## Army Chief of Staff visits ANAD

from Staff Reports

ANAD Public Affairs

U.S. Army Chief of Staff General Mark Milley toured Anniston Army Depot April 17.

“Depots like Anniston provide an incredible capability to our Army that is absolutely critical to sustain,” Milley said. “From the skilled artisans at Anniston, to the scientists and engineers at AMRDEC, Army Materiel Command’s vast and diverse mission cannot be understated or replicated.”

Milley toured the Combat Vehicle Repair Facility, viewing the work performed on the M1 Abrams tank, Stryker repair and overhaul programs, the M113 family of vehicles and others.

He also was able to view work performed for Stryker lethality

upgrades at General Dynamics Land Systems facilities on the installation.

“While far from the front lines, both Redstone Arsenal and Anniston Army Depot are directly linked to the battlefield,” Milley said.

Accompanying Milley on the tour were Cong. Mike Rogers from Alabama’s third Congressional District; Gen. Gus Perna, commanding general for the Army Materiel Command; Lt. Gen. Larry Wyche, AMC’s deputy commanding general; Lt. Gen. John Murray, deputy chief of staff G-8; Lt. Gen. Aundre Piggee, deputy chief of staff G-4; and Maj. Gen. James Richardson, director, Army Quadrennial Defense Review Office, Office of the Deputy Chief of Staff, G-8; among others.

# Lessons learned from a recent EPA inspection

by Kevin Guy

ANAD DRK

Photo by Jennifer Bacchus

**Greg Stephens ensures a drum at the Hazardous Waste Storage Facility is closed per the guidelines of the Resource Conservation and Recovery Act.**

Risk Management's production support team and other staff conduct internal audits and inspections, there will be communication of issues to the entire workforce of systemic issues being found.

DRK's team is working diligently to not only help keep ANAD in compliance through inspections, but through training as well.

Currently, the production support team is conducting annual Resource Conservation and Recovery Act training for a major portion of our workforce.

In addition to this training, employees will receive communication of environmental issues and the corrective actions. These will be disseminated to the workforce through environmental bulletins.

Supervisors should print bulletins and brief employees on them during six-minute huddles.

The production support team is available to assist you with environmental concerns you may have in your work area. For assistance, call Ext. 7475 or 6700.

ment of the Army, or Anniston Army Depot.

TRACKS is published biweekly using desktop publishing on recycled paper and on the Internet by the Commander, Anniston Army Depot.

The editorial office is located in the Abrams Building, Room 358, telephone 256-235-6281 (DSN prefix 571) or FAX 256-235-4695. TRACKS invites

# Spring cleaning safety tips

from Staff Reports

ANAD Safety Office

For many, Spring is the time of year when we engage in the annual ritual of spring cleaning. Follow these simple tips to keep this time safe for everyone.

## Fire Safety Tips

Spring is a great time to clean your house and throw away unwanted items. It's also a great time to check for potential fire hazards.

- Check your house for stored papers or other combustible materials you don't need.
- Make sure you clean your grill and check it for gas leaks, breaks and other wear and tear.
- Check your smoke alarm and change out old batteries.

## General Cleaning Tips

While spring cleaning is a rewarding activity, it can also be a risky one. Falls, cuts and electrical shock are just some of the injuries which can occur.

- Beware of electrical hazards. Keep moisture away from electrical appliances and outlets. Don't spray cleaning products directly onto light switches.
- Slips, trips and falls are common household accidents and they can occur easily when the house is in disarray during spring cleaning. Keep traffic areas clear of buckets, cords, boxes and other obstacles. Clean up spills promptly and move carefully on damp surfaces.
- Ladders are involved in many serious injuries at home. Make sure the ladder is in good condition. Place the base of the ladder on a solid, even surface. Do not stand on the top few rungs of a ladder. Do not lean away from the ladder because this can cause it to tip over. Always watch out for overhead electrical hazards.

• Use proper lifting techniques when moving bags of potting soil, fertilizer, mulch, decorative stone

or paving blocks. Plan how you will pick something up and where you will place it. Get help if necessary. Use the strength in your legs, not your back, to pick up a load. Bend your knees and keep the load close to your body.

## Household Chemicals

Many household chemicals and paints can present hazards to you and your family, particularly children.

Ensure you take precautions to keep everyone safe.

- Close lids to chemicals and paints when not in use. Ensure they are always put safely away when the work is finished.
- Never leave children unsupervised when paints and chemicals are in use.
- Pay particular attention to flammability cautions and ventilation requirements.

While you are enjoying the beautiful weather and dusting off the cobwebs of winter, remember to take your on-the-job safety awareness with you.

Keon Woods, left, and Tommy Roberts work on repairing a headlight at the 28-volt table, which is used to teach electrical troubleshooting to the Pathways students.

## Students assist production shops

by Jennifer Bacchus

ANAD PAO

With almost eight months worth of training complete and graduation approaching, the students of Anniston Army Depot's High School Pathways program are ready for challenges to test the skills they have learned.

That's why, whenever Sam Ramsey, the electronics instructor for the program, sees an item in a production shop destined for the scrap pile, due to the time it would take to be repaired, he requisitions it.

Ramsey, who works overtime in the electronics area, recently saw an antenna for a Stryker which had been red-tagged and was unlikely to be repaired.

He requested, and was granted the ability to take the antenna to Pathways as a training aid.

Though the original equipment manufacturer wouldn't provide the plans for the antenna, that wasn't a problem for Ramsey's students.

Keon Woods and Tommy Roberts were given the part and asked simply to take it apart and see if they could determine what was wrong.

"I didn't look over their shoulder or anything," said Ramsey. "I just gave it to them and asked them to use their training to figure it out."

Not only was the duo able to fix the part,

they set up a testing tool to check the antenna's hydraulics once it was repaired.

"When it was brought in, we thought it would be a challenge," said Roberts. However, he and his classmate quickly located the issue - gears which were out of place.

The repair took Woods and Roberts about 30 minutes to complete. Testing took a little longer, but the antenna was quickly verified as operational and sent back to the production floor.

Woods and Roberts are both set to graduate from the High School Pathways program this year and plan to continue their electronics education through Pathways internships, with the ultimate goal of working for the depot.

Roberts, a senior at Ranburne High School gained interest in the Pathways program through his school counselor. He enjoys the challenges he sees in the field of electronics.

Woods learned about the program through his cousin, who works at the depot. The Lincoln High senior has always wanted to work at ANAD.

"I like that electronics is hands-on. You have to look for a problem and fix it," he said.

There are currently five students in the Pathways electronics program. They periodically work on equipment from the production shops.

## Recycling: A cooperative effort

by Jennifer Bacchus

ANAD PAO

You've just finished lunch - a nice, juicy hamburger and a soda - and sitting before you is your paper plate, paper napkin and an aluminum can. All recyclable, right?

Yes and no.

The paper plate and napkin, according to Earth911.com, a subsidiary of Quest Resource Holding Corporation, are a problem.

"Food is one of the worst contaminants in the paper recycling process," said the website. "When paper products are recycled, they are mixed with water and turned into a slurry. Since we all know water and oil don't mix, the issue is clear."

The aluminum can, however, is highly recyclable. Just remember to rinse it out and then place it in the correct bin.

Anniston Army Depot's Recycling Center has recently seen an increase in employees who place items in the wrong bin or who place food trash in the recycling bin.

"Cardboard is being commingled in the containers. Spit cans are

in the containers. It gets gross at times," said La'Noah Ealy, the Recycling Center's business manager.

Ealy provided the following tips for remembering what to recycle:

**Cardboard** - Needs to be separated from other paper products.

**Newspapers and Magazines** - should be placed in a separate bag which is then placed beside the recycling bins.

**Binders** - remove all the paper, separate colored paper from white paper, place the white paper in its bin. Colored paper should be placed in a bin designated for mixed paper or in a bag beside the recycling bins.

**Shredded paper** - should be placed in a closed plastic bag inside the paper recycling bin. This paper cannot be recycled with the whole sheets of paper.

"If we get it right at the initial point, it will save time throughout the recycling process," said Ealy.

If work areas need additional bins to accommodate the volume of recyclable material or if additional bins are needed for specific types of recyclable material, contact the Recycling Center at Ext. 6838.

Photo by Jennifer Bacchus

Suzanne Peoples shows binders still containing paper of various colors in a recycling bin. Separating recyclables properly - binders, white paper and colored paper - saves time and money.

LAW DAY IS MAY 1

# 2017 Law Day honors 14th Amendment

by Mickey Starling

ANAD Legal Office

“All persons born or naturalized in the United States and subject to the jurisdiction thereof, are citizens of the United States and the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges and immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.” (U.S. Constitution, 14th Amendment, 1868)

In the game show Family Feud, host Steve Harvey challenges opposing families to guess the most popular answer to a question. If we polled our readers on the question, “what is your favorite amendment to the U.S. Constitution,” what do you think would be the most popular answer?

For many, it might be the First Amendment and its protections of the freedoms of speech, press, religion and assembly.

Others would say the Second Amendment and the right to bear arms.

Or, maybe it would be the Fifth Amendment with its rights against self-incrimination, double jeopardy and protection of due process.

It certainly wouldn't be the 16th Amendment with its income tax provision.

Another amendment that would not likely get many votes is the 14th Amendment. Yet, the 14th Amendment may be the most important of them all.

The 14th Amendment passed shortly after the Civil War to protect the rights of the newly freed slaves.

To do that, it extended the privileges and immunities of national citizenship to the states and prevents any state from abridging those protections.

Some of those privileges include the right to travel, the right to engage in foreign and interstate commerce, and the right to vote in primaries and general elections for President, senators and the members of Congress.

Still, the main body of protection for U.S. citizens is found in the 14th Amendment's final two clauses.

The “due process” clause of the 14th Amendment has been used by the U.S. Supreme Court

Courtesy image

**The “due process” clause of the 14th Amendment has been used by the U. S. Supreme Court to extend the protections of nearly all of the first eight amendments to the states.**

to extend the protections of nearly all of the first eight amendments to the states.

This process ensures individual states can't abridge free speech or assembly, can't deny the right to counsel in a criminal case or suspend the protection against cruel and unusual punishment.

This incorporation process has gone on for over a century as the U.S. Supreme Court has used individual cases to prevent states from denying certain basic rights guaranteed in the Bill of Rights.

The final clause of the amendment prohibits the states from denying the equal protection of the laws to citizens within its jurisdiction.

This clause was the basis for many of the important civil rights decisions of the 1950s and 60s.

The clause is also the basis for epic legislation like the Civil Rights Act of 1964, the Voting Rights Act of 1965 and the Americans with Disabilities Act.

It is fitting that the 14th Amendment is honored this year, the 51st anniversary of Congress' joint resolution to set aside May 1 as Law Day, the day to celebrate our national ideals of liberty, justice and equality under the law.

## Counseling, support available for parents

by A. M. Kurta

Army Personnel and Readiness

Children are our future and the Department of Defense considers their well-being paramount.

National Child Abuse Prevention Month provides a dedicated time to focus on the needs of children and parents, promote awareness of available support services and highlight our corporate and individual responsibilities to provide safe and healthy environments for children.

The department is proud of its long-standing early intervention programs, such as the Family Advocacy Program, which promotes positive parenting to prevent child abuse and neglect.

However, slowly climbing rates of abuse and neglect over the past five years remain a concern.

The department is leveraging technology and will soon launch an awareness campaign to equip parents with online tools and tips to enhance parenting skills and boost child safety and supervision.

Parenting is one of life's most rewarding and challenging com-

mitments. Military and civilian families are afforded unique opportunities, but also face significant challenges.

We want parents to be aware of counseling, support and related resources that help reduce stress, build parenting knowledge and skills, and support family goals.

Installation-level Family Advocacy Programs provide local and online services tailored to individual family needs and circumstances.

Children thrive in safe, stable and nurturing homes.

Early identification of possible maltreatment allows for professional assessment and supportive intervention to prevent further harm.

Suspected child abuse or neglect must be promptly reported to the installation Family Advocacy Program at 256-235-7971 or the depot's 24-hour hotline, 256-624-8510.

You may also report child abuse and neglect by calling the Department of Human Resources at 256-240-2021, or the Child-help National Child Abuse Hotline, 1-800-4-A-CHILD (1-800-422-4453).

Photo by Jennifer Bacchus

**Pinwheels located along Quintard Ave. in Anniston were placed there by the Calhoun-Cleburne Children's Center to raise awareness of child abuse.**

# Thanking those who give their time

## ANAD volunteers contribute more than 2,000 hours for MWR programs

by Jennifer Bacchus

ANAD PAO

To ensure the success of its many community programs - from the Making Tracks 5K race to the Wounded Warrior Hunt and the Christmas Cheer program - Anniston Army Depot relies on volunteers.

On April 13, the 92 volunteers who gave 2,390 hours of their time for these and other programs, were honored at the DeSoto Pastime Center.

"Each of you are critical to building a strong community at Anniston," said Amanda Mullinax, the depot's volunteer coordinator, as she addressed the group.

Of the 92 honorees, 22 have volunteered to assist with depot programs for at least five years and more than 50 had volunteered at least two years.

Col. Martine Kidd, in her comments to the crowd, said volunteering, in a sense keeps giving.

"Volunteers inspire others around them to give of themselves," she said.

Kidd applauded each individual's desire to help Anniston Army Depot and its surrounding communities by reaching a hand out to those in need who may not be able to help themselves.

"No matter where you are in life, we are all human beings," said Kidd. "From time to time, we all need to lean on each other.

Four of the volunteers received special honors during the ceremony.

Carla Moore was named the Army Volunteer Corps Volunteer of the Year for the installation.

The Army Substance Abuse Program Christmas Cheer Volunteer of the Year for ANAD was Jeanette Baxter.

Dennis King was awarded the Family and MWR Program Volunteer of the Year award for the depot.

The Army Community Service Volunteer of the Year for ANAD was Bernadette Isaac.

### Volunteering by the numbers:

**1974:** Year the first U.S. Volunteer Appreciation Week was established by President Richard Nixon.

**1985:** Year the Army Community Service implemented the Installation Volunteer Coordinator Program. The Army Volunteer Corps began in 2002.

**2.1 million:** Number of volunteer hours logged in 2015 by Army volunteers.

**\$53 million:** The budget extension, per Army OneSource's Volunteer Management Information System, which resulted from the approximately 2.1 million volunteer hours served in 2015.

**\$56,308.40:** The economic impact of the volunteers who give their time toward Morale, Welfare and Recreation events at Anniston Army Depot.

Photos by Mark Cleghorn

Carla Moore is Anniston Army Depot's Army Volunteer Corps Volunteer of the Year. Moore assisted with ACS administrative duties and Christmas Cheer - logging 170 volunteer hours.

Dennis King was awarded the Family and MWR Program Volunteer of the Year award for Anniston Army Depot. King had 300 volunteer hours in 2016 at the Skills Development Center, assisting with other MWR facilities and setting up for various events.

Jeanette Baxter, who is a key to the success of Anniston Army Depot's Christmas Cheer program each December, received the Army Substance Abuse Program Christmas Cheer Volunteer of the Year award during the April 13 Volunteer Recognition Ceremony.

Anniston Army Depot's Army Community Service Volunteer of the Year is Bernadette Isaac. Isaac volunteered with all MWR events in 2016 - from the Making Tracks 5K and Wounded Warrior Hunt to Christmas Cheer. She gave over 150 hours to ACS.

# Platelet donation

## Frequently asked questions and tips

from Staff Reports

American Red Cross

### What is a platelet donation?

During a platelet donation, your blood is collected by a cell-separating machine.

The platelets are removed and the rest of your blood components are returned to you.

You will be able to provide in one platelet donation what would normally be collected from up to five whole blood donations.

### Why are platelet donations needed?

Platelets are routinely needed to support patient surgeries, cancer patients, blood disorders and organ transplants.

With a shelf life of only five days to transfuse to patients, there is a constant need for platelets in your community and around the country.

### Who is eligible?

Individuals who are at least 17 years of age (16 with parental permission in some states), meet weight and height requirements (110 pounds or more, depending on their height) and are in generally good health may be eligible to donate platelets.

Donors must not have donated whole blood in the last three days or platelets in the last seven days.

### How do I prepare for my donation?

Donors cannot take aspirin or medications containing aspirin within two full calendar days prior to a platelet donation (three full calendar days in the state of New York).

Consume plenty of calcium-rich foods and beverages for a few days prior to your donation.

It's important to get a good night's rest, drink plenty of fluids (avoid caffeine) and eat a small snack before donating.

Also, remember to wear a shirt that can be raised above your elbow.

### How often can I donate platelets?

Platelets may be donated every seven days, up to 24 times a year. Imagine the impact if every platelet donor gave at least 10 times a year.

### How long does it take?

The entire process may take two to three hours to ensure a full donation.

This is because it takes time to separate and collect the platelets from the other blood components.

Donors are encouraged to relax during the donation – videos, TV and wireless internet are available in some locations.

When you schedule an appointment to donate platelets, the Red Cross is reserving a chair just for you and hospital patients in need are counting on your donation. If you are unable to make your appointment, please notify Kelvin Burruss or Lindia Hayes at least 24 hours in advance.

For more information or to schedule your appointment to donate platelets, email or call: Burruss at Ext. 5814 or Hayes at Ext. 7626.

# Prescription Take-Back Day scheduled at ANAD

from Staff Reports

Army Substance Abuse Prevention

Do you have out-of-date or unused medication in your home?

Prescription Take-Back Day on April 27 gives employees at Anniston Army Depot the chance to clean out their medicine cabinets and properly dispose of medication.

This prevents the medication from falling into the hands of children who may not understand the side effects of a particular drug, while also protecting wildlife from potential poisoning if the drugs are flushed.

To participate, mark through any identifying information on the medication container and bring it to one of the ANAD drop-off points.

Prescription and over the counter medications are ac-

cepted. Drop-off is available at the Physical Fitness Center from 10 a.m.-noon and at the Nichols Cardio Center from 12:30 p.m.-

2:30 p.m.

For additional information, contact Kelvin Burruss at Ext. 5814.

## LIGHTER SIDE OF THE TRACKS

Comic by Nathan Coburn

This Earth Day, don't be a "Polluting Paul." We work near our homes. Environmental awareness doesn't just save the planet, it saves the playground where your children play. Call Ext. 6624 for all your hazardous waste disposal questions.

**Do you have a question, information or a topic for TRACKS or The Morning Show?**

**Call Public Affairs at Ext. 6281!**

# Army celebrates Month of the Military Child

from Staff Reports

DoD Education Activity

April is designated as the Month of the Military Child, underscoring the important role military children play in the armed forces community. Sponsored by the Department of Defense Military Community and Family Policy, the Month of the Military Child is a time to applaud military families and their

children for the daily sacrifices they make and the challenges they overcome.

The Month of the Military Child is part of the legacy left by former Defense Secretary Caspar Weinberger. He established the Defense Department commemoration in 1986.

The Department of Defense Education Activity joins the Department of Defense and the military community in cel-

ebrating April as the Month of the Military Child. In DoDEA communities around the world, our most essential strategic imperatives are: establishing an educational system that progressively builds the college and career readiness of all DoDEA students; and establishing the organizational capacity to operate more effectively and efficiently as a model, unified school system. We aim to challenge each

student to maximize his or her potential and to excel academically, socially, emotionally and physically for life, college and career readiness.

Throughout the month, DoDEA will encourage schools to plan special events to honor military children and have administrators and principals incorporate the themes of this month into their everyday duties and responsibilities. These efforts

and special events will stress the importance of providing children with quality services and support to help them succeed in the mobile military lifestyle.

Here at Anniston Army Depot, the Child Development Center honored the children of military members and DoD civilians throughout the month with a proclamation signing, parade, activities and special guest readers.

## Table tennis tournament held at PFC

by Mike Harris

ANAD DPM

The State Teams Table Tennis Tournament was held March 25 at the Physical Fitness Center. This marks the 12th year of this event.

The tournament is limited to 20 teams with 12 teams in the upper division and eight teams in the lower division, based on table tennis rating.

The majority of the participants were high school and college students. A German exchange student from Sumiton Christian School tied for third place in the Championship Division with his teammate, Chip Patton of Madison Ala.

Eli Getman, a senior at the Alabama School of Fine Arts, won first place in C Division with his teammate Payton Glass.

Ben Hartwiger from Spain Park High School and his teammate, Ivan Skripnik of McCalla, Ala., won the tournament

Courtesy photo

Ivan Skripnik, shown here, and his teammate Ben Hartwiger won the tournament.

and \$400.

The next sanctioned table tennis tournament at the Physical Fitness Center is scheduled for May 20 and is open to anyone who would like to participate.

## ASIST courses scheduled

Anniston Army Depot's Directorate of Family and Morale, Welfare and Recreation will host suicide prevention training several times over the next six months.

Applied Suicide Intervention Skill Training, better known as ASIST, will be held in two-day sessions on the following dates:

- May 16-17
- Aug. 23-24

Anyone interested in acquiring the skills needed to identify and assist co-workers and family members at risk for suicide should attend this training.

Each class has a maximum of 20 slots available.

Interested employees should register in the Total Employee Development system for ANAD ASIST Applied Suicide Intervention Skills Training or contact Sabra Mosley at Ext. 3379.

## Need a recycling bin in your area?

If your area needs recycling bins - additional bins to handle the amount you generate or an increased number to add to the convenience of recycling - contact the Recycling Center at Ext. 6838.
