

Integrated Training Area Management

STEWARDSHIP REPORT 2016

Contents

About this report

The Stewardship Report on the U.S. Army Europe Integrated Training Area Management program is published annually and reports performance and accomplishments for all program components. The report covers the period January 1 to December 31, 2016. For further information and an electronic version of this and our previous reports, visit our website or Facebook site:

7th Army Training Command – the U.S. Army's only Unified Training Command

Our Mission

The 7th Army Training Command provides dynamic training, preparing U.S., NATO and partner-nation forces to execute Unified Land Operations and contingency missions.

The 7th ATC is uniquely organized to support the U.S. Army's training requirements for units stationed in or forward deployed to Europe. As the Army's only unified training command, we have an organic ability to provide training from the individual Soldier to the Joint Task Force headquarters.

Location Matters

We are centrally located among the highest concentration of U.S. Allies and Partners in the world. By routinely training together with the 7th ATC, Allies and Partners build trust, develop interoperability and set the conditions for creating the strong coalitions that will guarantee peace and security in the region.

Exportable Training Anywhere, Anytime

The 7th ATC's robust and dynamic expeditionary training teams bring efficient and effective training solutions anywhere they are needed in Europe, Africa and beyond.

THE CROWN JEWELS OF U.S. ARMY EUROPE

- » Digital live-fire ranges, shoothouses and convoy training lanes
- » Small arms to major weapon systems (armor, artillery, aerial gunnery / close air support)
- » Seamless integration of live, virtual constructive training
- » Tailored to the needs of U.S., NATO and partner-nation forces

- » Replicated towns and role-players to increase training realism
- » World-class Opposing Force
- » Veteran Observer Coach-Trainers
- » Cutting-edge After-Action Review capabilities

AT
THE CORE OF A
STRONG EUROPE
ARE THE BUILDING
BLOCKS OF
TRAINING

Exercise Case Study

Anakonda 2016 brought together more than 31,000 service members from 24 NATO and partner nations to train, exercise and integrate Polish national command and force structures into an allied, joint and multinational environment (see page 18).

Letter from the Commander

I am pleased to present the annual Stewardship Report on the U.S. Army Europe (USAREUR) Integrated Training Area Management (ITAM) program for 2016.

Headquartered in Grafenwoehr, Germany, the 7th Army Training Command (7th ATC) is the U.S. Army's largest overseas training command. By integrating a unified training command with sound land management techniques, 7th ATC is able to provide realistic and relevant training to U.S. Army, Joint Service, NATO and allied units and leaders.

The ITAM program is responsible for providing sustainable and balanced stewardship of USAREUR's training land platform. This stewardship is possible through both the substantial investment the U.S. Army has made in the training land assets and the outstanding support 7th ATC receives from the many host nation and multinational stakeholders involved in training area management.

ITAM has proven that managing land for realistic training and for biodiverse ecosystems are not mutually exclusive principles. ITAM has set the model for achieving sustainability by following proven best management practices and using innovative technologies.

7th ATC's commitment to stewardship remains steadfast. The Command's intention is to provide a candid assessment of our achievements and challenges. We are always pleased to receive any feedback; the ITAM contact details can be found on the contents page.

**Army Strong,
Strong Europe!**

Brigadier General, U.S. Army
Commanding

“ We have to assure our partners. We have to deter Russia in the East, and that’s really the change that we are making. It’s the relationship with them, the posturing of our forces, and the training that we do. ”

U.S. ARMY GEN. CURTIS SCAPARROTTI
NATO’S SUPREME ALLIED COMMANDER FOR EUROPE
AND HEAD OF U.S. EUROPEAN COMMAND

Photo: Strong Europe Tank Challenge, at the 7th ATC Grafenwoehr Training Area, Germany, May 11, 2016. The competition is designed to foster military partnership while promoting NATO interoperability.

U.S. Army Europe (USAREUR)

USAREUR Mission

USAREUR trains and leads Army Forces in support of U.S. European Command and Headquarters, Department of the Army by:

- » Training and preparing full spectrum capable forces for global employment
- » Strengthening alliances and building partner capacity and capability
- » Providing Army Service Component Command and Title 10 support
- » Continually seeking to improve the readiness and quality of life of our Soldiers, Army Families and Civilian workforce

[facebook.com/USArmyEurope](https://www.facebook.com/USArmyEurope)
twitter.com/USArmyEurope

7th Army Training Command (7th ATC)

7th ATC Mission

Headquartered in Grafenwoehr, Germany, the 7th ATC is the U.S. Army’s largest overseas training command. Our combat maneuver and simulation centers, live-fire ranges, classrooms and facilities provide realistic, tailor-made training solutions to U.S., NATO and partner-nation units and leaders.

7th ATC provides dynamic training, preparing forces to execute Unified Land Operations and contingencies in support of the Combatant Commands, NATO, and other national requirements. 7th ATC is a unique institution, efficiently and effectively providing innovative multinational training solutions for an uncertain future.

We are centrally located among the highest concentration of U.S. allies and partners in the world.

[facebook.com/7thATC](https://www.facebook.com/7thATC)
twitter.com/7thATC

Sustainable Range Program (SRP)

The ITAM program and the Range and Training Land Program (RTLTP) comprise the U.S. Army’s SRP. The mission of the SRP is to maximize the capability, availability and accessibility of ranges and training land to support doctrinal training, mobilization and deployments.

[facebook.com/USAREUR.SRP](https://www.facebook.com/USAREUR.SRP)

Training Support Activity Europe (TSAE)

TSAE identifies, acquires, manages and provides state-of-the-art home station, rotational and expeditionary training support and visual information capability as directed by USAREUR to prepare the 7th ATC forces to win in any operating environment, and serves as the 7th ATC point of contact for training support.

[facebook.com/TrainingSupportActivityEurope](https://www.facebook.com/TrainingSupportActivityEurope)

Integrated Training Area Management (ITAM)

ITAM is a management and decision-making process that integrates training and other mission requirements for land use with sound natural resource management practices.

ITAM is a core program under the Army’s Sustainable Range Program under the direction of the Chief, Training Support Systems Division, Office of the Deputy Chief of Staff, G-3/5/7.

ITAM develops methods to maintain natural environments that are resilient and resistant to military use; provides capabilities to establish land condition monitoring on training lands (Range and Training Land Assessment); provides an awareness program for land users (Sustainable Range Awareness); provides means to apply training loads to land capabilities, resulting in land management that avoids non-compliance with environmental laws that stop training (Training Requirement Integration and Geographic Information System); and sustains the Army’s live training capability (Land Rehabilitation and Maintenance).

ITAM Mission

Maximize the capability, availability and accessibility of training land to support doctrinal training, mobilization and deployments.

2016 Priorities

- » Integrated management of a training land platform capable of supporting a trained and ready force.
- » Enhanced multinational interoperability / standardization and partnership capacity.
- » Authoritative information proactively disseminated to training planners.

USAREUR ITAM is proud to support:

Training Capability Density

USAREUR units have an expansive training capability available throughout Europe and Africa. The Tap In website provides training planners an authoritative source for answering their own RFIs.

Tap In is USAREUR's most powerful portal for training planners.

Tap In is a NIPR CAC website similar to Google Maps. Users can search training facilities throughout EUCOM and AFRICOM, view planning documents (e.g. SOPs, trip reports, SDZ maps) and query RFMSS Scheduling data.

Visit: <https://armyrangemapper.eur.army.mil/tapin> or search "7ATC Tap In"

Training Capability

High density

Low density

Training Area Capabilities

ITAM has training capabilities documented for over 400 sites throughout Europe and Africa. This is a selection of sites that are available on Tap In and the new Training Area Capabilities Wheel.

Training Area Case Study

Drawsko Pomorskie Training Area

Drawsko Pomorskie Training Area in Poland provides an excellent case study of the detailed physical, climatological, environmental and military training capability data included in ITAM's robust geodatabases. Training aids, such as Tap In, provide a quick source for military training planners to access this valuable information.

Project Catalog

USAREUR ITAM executed 18 high-impact projects in 2016. ITAM projects ensure the availability, accessibility and capability of USAREUR's training land platform remain maximized.

Department of the Army and U.S. Army Europe continued to provide strong funding support to the ITAM program in fiscal year (FY) 2016. This funding provides a critical role in sustaining and enhancing the USAREUR training land platform.

① Erosion Control Repair and Maintenance
Project included maintenance of existing erosion control infrastructure and conditional surveys of all settling basins in the training area so that future maintenance work could be prioritized. Tasks also included routine maintenance on 10-15 settling basins and their associated infrastructure.

② Maneuver Area Reactivation - Maneuver Trails and Open Maneuver Area Repair and Maintenance
5-10 km of maneuver trails and approximately 30 ha of open maneuver area were reactivated by opening access to training lands. An additional 13 ha of open maneuver area was reactivated through the removal of encroaching woody vegetation. Open areas impacted by trenching activities were repaired by filling in low areas, compacting loose soil and smoothing/reseeding surfaces.

③ Land Cover Reconfiguration Maintenance
Maintenance activities occurred in the areas near UO Schwend and UO Mud Hut where terrain was reconfigured to support training. An existing bridging practice area was repaired and reactivated.

④ Repair Training Damages
Project repaired damages along 2 km of maneuver trail and to basins, dams and other erosion control infrastructure that resulted from heavy maneuver training activities.

⑤ Maneuver Corridor Repair
Work included localized repair on maneuver trails near FOB West, CP20 and CP35. Repairs included leveling damaged areas and using gravel in low areas to stabilize and harden the trail surface and increase vehicle clearance. In addition, water turnouts, ditches, rock dams and rock low water crossings were installed to ensure adequate water drainage.

⑥ Range and Training Land Assessment Monitoring
Project included multiple surveys and assessments at Grafenwoehr and JMRC Hohenfels. The surveys provide information about the overall land condition and trends found across the installations.

Funding

- Land Rehabilitation and Maintenance
- Range and Training Land Assessment
- Geographic Information System
- Sustainable Range Awareness

New Command Policy Permitting Use of Natural Vegetation for Camouflage

Camouflage and concealment is the use of materials and techniques to hide, blend, disguise, or disrupt the appearance of military targets and/or their backgrounds. USAREUR units can now use natural vegetation for camouflage, further enabling a realistic "train as we fight" environment.

Project Catalog

Grafenwoehr

① Bulk Materials

Land repair and maintenance bulk materials (e.g. stakes, top soil, seed and gravel) and signage were procured in support of tasks executed by in-house Directorate of Public Works Building and Grounds resources on maneuver land.

② Historic Forest Mapping Update

This is a continuation of over 70 years of forest change analysis over Grafenwoehr Training Area. This year's update documents trends since 2010.

USAREUR

③ Tap In Sustainment

Ensured sustainment of Tap In functionality, security and performance. Project also incorporated Command requested functionality.

④ Aerial Imagery

Project procured 2016 aerial orthoimagery (0.20 m true color) of Pocek Training Area, Slovenia, and select LTAs in order to update USAREUR GIS repository.

⑤ Comprehensive Geographic Information System

Project included procurement of satellite imagery, land repair mapping surveys and off limit area mapping surveys. Survey and imagery primarily covered Atlantic Resolve training sites.

⑥ Kiosk Sustainment

Provided sustainment for the seven ITAM Mapping / TSAE kiosks located at various USAREUR Training Support Centers. Sustainment included maintenance support and interface updates.

Oberdachstetten

⑦ Maintenance and Extension of Troop Marching Trail

Work included repair, maintenance and extension of the Troop Marching Trail in order to reduce risk of Soldier injury during movement between ranges and training assets.

Stuttgart

⑧ Trail Reconfiguration, Erosion / Drainage Control and Vegetation Clearance

Over 500 m of trail leading into the northern LTA / Land Nav Course and 155 m of trail leading into the north-central LTA were repaired. Project included installation of culverts to modernize / sustain drainage and brush / vegetation encroachment cutting throughout the Boeblingen LTA.

Kaiserslautern

⑨ Vegetation Clearance

Project cleared and mulched over 500 m² of encroaching vegetation in the Breitenwald LTA.

Baumholder

⑩ Water Purification Site Modernization

Project repaired and enhanced 550 m of maneuver trail and stabilized a 300 m² staging site in the Baumholder LTA.

Italy

⑪ Clear Obstacles from Maniago LTA Maneuver Area

Approximately 5 ha of obstacles adjacent to UO site were cleared in order to open maneuver space and reduce safety risk.

	NATO Environmental Protection Working Group	5 - 9 December	Brussels, Belgium

Ukraine Mapping Support

Yavoriv, Ukraine
15 - 19 February 2016

ITAM GIS Analyst traveled to Yavoriv, Ukraine to support Range Ops, Joint Multinational Training Group - Ukraine with GPS / GIS mapping and training.

USAREUR SRP Workshop

Grafenwoehr, Germany
18 - 20 April 2016

USAREUR SRP's cornerstone event for sharing best practices and networking with multinational partners.

Lithuania Theater Security Cooperation

Vilnius, Lithuania
25 - 29 April 2016

The purpose of event was to continue bi-lateral relationship development with MoD and Lithuanian military contacts with focus on environmental matters tied to military training ranges in Lithuania and in support of U.S.-funded construction in country.

U.S. - Italy Sustainable Training Area Management Planning Workshop

Udine, Italy
12 - 16 September 2016

The Workshop focused on the importance of the balance between military training requirements and environmental protection. The event served as a prelude to a comprehensive Workshop to take place in June 2017 in Italy.

Austrian Autonomous Tractor Demonstration

JMRC Hohenfels, Germany
9 - 10 November 2016

The Austrian Armed Forces Armaments and Defence Technology Agency (ADTA) visited the Joint Multinational Readiness Center Hohenfels to provide an on-site demonstration of vegetation removal in UXO areas using an autonomous tractor.

Combating vegetation encroachment in JMRC maneuver areas poses a significant challenge to training land management due to high UXO densities. The autonomous tractor developed by the Austrian Armed Forces is designed specifically for the management of open land in UXO areas, supporting future reopening of maneuver land and drop zones.

NATO Standardization

ITAM provided significant support to the NATO School and multiple NATO Working Groups and Panels. 2016 highlights include the promulgation of NATO Standardized Agreements (STANAGs) which will enhance standardization and sharing of sustainable training land management best practices.

STANAG 2594 Best Environmental Protection Practices for Sustainability of Military Training Areas

Environmental protection functional areas:

Fire

Flora

Habitats / Ecosystems

Soils

Fauna

GIS / Environmental Training

Noise and Vibrations

Water and Wetlands

STANAG 3833 Symbols for Land Forces Training Area Maps

A selection of environmental protection feature symbology:

Temporarily Closed to Military Personnel and Vehicles

Environmental Protection Site

Contaminated Soil Collection Site

POL Supply Point / Refueling Pad

Fire Protection Strip

Hazardous Materials Collection Site

Waste Collection Point

Dig Site

Biodiversity

Military training areas provide high-value ecological habitat for a multitude of protected flora and fauna species. Military environmental protection experts work in close partnership with governmental and non-governmental stakeholders to ensure integrated training area management.

The double-sided Nature's Defense poster (available in the back cover of this report) displays a selection of protected flora and fauna that exist in U.S. and partner nation military training areas.

Lesser Horseshoe Bat, Monte Carpegna

Please contact ITAM for additional posters (see contents page).

Exercise Assessments (Drones)

ITAM provides the Command immediate and detailed training land assessments following each major training exercise.

Standardized ITAM assessments document exercise environmental impacts, mitigation required and potential concerns for training planners.

ITAM is leveraging Drone technology in order to improve accuracy and coverage of these surveys. Drone mounted true color and color infrared cameras can identify and assess training area impacts and quantify erosion and vegetation damage.

Example of an ITAM Post-Exercise Training Land Assessment

Drone flight path over CP 46,
JMRC Hohenfels Training Area,
conducting post-exercise training
land assessment data capture.

Drone sensors capture both true color and color infrared imagery, allowing detailed land cover mapping.

Exercise Saber Junction 16

Check Point 46

Land cover mapping before and after an exercise depicts environmental impacts and aids in prioritizing land repair projects.

2017 Initiatives

Innovation

Tap In will continue to be the “go-to” for training planners. 2017 priorities include development of new Tap In geospatial data for the Black Sea Region, the Balkans and on NATO’s southern flank. Tap In outreach to units and training forums will remain aggressive with the intent of adding USAREUR Exercises as a data stream.

Enhance the Training Land Platform

Through partnerships with our stakeholders, enhancement of the training land platform throughout the USAREUR AOR remains a core ITAM objective for 2017. Cost efficient and effective land reconfiguration projects coupled with rapid land assessment technology, including the use of drones, will assist in maximizing the availability, accessibility and capability of USAREUR’s training land assets.

Multinational Engagement

ITAM will continue to provide close support to USAREUR Exercises in 2017, with focus on Exercise Saber Guardian and the Atlantic Resolve area of operations. ITAM will continue to provide subject matter expertise to NATO Working Groups and 10-15 U.S. European Command (EUCOM) engagements funded by the Defense Environmental International Cooperation program through the Office of the Secretary of Defense.

Sample 2017 EUCOM Environmental Security Engagements

- » Cold Region Environmental Protection Advisory Working Groups
- » Balkans Environmental Considerations in Military Operations Regional Workshop (Montenegro)
- » Natura 2000 & Range Management (Italy)
- » Sustainable Range Management Bilateral Events (Eastern Europe)
- » Sustainable Range Management Regional Events (Balkans and SE Europe)
- » Sustainable Range Management Bilateral Events (Baltics)

“ The environment of the future is a very complex one that will change very quickly and most likely be multinational. So the Army must have multiple options, in multiple domains, with multiple allies and partners. ”

LT. GEN. BEN HODGES
U.S. ARMY EUROPE COMMANDING GENERAL
