CMC Message to the Force: "Execute"

From Gen. Robert B. Neller, 37 Commandant of the Marine Corps: Marines, I am writing at the beginning of the New Year to give you an update on where we are as a Corps and where we need to focus in the coming months. First, thanks to you, Sailors serving with Marines,

Civilian Marines, and your families for your efforts to keep our Corps ready and relevant in today's challenging world. Marines in combat in Iraq, Afghanistan, Africa, and Syria continue to distinguish themselves as professional, disciplined warriors and a critical component of the joint force. At the same time, Marines in Europe, WestPac, and South America assure our friends and deter our adversaries through their forward presence.

Here at home, we are implementing the actions of the Marine Operating Concept. Specifically, we adjusted our training to contest a peer adversary and worked to improve our readiness by adopting new processes to be more innovative, fit, educated, and resilient. We are in the midst of implementing Force

2025 structure changes; modernizing our force, recapitalizing legacy systems, and meeting mission requirements around the globe. We are making key changes in all aspects of how we make our Corps more ready to compete successfully on future battlefields. We are on track with regard to people, readiness,

ization that will make us more lethal and capable. That said, I am willing to adjust course if there is a better way. At the same time, all of us must strive to be more competent, disciplined, and safe in

Most importantly, we all must be willing to embrace change ... not for the sake of change, but change to make us better. The current and future operating environment is plagued with chaos and uncertainty. This uncertainty requires us to continuously look for innovative

"Dambusters" begin transition to **UK**

An A400 Atlas takes off aboard Marine Corps Air Station Beaufort, Jan. 25. The Atlas is transporting F-35 equipment back to the U.K. in preparation for the remainder of the 617 Squadron "Dambusters" to transition from MCAS Beaufort to Royal Air Force Base Marham later in 2018.

Story and photos by Cpl. Benjamin McDonald **Press Chief**

The United Kingdom's 617 Squadron began its transition from Marine Corps Air Station Beaufort to the U.K. Jan. 25 when an A-400 Atlas departed Fightertown with F-35B Lightning II equipment bound for the U.K.

Royal Air Force and Royal Navy personnel have been in-

corporated in Marine Fighter Attack Training Squadron 501 since their arrival in 2014. All U.K. personnel are scheduled to depart MCAS Beaufort for their homeland during 2018. When their move is complete, they will have moved approximately 200 U.K. personnel and their full cadre of F-35B aircraft to Royal Air Force Base Marham where they will be part of the 617 Squadron "Dam-

busters."

"We started off doing a little bit of everything," said Squadron Ldr. Hugh Nichols, the U.K. senior national representative with VMFAT-501. "From teaching the new pilots, which is our main focus, to generating a syllabus as we looked at new capabilities and roles the F-35 can fill, and how we can teach them to the

GUESS WHO?

I am a comic born in South Carolina on February 7, 1965. I started out doing stand up at New York City venues and caught the eye of Eddie Murphy. I rose to prominence as a cast member on Saturday Night Live in the early 90s.

HOROSCOPES

ARIES - Mar 21/Apr 20

Aries, you give everyone the benefit of the doubt, and that's commendable. Such a positive outlook will serve you and your relationships well.

TAURUS - Apr 21/May 21

Taurus, you may do a bunch of sitting around and waiting at work in the days ahead. Stay patient and rest up, as you'll need energy reserves when things pick up again.

GEMINI — May 22/Jun 21 Gemini, you may need to work on communicating with some coworkers. Mixed messages can lead to delays, so convene a meeting to clear the air.

CANCER — Jun 22/Jul 22 Cancer, in attempt to stay calm, you may be suppressing feelings that really should come to the surface. This may only lead to a blowout later on. Transparency is key.

LEO - Jul 23/Aug 23 Leo, it may be tempting to put on an overly cheery attitude, even if things are bugging you. Masking your true feelings may lead to miscommunication. Better to keep things honest.

VIRGO — Aug 24/Sept 22 Virgo, your ego is strong enough to withstand some criticism this week. Use the feedback to develop an even better version of yourself, which will only benefit you in the long run.

LIBRA — Sept 23/Oct 23 A current situation has you feeling a bit pessimistic, Libra. But that outlook can be adjusted by looking

into the future. Let upcoming plans restore your sunshine. SCORPIO — Oct 24/Nov 22 Scorpio, this is a good week to discuss an important issue with that special someone. It's fine to have

differing opinions, just be sure to respect each other's point of view.

SAGITTARIUS — Nov 23/Dec 21 Sagittarius, your energy levels may start off very high at the beginning of the week, but they may quickly fizzle out. Roll up your sleeves and try to trudge

CAPRICORN — Dec 22/Jan 20 Feeling needed this week can quickly recharge your levels of motivation, Capricorn. Helping others is a

surefire way to realize personal satisfaction. AQUARIUS - Jan 21/Feb 18

Aquarius, you have an opportunity to further your education by doing some traveling. Don't let responsibilities at home clip your wings this time around. PISCES - Feb 19/Mar 20

Pisces, a busy work week is on the horizon, but you are set to make the most of every situation. Your confidence can make a difference.

JANUARY 26 PUZZLE SOLUTIONS

Guess Who?:

MARISKA HARGITAY

Answer to this week's puzzles will be available in next week's edition of The Jet Stream.

NELLER continued from page I

crease our readiness and lethal-

ity. The battlefield is the ultimate competition and we must be ready when war comes our way. There is no runner up in combat. Thus, we can never be complacent or be satisfied with "good enough." We must have a boresight focus on warfighting and train the way we intend to fight. We must incorporate the lessons learned from our training and experimentation, so that mistakes on the battlefield do not cost us the fight. We cannot afford to lose to learn in combat!

Therefore, in the coming year, in addition to all that is going on, I ask all Marines, Sailors, Civilian

Marines, and our Families to focus on three things - live the title you've earned, hone your warfighter mindset, and strive to become "admirable" leaders. As Marines, we need to be ready for the next fight.

We must be prepared. Now is the time for decisive action - Marines, now is the time to Execute!

Live the Title You've Earned Every Day:

Earning the title Marine is not the end of the journey, it's just the beginning. If we strive to live up to all it means to be a Marine, that journey is a challenging one - but one worth the effort. Each of us raised our right hand, swore an oath, made a commitment, and embarked on a life of service. That oath has no caveats or an expiration date.

• There is no secret for success in life or as a Marine. Those who live a measured and disciplined life, work hard, treat people with dignity and respect, set the example, take care of their families, and never quit will succeed both

in the Corps and in their lives.

- · Never forget, the Nation expects more from its Marines. We must always strive to be men and women of character and virtue. We take care of one another and our families.
- We must build on our warfighting legacy each and every day by working selflessly with the team to improve our units and to improve ourselves.
- When we see a problem or a discrepancy, all Marines need to act... to take the initiative. Don't wait for others to solve the challenges or problems you see day to day. I expect you to seek opportunities and claim them. That's what Marines do.
- In order to be ready for the next fight, we must prepare our bodies, our minds, and our families.

Embrace our profession of arms. Assess your fitness, your self-improvement, and your social behaviors. Attitudes, conduct, and behavior that do not exemplify our core values and contribute to combat readiness and lethality need to be discarded.

• Our families have earned the respect of the Nation for their sacrifices. The demands on our lifestyle place a heavy burden upon our families. As Marines, it is our responsibility to ensure they are equally ready for the next fight.

Hone Your Warfighter Mindset:

We are warfighters within a warfighting organization. Our Corps performs two important functions for our Nation - we Make Marines and we Win Battles. Every action we take must make us better at those two functions. This requires Marines who are brilliant in the fundamentals of warfighting, and physically, mentally, and spiritually prepared for the violence of

combat. We must think, innovate, and prepare for the battlefields of the future. Complacency kills, both tactically and intellectually. As outlined in the

MOC, we must adapt to the circumstances presented before us, anticipate changes, and evolve to stay ahead of emerging challenges.

- Be ready now tonight. Our next fight will come with little or no warning. We may not have the luxury to conduct deliberate pre-deployment planning and extensive training.
- We are going to have to fight to get to the fight. Our potential adversaries will not afford us the opportunity to simply deploy, stage, integrate, and rehearse prior to hostilities.
- The next fight will be a battle of signatures. Assume everything we do, can and will be observed.

On tomorrow's battlefield, to be seen is to be targeted, to be targeted is to be engaged, to be engaged is to be killed, at range and with precision!

- We will train to fight and win in the high end of conflict by incorporating more force on force training. Just as iron sharpens iron, we will test our new concepts and improve our continuing actions by lining up against ourselves.
- We must continue to hone a similar mindset in our families and the families of the Marines we lead - resilient families are better able to balance life stressors and the stress of being separated while their Marines are forward deployed. To that end, we must celebrate our "Spartan Spouses" and ensure our families have the support needed to enable us to focus on our craft - warfighting.

Lead Like You Want to be Led:

Marines, as good as they are,

expect their leaders to inspire them - through their personal example, competence, and values. Marine leaders, at every level, are expected to teach, coach, and mentor. I expect leaders to be involved in every aspect of the lives of the Marines they lead. When we are personally invested in the success of our Marines on the job and in life — we sustain the transformation and make better Marines!

- · Good leadership takes effort, commitment, and dedication. Initiative and creativity must be encouraged. The integrity and example of each leader must be above reproach.
- We lead, on and off duty. Leadership, at every level, forms the backbone of effective Marine Corps units. Leaders foster belief - in the mission, the unit, their training, and each other. Without leadership, there is no cohesion and without cohesion, there is no will to fight.
- Challenge our Marines. Our young men and women did not join the Corps because they thought it would be easy. They joined because they knew it would be hard and they were up to the challenge. The competence of the individual Marine will be more important than ever in future battlefields. Challenge them to think and act effectively under chaotic, uncertain, and adverse conditions. Give aspiring leaders the freedom to lead, make decisions and even fail. Mistakes will happen, and we must learn from them and move forward.
- Demand nothing less than what's expected of our Marines - leadership, attitude, warfighting competence, initiative, and unwavering discipline. Leaders, at all ranks, must live and model the behavior we want our subordinates to emulate.

Again, thank you, the Sailors that serve with us, our Civilian Marines, and our Families for all that you do. If the Nation ever needed its Marines to stand up and perform their duty, it is now. In the corning year, I challenge all to commit to

do all we can to improve, to be more ready and more lethal, and to make ourselves and our units better. If we do this, together, we will continue to be the most ready when our

Nation calls.

In combat, we will be tested in ways we cannot imagine. Yet, if we focus on our preparedness, readiness, agility, and lethality; we will prevail on the battle-

I don't know where or when the next fight will come, but our Corps must be ready. This next fight will likely be very different than what we have experienced over the past two decades. The potential for great power conflict means we will be contested in every domain. We must be ready to go ... every day ... ready individually, ready as a unit, and ready as a family.

Marines, we have the world we have, not the world we want... and this world requires that we get better.

Better as Marines, better as Warfighters, and better as Leaders.

Our service requires us to make sacrifices and endure hardships. The sacrifices we accept in defense of our Nation move the world closer to resembling the world we want, but this requires action - it requires

used to show pilots where their inert munitions impacted. If the spotting charge is still intact, then it has the potential to damage range vehicles it comes in contact with.

"We came out here today nel requested our services," said Master Sgt. Brian Diaz. with MCAS Beaufort. "We determined whether each munition found was hazardous, could be moved, or needed to be disposed of. We had one munition that we were unsure as to whether it had a spotting round still in it so we were able to train, utilize our explosives and dispose of the

After completing the disposal process, the EOD Marines traveled back to the air station while the range personnel finished up the controlled burn, ultimately ensuring the range is ready to be used to train Fightertown aircrew.

"Our entire purpose is to because the range person-make sure that this range is ready for the warfighter," said Kevin Suitt, the Range the staff non-commissioned Manager. "Today we were officer in charge of EOD able to accomplish two tasks; hazard reduction burns and munition hazard disposal. It's a daily process keeping the range ready, but we do it so our aviators can stay sharp and complete their training."

new pilots."

As the syllabus evolved and more U.K. personnel arrived, the American and British members of VMFAT-501 worked in unison so everyone could efficiently operate and maintain the F-35B. The U.K's goal is to achieve initial operating capability in a land-based role for the F-35B in 2018 and aboard the HMS Queen Elizabeth aircraft carrier in 2020.

"The fact that we could operate with VMFAT-501 for the last few years let us be ahead of the game when it came to developing our own capabilities on U.K. soil," said Nichols. "We are making sure that the aircraft is maintained and the U.K. is able to develop its own engineering, maintenance and air competency in order aircraft."

While the departure of fusignifies a historic milestone

3rd MAW increases CBRN readiness in aircraft decontamination

Story and photos by Sgt. Brytani Wheeler Marine Corps Air Station Miramar/3rd Marine Aircraft Wing

Chemical, biological, radiological and nuclear defense Marines with Marine Aircraft Group 39 taught detailed aircraft decontamination training to Marine Light Attack Helicopter Squadron 267, Marine Medium Tiltrotor Squadron 164 and Marine All-Weather Fighter Attack Squadron 225 at Marine Corps Air Ground Combat Center, Twentynine Palms, Calif., Jan. 25.

The Marines conducted decontamination training as an introductory-level event for squadrons in 3rd Marine Aircraft Wing, said Chief Warrant Officer 3 Rafael Trevino, MAG-39 CBRN officer. Trevino explained that each squadron should have reconnaissance, surveillance and decontamination (RSD) teams trained within their units. This training provides an opportunity for teams to conduct the physical decontamination themselves while CBRN Marines provide the equipment and gear - enabling each unit's Marines to wash down the aircraft in an instructional environment.

Each participating squadron provided at least 10 Marines to conduct the training on their aircraft and received guidance from eight CBRN Marines who have expertise in the decontamination process.

"It's important for the squadrons to get this training because logistically there are not enough CBRN Marines to do a whole decontamination," said Staff Sgt. Garret Arrieta, MAG-39 CBRN chief. "We are reducing friction and stress in training so it pays off in the real world."

DAD is a five station, fivestage process consisting of a primary rinse, application of the decontamination soap, scrub of the aircraft, a second rinse from top to bottom and front to back, and a final check with a chemical agent detector.

"Today, we are doing one station with all five stages in this one location as an introductory-level event," said Trevino. "It's equipment and personnel intensive and requires a large area to execute."

In a full-scale decontamination, the aircraft would move 50 meters between each station and the process could take several hours. If the aircraft does not pass the monitoring stage with the detection equipment it would be recycled back to the beginning and restart the process.

Arrieta explained the importance of this training for everyone involved with the aircraft in order to be ready to support the ground combat element at any time.

"The mission can't stop," said Arrieta. "We have to get birds in the air."

Marines participating recognized the necessity

Marines with Marine Light Attack Helicopter Squadron 267 and Marine Aircraft Group 39 chemical, biological, radiological and nuclear prepare for detailed aircraft decontamination training at Marine Corps Air Ground Combat Center, Twentynine Palms, Calif., Jan. 25. HMLA-267 Marines learned the five station, five-stage process and will now serve as subject matter experts on aircraft decontamination for their respective unit's aircraft.

"Having confidence in the gear and actually knowing how to do [the process], given the present climate and some of the munitions our enemies may want to employ against us, lets us know [we are] ready to face up to whatever the nation may call upon us to do at a moment's notice."

Lt. Col. Richard Allain, VMFA(AW)-225

39 CBRN chief. "We are reducing friction and stress work more efficiently in in training so it pays off in the future. These Marines will now serve as subject DAD is a five station, five-stage process consisting of a primary rinse, application of the training so they can work more efficiently in the future. These Marines will now serve as subject matter experts on aircraft decontamination and train other squadron personnel.

"Our CBRN training is pretty rare," said Sgt. April Saelao, F/A-18D engine mechanic and quality assurance representative with VMFA(AW)-225. "For a lot of us senior Marines, this is our first encounter with any kind of training like this but I think it's pretty vital in the day and age we live in now because some type of contact will be more likely than none."

Leadership from the units also noticed the significance of the training which prepared Marines for whatever may come in future operations.

"It's exceptionally relevant because Marines are going to fall back on their training," said Lt. Col. Richard Allain, commanding officer of VMFA(AW)-225. "Having confidence in the gear and being able to execute given the present climate and some of the munitions our enemies may want to employ against us, lets us know we are ready to face up to whatever the nation may call upon us to do at a moment's notice."

Marines with Marine Light Attack Helicopter Squadron 267 and Marine Aircraft Group 39 chemical, biological, radiological and nuclear prepare for detailed aircraft decontamination training at Marine Corps Air Ground Combat Center, Twentynine Palms, Calif., Jan. 25. HMLA-267 Marines learned the five station, five-stage process and will now serve as subject matter experts on aircraft decontamination for their respective unit's aircraft.

Marines from HMLA-267, VMM-164 and VM-FA(AW)-225 now have RSD teams with first-hand knowledge of the process to decontaminate their aircraft from a chemical, biological, radiological or nuclear foreign substance.

"CBRN readiness is very important for the Marine Corps at this point," said Trevino. "We have a number of adversaries out there who we know are capable of executing this type of attack, and we know they have shown they'd be willing to use this type of attack. Just because it hasn't happened to one of our units in our very recent history doesn't mean it can't happen in the future so we need to be prepared for whatever might come. This type of training ensures we're prepared for that."
