. Throughout the past year, turbulent world events have touched the lives of thousands of Navy people and Navy families in the form of extended deployments and other forms of personal and professional demand. Your response to our nation's call for increased readiness at sea has been unhesitating and has given both me and our fellow Americans cause to be deeply proud of our Navy and its people.

Those who will be at sea or otherwise separated from their families and loved ones during this holiday season deserve the special appreciation of our countrymen for the important contribution which they are making to keep our Navy ready. Peace, like freedom and the other values which are so important to our people, has never been without the price of sacrifice. All in the Navy, active and reserve, civilian employees and members of our Navy families, have made important contributions to the cause of freedom in this highly eventful year. We can take special pride that we help to bring this great gift of peace to our people, and special satisfaction in enjoying it ourselves. Mrs. Hayward and I extend with pleasure to each member of the Navy family our warmest personal wishes for a happy holiday season and the blessing of prosperity.

Admiral T.B. Hayward

From: Commanding General, Fleet Marine Force, Pacific

The Christmas and New Year's season is a warm, joyous occasion when families and friends find special significance in being together and sharing the spirit of giving and brotherhood.

Even though this holiday season may find many of us separated from those we love, I hope you and they will take immeasurable pride in the job you are doing for our nation. Let us hope that the season's spirit will continue throughout the New Year and bring peace to the world for the benefit and happiness of all mankind.

May I take this opportunity to extend to all of you my best wishes for a happy and safe holiday season, and that the coming year be richly rewarding, successful and satisfying.

Lieutenant General A.W. O'Donnell

From: Commanding General, 1st Marine Brigade

As this Christmas season draws near, I invite all members of the 1st Marine Brigade to call to mind the biblical words of wisdom spoken on this joyous occasion: "Peace on Earth to man of good will. Those words apply today and have probably even greater impact than they did one thousand nine hundred seventy-nine years ago."

As we gather with friends and loved ones here in the 50th state, let us also realize that living in a world of reality... a world wherein personalities, religious beliefs and desires are constant in conflict and continually disrupt the "Peace on Earth." There are those who bear no good will toward us and our great nation. It is for this reason that the 1st Marine Brigade exists.

Peace is our goal. But there are those in the world who would deny us our quest. And it is because of such people that we must never relax our vigilance while seeking peace.

I ask each and every one of you to prayerfully join with me in celebrating this most joyous occasion and wish you all a Mele Kalikimaka and a Happy Makahiki Hou.

Brigadier General H.T. Hagaman

From: Commanding Officer, Marine Corps Air Station, Kaneohe Bay

The coming Holiday Season is a joyous time of year when families traditionally gather to celebrate together. Although many of us will not be able to be with all of our families, it is an opportunity for everyone to reflect on our many blessings, particularly those that each of us has received during the past year.

It is also the occasion to once again recall that very special event that happened to another family so long ago and to remember the real purpose of our celebrating is to commemorate the birth of the Prince of Peace, whose message "JOY TO THE WORLD, GOOD WILL TO ALL" remains as refreshing today as tomorrow's Hawaiian sunrise.

So take time during this festive season to savor all the joys it offers and consider dedicating your thoughts and efforts this coming year to doing unto others as you would have them do unto you.

Mele Kalikimaka me ke Hauhi Makahiki Hou.
Colonel M.H. Sautter

At a glance

EMERGENCY MAINTENANCE CREWS
Emergency maintenance crews, consisting of Marines from the Facilities Department, are available to help housing residents with flooding problems which may occur during weekends, holidays or after normal working hours.

If help is needed, call the station Officer of the Day at 257-2378. The Officer of the Day will evaluate the problem and dispatch maintenance crews as needed.

CREATIVE THEATER CLASSES
The Windward YMCA, Kailua, offers Creative Theater classes in communication and performing skills to youth 4 through 17 years of age.

The subjects are: Puppet Construction-Performance, 5 through 11 years of age; Creative Expression, 4 through 7½ years of age; TV Production and Performance Skills, 7½ through 13½ years of age; Mime and Popular Pantomime, 7 through 11 years of age and Fundamentals of Acting for teenage youth. Enrollment is now being taken for opening in classes beginning the week of January 7. Enrollment is limited so phone 941-2798.

If you have questions regarding the Hawaii Marine, call 257-3319.

Credit Union benefits all account members

Story by Cpl. Lamar Johnson

The Marine Corps Air Station Federal Credit Union is a non-profit, financial organization, owned by its members for their benefit. Its purpose is to promote convenient, systematic savings and provide a quick, economical source of credit for productive purposes.

If you are stationed on or reside near Marine Corps Air Station, Kaneohe Bay, whether you be Marine, Navy, civil service worker, retiree, or dependent, you are eligible to establish credit at the MCAS Credit Union.

Most people believe the only way to establish credit is through borrowing money. This is not true. The credit union is a combination of both savings and loan programs. Members may save money by share (savings), accounts and also borrow from the credit union.

The Federal Credit Union Act was signed into law in June, 1934 by Congress. Credit unions were formed as a cooperative to help persons of small means. By pooling the saved money of all the members, the credit union can loan members money at a cheaper interest rate.

A large number of military members travel quite often during their first term of enlistment. It is often difficult for them to

establish credit. The credit union is ideal for persons stationed in one locale for the duration of his or her first term with the military.

To become a member of the credit union, you pay a membership fee and purchase at least one five dollar share in the credit union for savings.

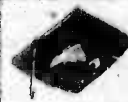

You may retain your membership in the credit union, after leaving the air station, if you maintain a minimum of \$100 in your share account.

Deposits in your share account can be made in person, by mail, or by payroll allotment. Money deposited by the tenth of the month earns dividend credit for that month. Dividends, beginning January 1, will be computed and paid quarterly to each member's account.

Life savings and loan insurance protection automatically becomes effective the day you become a member.

The Marine Corps Air Station Federal Credit Union is located in building 401, behind the main disbursing office.

For more information give them a visit. The hours of operation are Monday through Friday from 8 a.m. to 3:30 p.m., paydays 8:30 a.m. to 4 p.m. and on the second Wednesday of every month from 8 a.m. to 2:30 p.m.

Education corner

BARSTOW COLLEGE

D.C. Circuits and A.C. Circuits are the next Electronics courses to be offered aboard Marine Corps Air Station, Kaneohe Bay. D.C. Circuits begins Monday January 7 with class meetings on Monday and Wednesday evenings and A.C. Circuits begins Tuesday, January 8 with class meetings on Tuesday and Thursday evenings. Technical Mathematics classes will also be offered with classes conducted either Monday or Tuesday evenings in conjunction with the Electronic classes.

Rescue Practices, Introduction to Fire Science, and Fire Hydraulics are the next courses offered in the Fire Science program. Rescue Practices begins January 7 with class meetings on Monday evenings. Introduction to Fire Science begins January 8 with class meetings on Tuesday evenings. Fire Hydraulics begins Wednesday, January 9, with class meetings on Wednesday evenings.

Advanced Technical Drafting and Architectural Drafting Exterior and Interior Elevations begin January 7 with class meetings on Monday and Wednesday evenings. Basic Technical Drafting and Engineering Graphics begin January 8 with class meetings Tuesday and Thursday evenings.

For further information contact the JEC at 257-2061.

EMBRY-RIDDLE AERONAUTICAL UNIVERSITY

Embry-Riddle is pleased to announce that Staff Sergeant Vincent Collins, Marine Medium Helicopter Squadron-262, has received his Federal Aeronautics Administration's Airframe and Powerplant License. Collins is currently working to complete degree requirements for a Bachelor's Degree in Professional Aeronautics.

Embry-Riddle extends its congratulations to SSgt. Collins and wishes him continued success.

CENTRAL MICHIGAN UNIVERSITY

Central Michigan University's Master's Degree program in Hawaii will have a new beginning at Marine Corps Air Station, Kaneohe Bay in January. It will be an on-going program leading to a Master of Arts degree in Management and Supervision or Community Leadership.

The first course, MGT 681—Organization Theory and Practices, will be offered on three January weekends for three credits. Classes will be held at Classroom two of the Joint Education Center (JEC), in Bldg. 219, Fridays from 6 to 10:15 p.m. and Saturdays from 8:30 a.m. to 5:30 p.m. Class dates are January 4, 5, 11, 12, 25 and 26.

3D RECONBN: LETTER OF COM-

Money: Landlords have certain obligations and tenant problems can be fixed

By MSgt. Bill Buck

In an effort to help servicemen and women aboard Marine Corps Air Station save money and hassles, the Provost Marshal's Office has instituted this consumer's column.

When it comes to housing, the law provides that a tenant may expect certain things from a landlord. For instance, a unit must be ready for the tenant to move into at the time and in the condition agreed upon. The landlord must provide safe and healthy premises and make all necessary repairs and arrangements to keep the premises in a liveable condition. In addition, the landlord is required to maintain all electrical, plumbing and other facilities in good working order, as well as providing and maintaining garbage bins and arrange for frequent removal of waste materials, except in the case of single family residences.

Landlords are required to provide a copy of a lease or rental agreement when the document is in writing, as well as rental receipts. Cancelled checks may serve as receipts, but the tenant may also request a written receipt from the landlord.

State law also provides that the tenant shall be given, in writing, the name and address of the owner or his authorized agent who is authorized to receive rent, notices and demands. This information must be kept current at all times. If the required information is not given to the tenant, then the person who rented to the tenant, becomes liable for all landlord obligations under the state code.

In the case of absentee landlords, the landlord must designate an agent to act on his behalf and that agent must reside on the same island as the rental unit.

If the name and address of the owner and/or his agent are not given to a tenant under oral agreement, the tenant may demand such information. Disclosure of the names and addresses of landlord and agent must then be supplied within 10 days and in writing.

What happens when you can't move in at a time you and the landlord have agreed upon, or if the premises are not in the condition you agreed upon? If that happens, you do not have to pay rent during the time you cannot move in and you may also notify the landlord and terminate the rental agreement.

You also have the right to recover damages in the amount of reasonable costs to find another place to live.

If the landlord fails to conform to the rental agreement or to Section 42 of the Hawaii Residential Landlord-Tenant Code (provisions of which are listed under landlord obligations), at the beginning of the term the tenant may, on notice to the landlord, terminate the rental agreement and vacate the dwelling at any time during the first week of occupancy.

If a condition exists within the premises and it is not due to tenant's neglect, and if it deprives the tenant of enjoyment of the dwelling under rental agreement, the tenant may notify the landlord in writing of the situation and terminate the rental agreement if the condition is not remedied within one week. No notice needs to be given if the condition poses an imminent threat to health or safety. If the condition was caused by the landlord's negligence or done willfully, the tenant may recover damages caused by the condition.

Should you be locked out of your unit without cause or a court order, you may recover possession or terminate the rental agreement. In either event, you may recover damages plus the cost of the suit.

Except for entry in emergency, such as fire, the landlord shall be liable to the tenant for any theft, casualty, or damage caused by the landlord's entry or by anyone acting for the landlord when the tenant is absent and has not consented to a specific entry. The landlord is also liable if the tenant is present but has not given permission for entry or in any case where damage is caused by landlord negligence.

Upon repeated demands by the landlord for unreasonable entry, the tenant may terminate the rental agreement or obtain an injunction against the landlord and a fine of not more than \$100.

If a dwelling is rendered partially or wholly unuseable by fire or casualty damage, a tenant may immediately leave the premises and notify the landlord within one week after moving. The rental agreement terminates the date the tenant moves out. If you don't notify the landlord, he or she may collect rent up until the time he knows of your moving. If you

tenant continues to live in a portion of a dwelling that remains useable after fire or casualty damage, the rent shall be adjusted by the landlord to cover payment for only the portion still useable.

If conditions in a tenant's dwelling unit constitute a violation of health laws and he has complained to the Department of Health, the Office of Consumer Protection, the landlord and/or any governmental agency and he has, in good faith, requested repairs or the landlord's compliance with any provision of the landlord-tenant code, then the landlord may not recover the unit. Nor may he increase rent or decrease services to the tenant, as long as the tenant has paid and continues to pay his rent on time, except under the following conditions.

The landlord may recover possession of the unit after the tenant has made a complaint if the tenant is committing waste, is a nuisance or is using the dwelling illegally or not as a home in violation of the rental agreement. He may also recover the unit if he wishes to occupy the dwelling for immediate use as his own residence or that of his immediate family, or if the landlord wishes to substantially alter, remodel or demolish the premises or to terminate for at least six months its use as a dwelling unit. In addition, he may recover possession if he has contracted to sell the property and the purchaser wishes to alter, remodel or demolish the property or to use it as his own home.

Rent may be increased after a tenant has made a complaint if the tenant's complaint to the Health Department is rejected; the landlord has a substantial increase in taxes or operating cost, not caused by noncompliance with the tenant's complaint, not less than four months before the demand for increased rent. Increased rents may be asked for if the landlord has completed a capital improvement of the dwelling, or if the complaint filed by a tenant concerns a defect that was caused by the tenant, or if the landlord can show that the rent demand does not exceed the rent charged to tenants of similar dwelling units in his building.

Next issue: Repairs, Tenant Obligations, and Landlord

JRC settles in newcomers to K-Bay

Story by Cpl. Lamar Johnson

When a Marine joins the rolls of the Marine Corps Air Station, or 1st Marine Brigade at Kaneohe Bay, having an immediate place to eat and sleep makes the new atmosphere more comfortable. It's even more comforting if the Marine has enough money to tide him or her over until the next payday.

The Joint Reception Center (JRC) provides the newly joined, unaccompanied Marine noncommissioned officer and below with a place to sleep and \$75 health and comfort pay. The personnel who work at JRC make it their business to know how many men and women are arriving at Honolulu International Airport. This is to make sure the arrivals who are going to MCAS Kaneohe Bay are well taken care of.

It begins with a ride from the airport. "We receive a roster from the Movement Center in Camp Pendleton, California, letting us know in advance how many people we have coming in," said Staff Sergeant John Granados, Staff Noncommissioned Officer in charge of JRC.

According to SSgt. Granados, "Once we get the personnel settled in on the base, they receive lectures to orient them to the laws and local practices of Honolulu Police Department, swimming and surfing areas on Oahu, good places for entertainment, the credit union . . . basically the straight scoop on everything."

Woman Marine (WM) sergeants and below are normally not allowed to stay at the JRC Barracks since it is mainly used for incoming male personnel. "We arrange for the WMs to get into a lodge or housing and some go to the Bachelor Officer Quarters (BOQ) and we process them from there," Staff Sergeant Granados explained.

Though it doesn't happen very often, there are times when someone will arrive unexpectedly and when this happens, "We get with it and stay with it until we can make arrangements for the new arrival," stated SSgt. Granados.

The barracks area at JRC is complete with fans for those extra warm days, lockers for clothing and gear, television and

other recreational facilities. Upon arrival, the Marines are granted normal liberty during their processing providing they are present each day for formation and more processing.

The Joint Reception Center actually serves a dual purpose, to ensure that all newly - joined unaccompanied Marines are taken care of as far as familiarizing them with the Marine Corps Air Station and the 1st Marine Brigade. And, to make sure they are up-to-date in their health and dental records, as well as with travel and back pay reimbursements. What's most important at JRC is that this processing period only takes from two to three days to completely check in and receive a permanent assignment.

Staff Sergeant Granados claimed, "I've been with JRC for seven months now and there have been a few changes made since I've been here. What I aim to do is to make sure the quality of the Joint Reception Center is improved for the future personnel who will work here, and to make it nice for those new members who join us for only a short time."

Photo by LCpl. Jo Steed

HOW MUCH? — Personnel working at the Joint Reception Center, discuss daily, with new members of Marine Corps Air Station, Kaneohe Bay, information needed for the submission of travel vouchers. Cor-

poral Allen Hudson (left) aids Lance Corporal Michael Kanpp in properly preparing the paperwork he needs to receive any monies due.

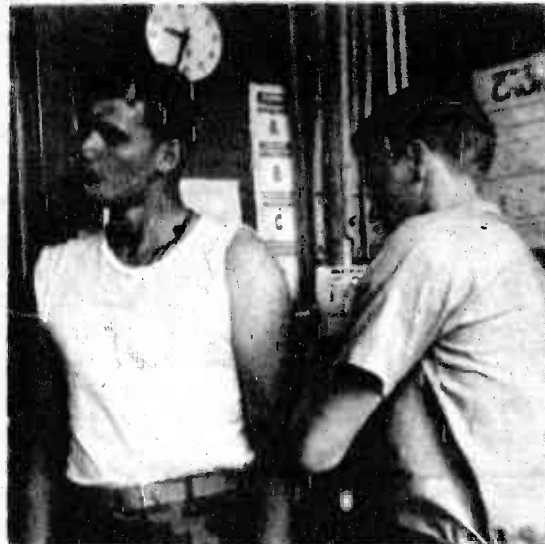

Photo by LCpl. Jo Steed

THAT SMARTS — Upgrading medical records is required for all personnel passing through the Joint Reception Center at Marine Corps Air Station, Kaneohe Bay. Hospital Corpsman Third Class Carl Maple administers the basic series of shots required to Private Michael Crawford, a newly joined member to K-Bay.

Photo by LCpl. Jo Steed

IT WORKS NOW! — Corporal Mark Warren works with the General Supply Maintenance (GSM) platoon of the Brigade Service Support Group. As the section head of Office Machine Repair (OMR) at GSM, he ensures complete repair of all office machinery utilized by the 1st Marine Brigade. The largest quantity of machine repairs is conducted on manual and electric typewriters.

Photo by LCpl. Jo Steed

CARE FOR THEIR OWN — Brigade Service Support Group's General Supply Maintenance (GSM) Platoon Sergeant, Sergeant Garry Walker, gets involved with this personnel and his work. He knows that caring for their own supply/repair equipment is as important as the equipment repaired through GSM.

GSM

The unseen support of the brigade

Story by Cpl. Lamar Johnson

The General Supply Maintenance (GSM) platoon is part of the 1st Marine Brigade's Service Support Group (BSSG) at Marine Corps Air Station, Kaneohe Bay. It was previously known as the Support Operational Readiness Float unit (SORF).

The platoon is broken down into four sections: office machine repair (OMR), general property repair (GPR), administration, and the Marine Integrated Maintenance Management System (MIMMS)/Supply.

The administrative and MIMMS/Supply sections of the platoon control all paperwork involved with GSM, along with handling incoming equipment necessary for the work conducted by the platoon.

Master Sergeant George Calloway is the platoon commander of GSM. He has been in the field since 1967. He has been assigned to duty stations such as the 2nd Force Service Regiment, Camp Lejeune, North Carolina, and the 3d FSR in Okinawa. "I've enjoyed working in this field," said MSgt. Calloway, "though the work is not as complicated as in some of the other commodities like Electronics or Engineers."

According to MSgt. Calloway, "The mission of GSM is to support the Brigade in repair of general supply articles. Most of our work is done in repairing all office machines, 782 field gear and canvas items. We upholster automotive seats, reset and open locks on safes," he continued, "our GPR section even repairs drills and hydraulic jacks."

Corporal Mark Warren is the noncommissioned officer in charge of GSM's Office Machine Repair section (OMR). His responsibility is to ensure the

repair of all office machinery utilized by the brigade. Cpl. Warren claims the largest quantity of machine repair is done on typewriters, "manual and electric."

"Getting the job completed rapidly and out of the way is the most important thing," said Cpl. Warren.

Lance Corporal Richard Perdue is a fabric repairman at GSM. His work includes mending and repairing such equipment as alic packs, sleeping bags, tents and various other canvas items. Regarding his work LCpl. Perdue stated, "We conduct inspections on all units to find out if their field gear and equipment is in serviceable condition. If it needs repair, we mark it and have the unit involved turn the equipment in to us."

Sergeant Garry Walker GSM platoon sergeant explains the repair process. He said, "The unit will normally ask us to come and inspect their gear. We mark all gear for repair during the inspection and have the unit requesting the repair work fill out an Equipment Repair Order."

"Once the gear is brought to the GSM office, we repair it, then notify the unit their equipment is ready for pickup."

The GSM platoon not only does work for the 1st Marine Brigade, but Camp H.M. Smith and Pearl Harbor as well, according to Sgt. Walker. "We take ERO's from other outlets because we are the only GSM operation on the island except for a similar Army unit."

According to Sgt. Walker, "GSM is the unseen support of the entire Brigade. When it comes to having serviceable machinery, tents, packs, helmets and what have you, we have to get the job done." He concluded, "If it's unserviceable, eventually it will get to us."

IMMEDIATE ACTION LAW — Lance Corporal Richard Wiles of Co. F, 2nd Battalion, 3d Marines practices an "immediate action" drill for the Light Anti-tank Assault Weapon.

DRAGON BREATHES — Lance Corporal Joseph Marvel of Weapons Co. 2/3 live fires the Dragon missile. Marvel and the vast majority of the Weapon's Marines firing the Dragon found little difficulty in guiding the sophisticated missile right into its target, 1,000 meters away.

Weapons Company 2/3

Solid foundation laid with hands-on training

Story and photos by
Sgt. Richard MacDonald

"This kind of hands-on, live-fire training is exactly what our weapons crews need," exclaimed Sergeant Stephen Wilson, 81mm Platoon Sergeant for Weapons Company, 2d Battalion, 3d Marines (2/3). "The men were motivated throughout the two week field training period and the instructors returned home knowing much had been accomplished."

Makua Valley Army Range was the setting for 2/3's combined weapons training from December 3-14. The exercise was conducted by Weapons Company for its crews and for

weapons crews from the battalion's letter companies' weapons platoons.

Stated 2/3 commanding officer Lieutenant Colonel Gerald Houston, "This field exercise laid a solid foundation for more advanced training in the near future to really make professional gunners out of the 2/3 Weapons Marines."

The 2/3 leathernecks spent their first few days in class, re-learning everything from weapons' fundamentals up. Then came gun drills and the live-fire under several different kinds of target, ammunition and environmental conditions.

"We over-trained and planned-trained and

fired both the Dragon missile and the Light Anti-tank Assault Weapon (LAW)," stated Lance Corporal Joseph Marvel of Dragon Platoon. "The result is a more skilled and confident weapons Marine who, although a specialist with one weapon system, now has the know-how to fire both and do it well."

Commenting on the training for 2/3's machinegun Marines, Sgt. Steven Holicky, Company G, instructor, said, "We fired more than 20,000 M-60 machinegun rounds to qualify 25 gunners and assistant gunners. The men know their M-60's better now than they ever have before. This is the benefit of training we could receive."

"The Weapons Marines were kept very busy throughout the two weeks," explained Captain Stephen Houston, Weapons Co. commander. "We went to Schofield Army Barracks and received instruction on, and climbed inside, American and Soviet tanks."

The combined weapons training package provided the 2/3 weapons people with good training and they are now looking for more of the same.

"It just goes to show," explained Lt. Col. Houston, "that if you provide Marines with the proper means and place to train and then leave them alone, they will train themselves and enjoy it while doing so."

MACHINEGUN QUALIFICATION — Lance Corporal Joseph Marvel of Weapons Co. machinegunners fires M-60 machinegun rounds at a target. Lance Corporal Joseph Marvel of Weapons Co. machinegunners fired more than 20,000 M-60 machinegun rounds to qualify 25 gunners and assistant gunners. The men know their M-60's better now than they ever have before. This is the benefit of training we could receive.

Marathon challenge met

More than 7,500 runners assembled at Aloha Tower December 9, for the 7th Annual Honolulu Marathon. The following list is the compilation of names submitted to the Sports Editor from each Marine/sailor's unit.

NAME	S.A.	RANK	UNIT
Allen	S.A.	2/3	
Armstrong	R.J.	IM3	HMM-165
Ascoli	G.C.	2/3	VMFA-235

LUCK AND SKILL COMBINED — Displaying their trophies are the winners of the Fourth Quarter Catfight Golf Tournament which was held at the Kaneohe Klipper Course on Tuesday. The winners are (from front left) Master Sergeant Jim Parrott, Headquarters and Headquarters Squadron, closest to the pin; Corporal Chuck Cahill, Station Operations and Maintenance Squadron, GEMO, longest drive on the 10th green; (second row left) and the winning team of Richard Cole, teen club assistant manager, Staff Sergeant Johnny King, SOMS Weather, and Sergeant Larry Young, SOMS Weather. Teammate Sgt. Willard Turpin II of SOMS Weather is absent from the photo. At far right is Gunnery Sergeant Chuck Offutt, Special Services Office, holding the appreciation trophy presented to him by the Special Services Office and the Catfight golfers. Offutt and his wife, Sharon, hand-carved, painted, and engraved each of the golf awards.

Jurists run 26-miler

When the gun sounded the start of this year's Honolulu Marathon, five lawyers from Marine Corps Air Station, Kaneohe Bay's Joint Legal Services Center were among the more than 75 hundred runners. Four hours and forty-five minutes later, all five had completed the 26-mile run.

Captain Cal Scovel led the pack with a time of 3 hours 14 minutes, followed by Capt. Peter Solecki in 3 hours 34 minutes. Major Robert Hilton turned in a time of 3 hours 58 minutes, followed 32 minutes later by Lieutenant Colonel Roy Whitehead, Jr. The final running jurist from K-Bay was Major Glenn Orgeron with a time of 4 hours, 45 minutes.

When asked about his performance in the marathon, Lt. Col. Whitehead observed, "I ran a good 23-mile race. The problem was that the marathon is 26 miles. I sort of hit the wall at the 23-mile mark and did a Tim Conway shuffle to the finish line."

WHAT IS A MARATHON? — There are many faces to a 26-mile run; joy, anger, pain, and puzzled. The joy of beginning and finishing, the anger of quitting too soon, the pain of not enough training, and the puzzling question of... why you are running to begin with. These are the faces of a marathon.

Sportsnotes

In honor of 79 years of service, the 1st Marine Brigade will conduct a **Track and Field Meet**, commemorating its anniversary. The field meet will be held at the Pop Warner Football Field on Marine Corps Air Station, Kaneohe Bay, December 28. It will begin at 10 a.m. and conclude at 3 p.m. There will be a rehearsal of the ceremony on Wednesday, Dec. 26, on the Pop Warner Field at 9 a.m. For more information on the event, contact your unit sergeant major or first sergeant.

Captain Rollin Napier, the assistant S-3 for the 3d Marines, turned in a time of two hours, 54 minutes and 14 seconds, good for a 156th place finish in the **Honolulu Marathon**, December 9. The next fastest Marines were 167th place Capt. Ed Williams, Comptroller's Office, FMFPAC, at 2:55:01.2 and the 179th finisher was Lieutenant Colonel Bill Seymour, the deputy G-2, FMFPAC, at 2:56:03.3. Eleven-year-old Karen Courter finished first in the 12 and under category, with a time of 3:34:48.3, bettering last year's mark by 37 minutes. Together with her mother, Nancy, they finished last in the mother/daughter category at 7:07. Karen and Nancy are the dependents of Lt. Col. Harold Courter, logistics/JOPS officer, G-5, FMFPAC.

A **wrestling/rules/techniques clinic** will be held for all military wrestlers at the Naval Air Station, Barbers Point gymnasium starting at 5 p.m. Wednesday. Lieutenant Commander Saur, a two-time national champion and All American, will present the clinic. Saur will also be present for the Aloha Open Tournament to scout for potential interservice competitors Thursday, at Fort Shafter. All interested wrestlers are encouraged to attend the clinic.

Attention wrestlers!! The Aloha Classic will be held Thursday at Fort Shafter beginning at 10 a.m. Weigh-ins begin at 8 a.m. For more information, contact the Ft. Shafter Special Services or Captain Jim Adams at 499-2585.

This is aloha for me as the sports editor, as I have received PCS orders to Raleigh, N.C. Thanks to everyone for their most appreciated sports input, and please continue to support sports reporting.

King Kamehameha attempts to unite the islands

By Major Rick Stepien

An old Hawaiian legend said that under the sign of a bright light would be born a boy who would become the greatest king in Hawaiian history. And so it came to be in the Kohala district of the Big Island in 1758. As a great comet streaked across the evening sky above the Hawaiian Islands, the prophecy was fulfilled and Kamehameha the Great was born. He grew to be an imposing figure of a man and stories of his remarkable feats of strength spread throughout the islands.

Whenever the king of an island died, vicious in-fighting among his descendants and subordinate chiefs usually followed regardless of who the king appointed as his successor. Such was the case on the island of Hawaii.

Upon his death, the high chief of Hawaii, Kalanipuu, appointed his son, Keoua, to succeed him. To his nephew, Kamehameha, he entrusted the image of the war god, Kuli'amoku.

As the descendant of Kalanipuu and other chiefs of the island became embroiled in conflict over land control, Kamehameha gradually rose in power and attained the status of a high chief. Eventually, he became Keoua's main rival for complete control of the island.

With Captain Cook's discovery of the Hawaiian Islands, a great number of merchant ships began using the islands for rest and recreation as they sailed between North America and China. The Hawaiian chiefs frequently traded with the captains of these ships. In exchange for food and other items peculiar to the islands, the Hawaiians obtained their most sought after commodity — iron. As fighting among the chiefs continued, muskets

and cannons became the hot items of trade. Kamehameha built his arsenal by shrewd bargaining, and when powerful enough, actually began seizing some of the visiting ships.

He pressed into service all the carpenters, metal workers and sailors he captured, and two of his English prisoners, Isaac Davis and John Young, were to play a significant role in his future war plans. These two sailors, after many foiled escape attempts, resigned themselves to their destinies and taught the Hawaiians the art of musketry and cannonry.

The most powerful king in all the islands at the time, however, was Kahekili who ruled Maui, Molokai, Lanai, Oahu and part of Kauai. While Kahekili was on Oahu, Kamehameha attacked Maui in 1790. With Davis and Young manning the cannons, the island was quickly conquered. But civil strife on the Big Island during his absence caused Kamehameha to withdraw from Maui and return to his native island and retrieve the land and possessions the other chiefs had confiscated from him.

While on the Big Island, Kamehameha decided it was time for a showdown between him and Keoua. Ultimate power and authority on Hawaii had to be resolved before Kamehameha could begin his grand scheme of conquering all the islands.

Kamehameha lured Keoua to visit him. As Keoua's canoe approached, Kamehameha asked him to stand so that they might greet each other properly. At this time, one of Kamehameha's lieutenants, Ke'eamoku, launched a spear which found its mark in the chest of Keoua. No one really knows if Kamehameha ordered or secretly knew of the mur-

der plot, but from that time on, the Big Island was his, and his alone!

As more ships visited the islands, Kamehameha and Kahekili amassed great numbers of guns and vessels in preparation for their head-to-head confrontation. But the battle never materialized. Kahekili died in 1794 and left his great wealth and power to his two sons who eventually fought each other for control.

One of his sons, Kalanikupule, with the help of William Brown, a British sea captain, eventually defeated his brother. Kalanikupule expressed his gratitude by killing Captain Brown and taking his ship and crew.

With his war canoes in trace, Kalanikupule sailed his new fleet toward the Big Island to confront Kamehameha. The English sailors, however, rose in rebellion during the trip and unceremoniously dumped Kalanikupule and his warriors overboard and left for China.

In shame and without a military advantage, Kalanikupule paddled back to Oahu. He was vulnerable now and Kamehameha knew it. With his warriors embarked in his vast array of war canoes and ships, Kamehameha set sail from the Big Island in 1795. His destination — Oahu!

Using Maui and Molokai as rehearsals, Kamehameha easily took these lightly defended islands and sailed for his final objective.

Kalanikupule, thinking Kamehameha would attack on the windward side of Oahu, oriented most of his defenses there. However, Kamehameha launched his attack on the leeward side, coming ashore on the beaches of Waikiki and Waialae. Not having access to any proven principles of amphibious doctrine,

Kamehameha's choice of assault beaches (separated by a dominant terrain feature — Diamond Head), might be severely criticized by some arm-chair landing force commanders. But that was his choice and it proved to be a successful gamble.

Kamehameha's forces pushed inland, slowly driving the Oahuans into Nuuanu Valley. What are now the lush, manicured fairways of the Waialae Golf Course, the quiet, opulent neighborhood of Kahala, and the famous Waikiki strip, were then a bloody battlefield.

Although the fighting was fierce, Kamehameha's musket-bearing warriors proved to be too much for the Oahuans who retreated to the heights of the Nuuanu Pali, overlooking the windward coast. At this point, the Oahuans faced a pretty tough decision: they could stand and fight to the death (which many did) or they could take the plunge off the 3,000-foot cliff to the jagged rocks below (which the rest did).

This historic battle solidified Kamehameha's rule over all the islands, except Kauai. His quest to unite the Hawaiian Islands under one ruler was near completion, so he thought. In Part II, we'll look at Kamehameha's frustrating attempts to secure Kauai. "A hui hou!"

Intelligence brief

KARA CG — Although the Soviet Navy has a tradition that goes back over 250 years, it was, until recently, primarily designed as a home defense force. The transition to a modern "blue water" navy began in 1956 with the appointment of Admiral Sergei Gorshkov as Commander in Chief of the Soviet Navy. Since that time, the Soviet Navy has undergone a complete renewal and today challenges the power of our own Navy.

Soviet naval trends in surface warships reflect emphasis on large units heavily armed with anti-submarine warfare (ASW), anti-air (AA), and anti-ship weapons, and with extensive communications and electronic warfare (EW) capabilities. The ships are also designed for defense in depth through outfitting the ships with redundant sensors and weapons that provide 360 degree and overlapping coverage. The most striking attribute of Soviet surface combatants is their handsome design which gives the ships a forceful, ominous and military appearance.

True to these design features is the Kara class guided missile cruiser (CG). Long, sleek and bristling with weapons, the Kara CG is the largest gas turbine warship in the world and is unmatched in appearance by any ship in the western navies. The Kara class first entered active service in 1972 and is the first cruiser class ship to have three separate missile systems. Displacing 9,725 tons, the ship is 560 ft. long, has a 62 ft. beam, a

draught of 20 ft., and a maximum speed of approximately 34 knots. Its weapons consist of a well rounded complement of ASW, AA and anti-ship weapons. Its ASW weapons include two 16-barrel rocket assisted depth bomb launchers (RBU), mounted on the foredeck and two 6-barrel RBUs aft, as well as two sets of quintuple 21" torpedo tubes positioned port and starboard aft of the funnel. Anti-air weapons consists of two twin SA-N-3 missile launchers located fore and aft, two SA-N-4 missile launchers located each side of the mainmast, two 76.2 mm guns located port and starboard aft of the bridge, and four 6-barreled air defense machine guns (ADMG) located port and starboard aft of the funnel. The Kara's anti-ship weapons consist of eight surface to surface missile launchers located port and starboard of the bridge, and the previously described 76.2 mm guns. Note that the ship has at least two of each type weapon which provides the ship with a back-up system should one of the weapons be neutralized or destroyed, as well as providing 360 degree defense coverage.

Designated by the Soviets as a "Large ASW Ship," the Kara class CG epitomizes the Soviet effort in the past two decades to build a powerful ocean-going navy in order to expand their influence in all areas of the world.

Intelligence Brief is compiled by the Combat Intelligence Center. For information call 257-3190.

What floats like a butterfly, but stings like a bee? For our purposes, we're referring to the Soviet helicopter pictured here, which is the topic of the next article.
