The battalion is part of several select units around the country taking the ACFT before the Army implements the test in October 2019. Photo by Tech. Sgt. William Hopper

The Way Ahead...

Indiana to host Vibrant, Guardian Responses

Attterbury-Muscatatuck will play host to the U.S. Army North sponsored command-post exercise Vibrant Response and the U.S. Forces Command sponsored field-training exercise Guardian Response in April and May. The related exercises focus on managing expert chemical, biological, radiological, nuclear and high-yield explosive forces and that are designed to improve their ability to respond to catastrophic incidents. It is the largest and premier disaster-response exercise in the nation and includes partnerships between military — National Guard, reserve, active-duty — and civilian first-response organizations with more than 6,000 personnel.

Soldiers from 22nd Engineer Clearance Company walk to the scene with specialized tools to extract casualties during Guardian Response 18 at Muscatatuck Urban Training Center, April 22, 2018. The 22nd ECC, from Joint Base Lewis-McChord in Washington, operates as platoons that provide all services for chemical search and rescues. Photo by Cpl. Elizabeth Scott
