## MCAS Library summer reading program to begin in June

Story by:  
Cpl. Jonah Lovy  
Staff Writer

The Marine Corps Community Services Library begins a summer reading program aboard Marine Corps Air Station Beaufort June 6. The library staff is slated to hold a range of free activities for children, teens, and adults in the Fighborough community to encourage and support the reading program throughout the summer.

The theme for this year's summer reading program is 'Read for the Win!' The theme coincides with the

XXXI Olympic Games in Rio de Janeiro and is being used to connect sports, games, and competitions with reading. Olympians aim to achieve greatness. They must set goals and accomplish them, despite obstacles that may stand in their way. The Library staff hopes to inspire the same attitude in children who participate in the program.

"We've planned a wonderful program for kids to make the library a great place to read, learn, and

## Marine Corps changes policy on vehicle decals

Photo by Petty Officer 2nd Class  
Kiona Miller

Department of Defense Police Cpl. O.K. Harris checks personnel and visitor identification at the Washington Navy Yard. Effective May 9, Marine Corps installations will no longer require vehicles to display DOD vehicle decals for base access.

Story by:  
Mike Barton  
Joint Public Affairs Office  
MCAS Cherry Point

Department of Defense personnel who live and work onboard Marine Corps Air Station Beaufort will no longer be issued vehicle decals that identify them as DOD personnel.

The new policy was issued May 9 in Marine Administrative Message 245/16, which directed all Marine Corps installations to cease the issue of vehicle decals, effective immediately.

Officials here stress, however, that the elimination of decals will not change any other base access policies, which require a valid state vehicle registration, proof of insurance, a valid state driver's license, a safety inspection sticker for states that require one as part of their registration, and appropriate DOD credentials. Personnel assigned permanently to MCAS Beaufort or any of its supported commands are still required to register their vehicles at the installation Pass and ID office, whether they live on or off of the air station. All personnel, whether permanent or not, will still be required to provide appropriate identification credentials at sentries at base access points each time they enter the air station, including active and retired DOD identification,

# HAPPENINGS

■ There are only a few weeks remaining to get signed up for the 2016 Graduation Ceremony at the Paris Island Lyceum June 3. (On-base Park and Embry-Riddle students go through their on-base university office.) Regardless of their school\* or type of degree\*, if they have any affiliation with our military community, they can be recognized (“walk”) at the graduation event.

To sign up, please call (843) 228-2152 MCAS Beaufort 228-3889.

■ As part of regularly scheduled, routine maintenance, runway 05-23 is closed until mid-summer. Runways undergo wear and tear when aircraft take off and land. This is similar to the wear and tear placed on roads due to traffic volume. Conducting routine maintenance on our runways maintains the

integrity of the surface and ensures our pilots are operating on the most structurally sound runway possible.

■ The Laurel Bay Marine Mart (7-Day Store) will be closed from Jan. 21 until the fall of this year for a renovation. Improvements will include a new floor layout and new interior.

■ Alcoholics Anonymous meetings are held at the Station Chapel

aboard MCAS Beaufort every Monday at 6 p.m. and Thursday at 10 a.m. Meetings are open to all service members, veterans, and civilians within the Tri-Command.

■ The photocopying of U.S. Government identification cards is a violation of Title 18, U.S. Code Part 1, Chapter 33, Section 701 and punishable by fine and imprisonment.

## Chaplain’s Corner The National Day of Prayer

By Chaplain Bill Holiman  
MCAS Command Chaplain

On Thursday May 5th the Chapel sponsored the local observance of the National Day of Prayer. You may have seen some emails from me, or perhaps if you have a church out in town you heard about it. Since this is an annual occurrence it might be good to talk about why we have a National Day of Prayer. The National Day of Prayer Committee describes their effort in these words:

*The National Day of Prayer is an annual observance held on the first Thursday of May, inviting people of all faiths to pray for our nation. It was created in 1952 by a joint resolution of the United States Congress and signed into law by President Harry S. Truman. Since its inception, this day has continually united Americans from all socio-economic, political, and ethnic backgrounds in prayer while also encouraging personal repentance and righteousness in the culture. The National Day of Prayer belongs to all Americans and is a day that transcends differences, bringing together citizens to celebrate our most beloved freedom; the freedom to humbly come before God and seek His guidance in prayer.*

This year President Obama and all 50 state governors issued proclamations regarding the event. The President’s proclamation was eight paragraphs long so I will not post it in its entirety; however it is interesting to see in his proclamation; a

strong commitment to religious liberty. He writes,

*In times of steady calm and extraordinary change alike, Americans of all walks of life have long turned to prayer to seek refuge, demonstrate gratitude, and discover peace. Sustaining us through great uncertainty and moments of sorrow, prayer allows us an outlet for introspection, and for expressing our hopes, desires, and fears. It offers strength in the face of hardship, and redemption when we falter. Our country was founded on the idea of religious freedom, and we have long upheld the belief that how we pray and whether we pray are matters reserved for an individual’s own conscience. On [the] National Day of Prayer, we rededicate ourselves to extending this freedom to all people.*

The United States has always tried to walk a fine line, on the one side we do not require any particular religious belief, but nor do we prohibit any belief either. The nation wants to extend religious freedom, but not require religion. We want to pray as a nation, but not require people to pray. And of course we recognize that while some people want to pray, they cannot pray with people who do not hold likeminded beliefs.

You may also have noticed that in all this discussion there is a lot of talk about prayer, but not so much about to whom we are praying. The Committee mentions God at the very end of their statement, the President not at all. That is in keeping with our national understanding of freedom. The government

has no theology. People have theology. We each hold beliefs, we share those with each other, and we campaign for them, but we cannot require them of others.

Most of the people involved in the National Day of Prayer will be some kind of Christian, normally Protestant, but not all will be. There are Jewish people involved, Muslim, and a wide variety of Eastern religious followers. People can pray whatever their other commitments may be. The government only asks that we pray, it does not tell us who we should pray to.

This year in Washington DC the event was begun with the blowing of a shofar by a Jewish rabbi, and then came a three hour program of speakers and prayers. Here on the base we had civilians and uniformed people lead the program. We had men and women, of a variety of ethnic backgrounds and paygrades. Our program was quite a bit shorter than the one in Washington. We went for forty-five minutes instead of three hours.

As America changes and becomes more diverse ethnically and religiously some of the things that older people take for granted will pass away. Older people are used to thinking of Americans as Protestants, Catholics and Jews. That is no longer the case. However, if we are willing to take the time to reach across barriers that divide us we may find that we can talk to each other and forge a new union. That does not mean that we abandon our own beliefs, or quit talking about them, but it does mean that we see ourselves as “one nation, under God, with liberty and justice for all.”

# Setting the Example: Living up to the NCO's Creed

Story by:  
Cpl. Samantha K. Foster  
Staff Writer

Achieving the rank of a Noncommissioned Officer in the Marine Corps is an important accomplishment for Marines. NCOs are responsible for setting the example for the junior Marines under us and to stay committed to excellence in all that we do, on and off duty.

When a Marine is promoted to NCO, E-4 or E-5, the Noncommissioned officer's creed is read during the ceremony. The motivational guideline is a rite of passage that reminds us of why we are NCOs.

We should set the proper example and stay committed to excellence as NCOs to make better Marines overall. Junior Marines follow what they are taught and will look up to you as their leader. The creed states "I will demand of myself all the energy, knowledge, and skills I possess, so that I can instill confidence in those I teach," meaning putting your all towards those under you.

In spring of 2004, 3rd Battalion, 7th Marine Regiment, were out on patrol when their unit was attacked. Cpl. Jason Dunham deliberately covered an enemy grenade with his body to save the Marines around him. Dunham's selfless act was a direct reflection of the NCO creed. He set the example, and stayed committed to excellence. By using himself as a shield, he showed the core values of the Marine Corps, honor, courage, and commitment. He showed honor by doing such a selfless act, courage by making the decision, and commitment by being so dedicated to his fellow Marines.

As an NCO, I look at Marines like Dunham to help mold myself into a better leader. Staying committed to the Marine Corps isn't just acts on the battlefield. Remaining in shape and giving your all during a normal work day is setting the example for others, not just for the Marines under you, but also for your peers.

Photo by Sgt. Dengrier M. Baez

A Marine Barracks Washington, D.C. parade staff marches during a noncommissioned officer Tuesday Sunset Parade at the Iwo Jima Memorial at Arlington, Va. The parade staff is typically composed of officers and staff noncommissioned officers but every year NCOs are given the opportunity to part of the staff for the guest of honor, the sergeant major of the Marine Corps.

I was pinned as an NCO this January, and it made me realize the importance of my new rank. I used to look at my NCOs and see how hard they worked as corporals and sergeants. I didn't think I would ever be as good as they were. I wanted to be as sharp and dedicated to the Marine Corps as my drill instructors. Their uniforms were always neat and crisp looking, and they could run off of nothing but motivation.

How do I be a leader? How would I ever

be as good as the Marines before me?

It's easier said than done to be the example. Of course not every Marine can be Dunham, but as NCOs, we can take what we learn from our illustrious line of predecessors, and teach it to the future generation of the Marine Corps.

Driving along the highway I've seen Marine Corps advertisements stating "we only take commitments", just as the NCO creed states, we should remain committed

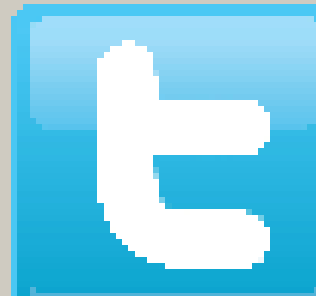

to excellence. As an NCO I should strive to be the best Marine I can be now more than ever. The junior Marines under me are hungry to take my spot once I move on with my career, so I must set the example now, showing them what is expected of a Marine, and teach them to have the same mentality as Dunham, or their motivated drill instructors from basic training, to be committed to excellence.

**READING**

continued from page 1

discover what is available for their enjoyment," said Rose Krauss, a librarian at the MCCS Library aboard MCAS Beaufort. "We hope to see all our regular patrons as well as new families to the area come and participate."

Events planned for the summer include card and board games, movie events, flag crafting, teen photo booth and an adult Saturday Bunco Game. Events will typically be scheduled on Saturdays throughout the summer and are geared to different age groups.

"Not only are the events fun for the whole family, it is a great way to meet new friends and connect," said Krauss.

All events will be held at the library aboard Fightertown with the first event scheduled for Saturday, June 11. All ages are welcome to help decorate the sidewalk with chalk and play outdoor games. The last event is scheduled for August 6.

The library staff will be handing out prizes at each event, including water bottles, book totes, and t-shirts. Registration begins May 23 through July 30. To learn more about the summer reading adventure at MCCS Library visit <http://www.mccs-sc.com/mil-fam/libraries>.

Photo by Sgt. Dengrier M. Baez

The Marine Corps Community Services Library begins a summer reading program aboard Marine Corps Air Station Beaufort June 6. The library staff is slated to hold a range of free activities for children, teens, and adults in the Fightertown community to encourage and support the reading program throughout the summer.

Calendar Time line for SRP 2016:

- Pre-registration: May 23
- Begins June 6 and runs through August 6
- All events to be held at MCAS Library location
- Kick off Event is scheduled for Saturday, June 11 at MCAS library beginning at 1400. Weather permitting, we will decorate the sidewalk and have outdoor games.
- June 25 1400-1630 Teen Board Games
- July 9 1400-1630 Children Family Flags
- July 23 1400-1630 Adult Bunco Game

## DECALS

continued from page 1

or the RAPIDGate credentials issued to vendors, suppliers, contractors and service providers.

This base decal policy change came after the Marine Corps reviewed installation access policies across the Corps in effort to ensure the highest levels of security Corpswide. In March 2015, DOD policy was changed to require 100 percent ID checks at all points of entry onto all Marine Corps installations, in addition to the standard security measures already-conducted. The ID check policy, which was already in effect on Marine Corps air stations due to airfield security requirements, is the best way to ensure only authorized personnel have access. The elimination of decals further emphasizes the requirement for personnel to provide appropriate ID at the gates.

Personnel who have been issued DOD decals are no longer required to keep them on their vehicles, as, according to

the new MARADMIN, "vehicle decals no longer serve a useful purpose; specifically, use of decals is incompatible with the requirement to conduct 100 percent identification card checks at all points of ingress at Marine Corps installations."

The MARADMIN also requires installations to conduct vehicle registration compliance checks during spot checks of suspicious vehicles, when conducting random antiterrorism measures, and during traffic stops. Those who fail to register vehicles aboard an installation shall be subject to citation, loss of driving privileges, impoundment and/or other adverse personnel or administrative actions. Unit leaders are required to validate compliance during holiday vehicle safety checks. Those personnel with temporary vehicle registration will still be issued visitors' validation credentials.

Additional details are available in the MARADMIN.

Courtesy Photo

Department of Defense personnel who live and work onboard Marine Corps Air Station Beaufort will no longer be issued vehicle decals that identify them as DOD personnel. The new policy was issued May 9 in Marine Administrative Message 245/16, which directed all Marine Corps installations to cease the issue of vehicle decals, effective immediately.

Photo by Sgt. Dengrier M. Baez

Students present their project at Robert E. Galer Elementary School May. 6. Galer and Charles F. Bolden Elementary-Middle School on Laurel Bay held their 2016 STEMposium. STEMposium is the culmination of the science, technology, engineering, and mathematics, or STEM, curriculum. The STEM program is designed to give students a basic understanding of the core subjects and encourage the pursuit of careers in those fields.

## STEMposium

continued from page 1

these subjects in everyday life.

“Students began working on their STEM projects in March,” said Susan Schmidt, a STEM facilitator for Bolden. “All students worked hard while learning about problem solving, cooperation, time management, and accountability—all real-world skills needed for the 21st century.”

At Bolden, projects were assigned by grade from sixth-eighth. The sixth-graders focus on NASA engineering, seventh-graders on computer scratch animation and the eight-graders on robotics, according to Schmidt.

“Every student was assigned to a STEM team where they had to collaborate together to design and create an original product, a marketing plan, write a technical paper, and presented to an audience,” said Schmidt.

One project centered on creating a model moon buggy for scientific research in space. Students designed and created a vehicle to accomplish certain tasks like sliding down a ramp and stopping at a designated distance. Marines from Marine Corps Air Station Beaufort Explosive Ordnance Disposal unit participated in the event as evaluators at Bolden.

“It’s impressive to see how the students were able to create these computer games that implement consequences,” said Sgt. Stephen Gomez, an EOD technician and STEM evaluator for Bolden. “It blows my mind to see how much detail went into creating these games and the presentations.”

At Galer the STEMposium was conducted through demonstrations and hands on activities. Four stations were set around the school—a straw rocket, scavenger hunt, life cycle of the butterfly, and a robotics station manned by Marines from the air station.

“We’re here today showing the students our robots and equipment we use to do our job,” said Staff Sgt. David Mead, an EOD technician with the air station and STEM demonstrator for Galer. “STEM is applied in all aspects of our job, mathematics to calculate distances, technology like the robots, and science to understand explosives.”

Students rotated through the stations getting a different perspective of the STEM program on each. At the straw rocket stations angles needed to be calculated prior to launching the air-propelled rockets, while at the scavenger the children got a chance to see gardens and birdhouses while being lecture by a peer. The life cycle of the butterfly featured a visual presentation of the many species of butterflies followed by a hands-on arts and crafts activity related to the ecosystem.

“While overwhelming and challenging at times, the STEM experience, for both students and teachers, has been successful and rewarding,” said Schmidt. According to the STEM mission statement, the program plays a vital role in educating the next generation of innovators and inventors. More information about STEM can be found at [www.stemedcoalition.org](http://www.stemedcoalition.org).

# 40th MCAS Iwakuni Friendship Day 2016 Air Show

## demonstrates U.S.-Japan alliance

Photo by Cpl. Nathan Wicks

Japanese locals view static displays of various aircraft from U.S. Marine Corps' III Marine Expeditionary Force and U.S. forces in Korea during Friendship Day at Marine Corps Air Station Iwakuni, Japan, May 5, 2016. MCAS Iwakuni's aviation friends with the Aircraft Owners and Pilots Association Japan offered displays, which included such classics as WACO biplanes.

Photo by Cpl. Nathan Wicks

Marine Corps Air Station Iwakuni hosted friendship day May 5, 2016. Since 1973, MCAS Iwakuni has conducted a single-day air show and open house specifically designed to foster positive relationships between the air station and our Japanese hosts. The event offers a culturally enriching experience that displays aviation performances, demonstrations and provides food and entertainment for guests of the largest single-day event in Iwakuni.

Yoshihide Muroya takes off as he races a Ferrari down the taxi way during the Marine Corps Air Station Iwakuni Friendship Day 2016 Air Show, May 5, 2016. As the first Asian pilot in the Red Bull Air Race World Championship in 2009, Yoshihide has helped raise the popularity of the sport in East Asia, particularly in his home country of Japan. This annual event showcases a variety of static displays, aviation performances and demonstrations, and provides food and entertainment for guests of the largest single-day event in Iwakuni.

Story by: Sgt. Antonio Rubio  
Marine Corps Air Station  
Iwakuni, Japan

Marine Corps Air Station Iwakuni opened its gates to approximately 200,000 guests for the 40th anniversary of the MCAS Iwakuni Friendship Day Air Show, May 5, 2016.

Since 1973, MCAS Iwakuni has conducted a single-day air show and open house specifically designed to foster positive relationships between the air station and Japan. This year is the 40th annual Friendship Day, offering a culturally enriching experience that displays the mutual support that the U.S. and Japan share.

This annual event showcases a variety of static displays, aviation performances and demonstrations, and provides food and entertainment for guests of the largest single-day event in Iwakuni. Guests attending the event will have the unique opportunity to experience a once-in-a-lifetime air show, according to Lt. Col. Robert E. Carlson, air show coordinator and station operations officer.

"Friendship Day is MCAS Iwakuni's largest annual community outreach event, and it extends beyond the local and regional area," said Carlson. "This year is even more significant due to it being the 40th anniversary event and being an opportunity for people to show their support and encouragement to those impacted by the earthquakes in Kyushu. It promises to be a truly unique air show and open house experience."

According to Col. Robert V. Boucher, commanding officer of MCAS Iwakuni, Friendship Day is an opportunity to display the solidarity with Japan and expand the relationship. This event is more than an

air show, it's an event that helps reaffirm our longstanding friendship with Japan, the same friendship where personnel and resources actively supported humanitarian assistance and disaster relief efforts.

"Friendship Day is about bringing the Iwakuni community and the station community together," said Boucher. "Today is for local Japanese to have a better appreciation for what the Marine Corps is and what we are about. I hope that this is an educational opportunity for everyone and that we get to know each other a little bit better."

Some performances included the Pemberton Aerosports Squirrel-Suit Jump, Whiskey Papa Skywriting, flight design where a Ferrari car challenges Yoshi Muroya, the air racer, to an air-ground race, the U.S. Army Golden Knights parachute team, and demonstrations from an AV-8B Harrier, MV-22B Osprey, the Marine Air-Ground Task Force and Pacific Air Forces' F-16 demonstration team.

The AV-8B Harrier and the MV-22 Osprey flight demonstration is one of the most sought-after aerial demonstrations offered by the U.S. military. For the first time, Friendship Day thrilled audience members with an air show demonstration that combined the maneuverability of the MV-22 Osprey and the power of the AV-8B Harrier. The same Marines and aircraft that train and deploy in support of real-world contingencies, such as the Kumamoto earthquake relief effort, performed at the air show. For this reason, only a handful of events receive this demonstration.

The MAGTF is the organizational structure of the Marine Corps and is made up of four elements: command, ground combat, aviation combat and combat service sup-

port. During the MAGTF demonstration, audiences witnessed close air support, simulated aerial refueling and extended capabilities of Marine Corps' assets that perform in expeditionary environments.

Located throughout the event were numerous U.S. and other aircraft static displays for visitors to take pictures with. Displays included: an F/A-18C/D Hornet, AV-8B Harriers, a MV-22B Osprey, and KC-130J Super Hercules from III Marine Expeditionary Force, and a KC-135 Stratotanker, E-3 Sentry, UH-1 Helicopter, F/A-18E Super Hornet, EA-18G Growler, and furthermore an A-10 Thunderbolt II and a F-16 Fighting Falcon from U.S. forces in Korea. Aircraft Owners and Pilots Association Japan also had static displays, which included classics such as WACO biplanes.

The air show also provided guests the opportunity to observe ground combat element capabilities within Marine Wing Support Squadron 171's heavy and utilities equipment, Expeditionary Field Kitchen and a wide variety of military vehicles. Marine tactical units from Okinawa, Japan, also served as a great addition and shared their proficiencies in tactics on the ground.

Friendship Day came to an end as aircraft descended and guests departed the air station. Although it's a one-day event, Friendship Day represents an alliance between two nations.

"The culturally enriching spirit of Friendship Day has been mutually beneficial for decades, and we do hope to have a joint-sponsored event next year," said Carlson. "Friendship Day represents the enduring bond between the U.S. and Japan, and we hope to continue that tradition next year."

The Marine Corps' first two Kaman K-MAX Helicopters arrived at Marine Corps Air Station Yuma, Ariz., Saturday, May 7, 2016. The K-MAX will be added to MCAS Yuma's already vast collection of military air assets, and will utilize the station's ranges to strengthen training, testing and operations across the Marine Corps.

## MCAS Yuma Welcomes K-MAX

Story by:  
Lance Cpl. Brendan King  
Marine Corps Air Station Yuma

The Marine Corps' first two Kaman K-MAX Helicopters arrived at Marine Corps Air Station Yuma, Ariz., May 7, 2016

The Kaman K-MAX Helicopter is very unique in many ways, such as its purpose and design. It is a helicopter with interlinking rotors whose primary mission is to provide cargo load operations with a maximum payload of 6,000 pounds.

"The most unique thing is this aircraft can fly itself," said Jerry McCawley, a Chief Pilot and Flight Safety Engineer with Lockheed Martin. "These two particular aircraft were over in Afghanistan for almost three years flying unhandled, and moving almost five million pounds of cargo, keeping numerous convoys off the road, preventing any roadside attacks."

The K-MAX will utilize MCAS Yuma's training ranges in both Arizona and California, and will soon have an integral part in testing and operations.

As MCAS Yuma continues expanding its scope of operations, the K-MAX will continue revolutionizing expeditionary Marine air-ground combat power in all environments.

"It's very resilient and can fly day or night," said McCawley. "It's out here in Yuma for future test and development with the Marines. It's great now, and it's only going to get better."

The K-MAX will be added to MCAS Yuma's already vast collection of military aircraft, strengthening training, testing and operations across the Marine Corps.
