

U.S. Army civilians eliminate potential chemical hazards

ABERDEEN PROVING GROUND, Maryland – A group of seasoned U.S. Army civilians are often called to respond on short notice when suspected recovered chemical material is discovered on formerly used military sites and training ranges anywhere around the world.

More than military remnants of a bygone era, these munitions can be as lethal as they were when they were first produced decades earlier – but they are no match for the Army civilians from the Chemical, Biological, Radiological, Nuclear, Explosives (CBRNE) Analytical and Remediation Activity, also known as CARA.

An all Army civilian organization, CARA is home to many retired service members and veterans who leverage a vast amount of experience in CBRN, explosive ordnance disposal and laboratory operations to conduct emergency response missions for Recovered Chemical Warfare Material, technical escort of surety and non-surety chemical material and mobile laboratory operations.

CARA has two remediation response sections, CARA-East based on Aberdeen Proving Ground and CARA-West on Redstone Arsenal in Alabama. During recent missions in Arizona, Delaware, New Jersey, Hawaii and the U.S. Army Pacific area of responsibility, CARA teams have identified and removed potential chemical munitions or materiel, protecting life, property and the environment by removing these hazardous materials.

On a 10-day remediation operation, a team of 12 civilians from CARA-West safely packaged, assessed and removed a 75mm chemical round from a training range. The team leader was Jeffrey F. Williams, a 21-year retired U.S. Army 1st sergeant from Choctaw, Oklahoma.

Shane L. Pollard unloads equipment delivered by military air during an emergency response mission. Pollard is a member of the CBRNE Analytical and Remediation Activity. Courtesy photo

The team included Shane L. Pollard from Columbia, Kentucky; Michael R. Randolph from Ardmore, Oklahoma; Bruce A. Peter from Dubuque, Iowa; Walter H. Oldenburg from Chicago; Keith C. Smith from Baltimore; Wende J. Thornton from Canton, Texas; Donny Jennings from Sheridan, Arkansas; Kevin M. Hanuszcak from Kaneohe, Hawaii; Wayne Purdue from Irvine, Kentucky; Timothy M. Crews from Pine Bluff, Arkansas; and Steven J. Wade from Salt Lake City.

This team brought 106 years of collective military experience to the mission with members who have served in the U.S. Army, U.S. Air Force and U.S. Navy.

CARA-East took on another project. CARA-East is led by Bruce K. Griffin, a New York City native and retired U.S. Army Chemical Corps sergeant major with almost 25 years of

service in uniform. Leveraging 109 years of collective experience for the mission were Ryan P. O'Connell from Laconia, New Hampshire; Trevor Donnatien from Tacoma, Washington; Charles L. Maddox from Frankfurt, Germany; Gerald M. Godwin from Wilmington, Delaware; Shannon J. Platt from Rocky Ford, Colorado; Michael H. Murkens from Franklin, Pennsylvania; James R. Rouse from Kinston, North Carolina; and Pedro D. Johnson from Birmingham, Alabama.

The seasoned team of eight CARA-East personnel and two CARA aviators deployed to assess and package two 81mm mortar projectiles at a former ordnance depot. In addition to packaging and assessing potential chemical weapons, CARA teams conduct clearance, sweep and removal operations for unexploded ordnance hazards and munitions.

From the CG

Teammates,

It gives me great pleasure to publish the first installment of the 20th CBRNE Command quarterly digital newsletter that recognizes and celebrates the accomplishments and performance of our civilian workforce. Our Civilians are a uniquely talented, multi-generational workforce providing unmatched technical competence, leadership, stability, and continuity across the Command. I have the privilege of observing their invaluable contributions to our Command every single day. We simply could not achieve our priorities of People, Readiness, and Informing the Future Force without their contributions.

There has never been a more exciting time to be a part of the Command as summarized by our "[Across the Footprint, 2021 Year-In-Review](#)." I recognize fully that we could not have accomplished much of what we did last year without the contributions of our talented Civilians. Having served in the command and the Technical Escort Unit in the early days of my career, I have known many of our Civilians for years and have been the benefactor of those relationships both personally and professionally. I have nothing but admiration for every single Civilian who has taken an Oath to our Constitution and continues to serve our Army and our Command to this day. Our People are our greatest resource and our Civilians are a critical component of the team.

Thank you for all you do for this great command!

Liberty We Defend! Enabling Lethality!
People First! Winning Matters!

ANTONIO V. MUNERA
MG, US Army
Commanding

Chaplain's Corner

Treasure the moments!

"In life there are people we will lose forever and can't have back, but we must learn to let go and move on."

In life there are fears that will hold us back from what we want, but we must learn to fight them with the courage from within. In life there are mistakes we will make, but we must learn from our wrongs and grow from them. God holds our lives in his hand.

Everything in life really does happen for a reason."

- Angie M. Flores

Life may be unpredictable and sometimes filled with painful separations, but we can take heart that everything takes place under God's gaze. We can enjoy life and treasure the moments - the good and the bad.

The past two years have been a difficult time for us all. And no one knows what other difficult times will come before us. However, if we recognize that there is always a lesson from difficulty, all those challenges may be a great teacher for your life.

Civilian budget analyst supports EOD group technicians

FORT CARSON, Colorado – An Army civilian budget analyst has helped to keep Explosive Ordnance Disposal technicians ready to confront and defeat dangerous devices around the world for more than 15 years.

Mary “Louise” Brumley has served as a budget analyst for the 71st Ordnance Group (EOD) on Fort Carson, Colorado, since 2006, and helped to ensure that high tempo Army EOD units are trained, equipped and ready for missions around the world.

“Her dedication has assisted the readiness of our EOD Soldiers and the CBRNE Command by resourcing training and equipping of one of the highest operational tempo forces in all of U.S. Forces Command,” said Lt. Col. Luke Richards, the deputy commander of the 71st EOD Group.

“This included support to hundreds of unit deployments and detailed coordination with the Department of Energy to ensure our counter-Weapons of Mass Destruction National Mission

Units remained trained and validated,” said Richards. “Louise’s steadfast commitment to the team is inspiring and she will forever hold a place as a (71st Ordnance) Group Headquarters plank holder.”

Brumley said she became a budget analyst at Fort Irwin, California, in 1995 to work with a friend who was an analyst there. She moved to Fort Carson, Colorado, in 2006. Brumley also deployed to Haiti for four months in 1996 and served for 15 months in Germany. Originally from Chickasha, Oklahoma, Brumley said supporting EOD units has been the highlight of her career.

“I can look back and say that I have always tried to support the 71st units, 20th CBRNE and U.S. Army Forces Command to the best I can so that the Soldiers have what they need to be ready for their missions financially,” said Brumley. During her many years at the group, Brumley has been able to watch as EOD officers and techni-

In Memoriam

Mr. Jessie Brumley

Jessie Brumley served as the 71st Ordnance Group (EOD) Safety and Occupational Health Specialist since January 2009. In 1991, he retired from the U.S. Army as a Chief Warrant Officer 3, where he flew Blackhawk helicopters as a Medical Evacuation Pilot. Jessie was a contractor Aviation Safety Officer at Fort Irwin, California, from 1991 to 2007 before he joined the group and served Army EOD Soldiers and the CBRNE Command for over 11 years. He was proud of obtaining his bachelor's degree and lived to play golf. Jessie was devoted to his family, the U.S. Army and his Arizona sports teams. He will be sorely missed in the community. Obituary: <https://www.dignitymemorial.com/obituaries/fountain-co/jessie-brumley-10355965>

Mr. Charles E. Hendricks

Charles E. Hendricks served at the CBRNE Analytical and Remediation Activity-West from January 2004 to August 2020. He started as a toxic material control operator and was promoted to a supervisory engineering technician. He deployed to Kuwait for six months during Operation Iraqi Freedom. A longtime former resident of Pine Bluff, Arkansas, Hendricks was an avid outdoorsman who enjoyed playing golf and fishing and spending time with his granddaughters, Emily and Harper. Obituary: <https://memorials.ralphrobinsonandson.com/charles-hendricks/4290896/obit.php?>

Army civilian coaches winning youth football team

ABERDEEN PROVING GROUND, Maryland – A U.S. Army civilian has molded 10-year-olds into championship winning football teams for almost three decades.

Dalys Talley Jr., the operations chief for the Chemical, Biological, Radiological, Nuclear, Explosives (CBRNE) Analytical and Remediation Activity, first started coaching

Dalys Talley Jr., the operations chief for the CBRNE Analytical and Remediation Activity, led the Middle River Renegades youth football team to 13 championships in 27 years. His record is 265 wins and 32 losses. Courtesy photo.

his son's football team, the Middle River Recreation Renegades, in 1995.

Talley has since led the Renegades to 13 championships. In his 27 years as their coach, his team has been in the championship 26 times. His current coaching record is 265 wins and 32 losses. In 2009, he was selected as the Baltimore Touchdown Club Youth Coach of the Year.

Former players from his team are playing college and professional football today, including U.S. Naval Academy wide receiver Jayden Umbarger, University of Maryland running back Roman Hemby and New Orleans Saints wide receiver Deonte Harris.

In his hometown of Roxboro, North Carolina, Talley played wide receiver and safety with the Person High School "Rockets" before joining the U.S. Army as an enlisted infantry Soldier. In addition to playing for the Rockets and coaching the Renegades, Talley also coached the flag football team on Fort Bragg, North Carolina, in 1980.

The Desert Storm veteran later became an enlisted Chemical Corps Soldier before being commissioned as a second lieutenant in 1984.

Microbiologists safeguard nation against biological agents

ABERDEEN PROVING GROUND, Maryland – U.S. Army civilian microbiologists from the Chemical, Biological, Radiological, Nuclear, Explosives (CBRNE) Analytical and Remediation Activity help to safeguard American citizens and U.S. troops from biological warfare agents.

From their Aberdeen Proving Ground, Maryland, headquarters to mobile laboratories, CARA microbiologists conduct field analysis of organisms and toxins and consider the reliability and validity of factors like laboratory containment, sampling methods and analytical techniques.

"CARA microbiologists are responsible for performing bacterial identification and characterization of potential biological warfare agents," said Dr. Edward F. Keen III, a microbiologist from CARA. "They operate laboratory equipment designed to analyze nucleic acids, antibody and antigen interactions and colony morphology."

These highly trained Army civilians also employ classical microbiology methods and other scientific techniques to include polymerase chain reaction, electrochemiluminescence, enzyme linked immunosorbent assay and fluorescent microscopy, said Keen. Microbiologists should be technical and scientific experts with meticulous attention to detail and excellent interpersonal and communication skills, said Keen.

Timothy M. Reed, a CARA microbiologist, said they have to stay ready to deploy in support of military operations.

"With research science, every day can be different," said Reed. "The day's task can vary from loading a flow cell on a DNA sequencer to loading a forklift with quadcons to support the upcoming mission."

Army civilian contributes to service-wide EOD unit readiness

ABERDEEN PROVING GROUND, Maryland – An Army civilian was recognized for developing new enlisted manning cycles that contribute to the mission readiness of Explosive Ordnance Disposal units.

Keith A. Weeks III was named the 20th Chemical, Biological, Radiological, Nuclear, Explosives (CBRNE) Command Civilian of the Quarter for October through December 2021 for his efforts to strengthen this critical Army community.

Through manning prioritization, Weeks worked to overcome a shortage of Explosive Disposal Specialists (MOS 89D) across the 20th CBRNE Command and the Army.

With 20 years of U.S. Army service, Weeks is a retired sergeant first class and Human Resources noncommissioned officer who has deployed to Kuwait, Albania, Kosovo and Iraq.

After retiring from the Army, Weeks went to work with the U.S. Marine Corps for two years before becoming an Army civilian with the Aberdeen Proving Ground, Maryland-based 20th CBRNE Command.

“My role as a military strength manager is to provide analytical reports that serve as the basis for making personnel management decisions in support of unit readiness,” said Weeks.

Kevin A. Weeks was named the Civilian of the Quarter for October through December 2021 for his efforts to strengthen Explosive Ordnance Disposal units. U.S. Army photo by Marshall Mason.

In addition to contributing to readiness, Weeks has traveled to Fort Leavenworth, Kansas, to interview potential new Field Grade officers for the multifunctional command.

A Bloomington, Minnesota, native, Weeks said he welcomed the opportunity to serve his nation as a civil servant.

“I get to continue to serve my country and provide human resources support to the Army’s most valuable resource – its people,” said Weeks. “I am honored to serve on a winning team made up of Army professionals – uniformed military and civilian – that is dedicated to accomplishing the mission.”

Lt. Col. Rebecca J. Cozad, the 20th CBRNE Command assistant chief of staff, G1, said Weeks leverages his

vast knowledge of the command, its subordinate units and their missions to contribute to the readiness of the one-of-a-kind formation.

“With an Army-wide shortage of EOD personnel, he works very closely with the senior enlisted advisors of each organization, coordinates directly with the 20th CBRNE Human Resources Command Account Manager as well as the Army’s EOD personnel career manager,” said Cozad. “This ensures we are taking care of people, taking care of the unit’s mission and providing for the future of the EOD community.”

An 18-year U.S. Army veteran from Brockway, Pennsylvania, who has deployed to Afghanistan and Iraq, Cozad said the newly formed Enlisted Manning Cycle allows strength managers to manage personnel at the lowest management sub-level.

“It is there (at the lowest sub-level) that the professionals know the units’ needs and the units’ requirements,” said Cozad. “At the 20th CBRNE Command G1, Mr. Weeks understands the command’s manning priorities and conveys the information to Human Resource Command – ensuring the right person, at the right place, at the right time.”

Army chemical engineering techs combat CBRNE hazards around world

ABERDEEN PROVING GROUND, Maryland – U.S. Army civilian chemical engineering technicians from CARA conduct critical missions around the world.

From chemists to unexploded ordnance technicians, CARA brings together a wide variety of occupational specialists that confront and defeat CBRNE hazards..

Engineering Technician (Chemical) is one of the many professions that keep the one-of-a-kind activity ready. The highly trained U.S. Army civilian technicians conduct a wide array of missions supporting many of the 20th CBRNE Command’s specialized missions.

“Chemical engineering technicians help to keep our nation’s warfighters and citizens safe through quick response, assessment and remediation of potential and

confirmed CBRNE material,” said Jarrod M. Williams, a chemical engineering technician from CARA. After serving as a toxic material handler for Bluegrass Chemical Activity, he became a chemical engineering technician.

Trevor V. Donnatien Jr., a supervisory chemical engineering technician from CARA-East on Aberdeen Proving Ground, Maryland, said technicians are required to be able to deploy anywhere on short notice.

“Our typical day-to-day operations vary based on what’s going on in the world,” said Donnatien, a Felton, Delaware, native who has been at CARA for seven years. “There are many daily initiatives performed that ensure we are prepared and ready at all times.”

Civilian recognized for keeping command mission ready

ABERDEEN PROVING GROUND, Maryland – An Army civilian was recognized helping to keep the Department of Defense's premier all hazards formation mission ready.

William C. Hart was named the 20th CBRNE Command's Civilian of the Quarter for the 2nd quarter of 2022.

A retired U.S. Army major, Hart serves as an exercise planner for the 20th CBRNE Command, the U.S. military's only multifunctional and deployable CBRNE headquarters.

Hart joined the Army after high school and spent 24 years in uniform, including serving in the 20th CBRNE Command's Nuclear Disablement Teams.

"We plan, resource and execute mission readiness exercises for this command and our subordinate units," said Hart, a native of Twin Falls, Idaho. "These training events and exercises enable successful accomplishment of our command's very specialized missions during combat operation, peacekeeping missions, and as we support civilian authorities here in the United States."

Hart plans and conducts exercises that integrate current and emerging doctrine, tactics, techniques and procedures, and equipment into realistic exercises that enable mission accomplishment.

"I strongly believe the (Special Operations Force) truth

William C. Hart helps to keep 20th CBRNE Command units mission ready as an Operations exercise planner. A retired U.S. Army major and nuclear operations officer, Hart is the Civilian of the Quarter for the 2nd quarter of fiscal year 2022. U.S. Army photo by Andrew D. Monath.

that people are more important than equipment," said Hart. "Having the latest gear, at all echelons, helps us accomplish the mission, but hard, realistic training and exercises is the key to our success."

Army EOD technician profession marks 80th anniversary

ABERDEEN PROVING GROUND, Maryland – The U.S. Army is marking the 80th anniversary of the Explosive Ordnance Disposal profession.

The U.S. Army's first enlisted EOD technicians began training at the Bomb Disposal School on Aberdeen Proving Ground, Maryland, in 1942.

Based in the science, security and technology corridor of northeast Maryland, Aberdeen Proving Ground is the oldest active proving ground in the U.S. Army and the former home to the Ordnance Corps, which moved to Fort Lee, Virginia, in 2008.

Today, Aberdeen Proving Ground is the headquarters post for the 20th Chemical, Biological, Radiological, Nuclear, Explosives (CBRNE) Command, the U.S. Department of Defense's premier all hazards formation.

Col. Christopher P. Bartos, the operations officer for 20th CBRNE Command, is the senior EOD officer at the headquarters.

Pfc. Cristian J. Feliciano from the 752nd Ordnance Company (EOD) prepares an explosive tool during the 2021 EOD Team of the Year competition. U.S. Army photo by Master Sgt. Jeffrey Duran.

Bartos grew up around the military and graduated from high school at Army Garrison-Kwajalein Atoll in the Republic of the Marshall Islands. He later graduated from Embry-Riddle Aeronautical University in Daytona

Beach, Florida, and became an Army infantry officer. After a few years, he decided to become an EOD officer.

"I wanted to explore a different path that would challenge me in a more technical way," said Bartos. "I was fascinated by the complexity and technology of various types of weapons and other hazards designed for war and conflict. As a young officer, I believed EOD to be a perfect fit of supporting combat operations and protecting our Soldiers."

Today, Bartos oversees operations for the command that deploys from 19 bases in 16 states to take on the world's most dangerous hazards.

Bartos said the command EOD units routinely deploy to the Central Command and Africa Command areas of operations while supporting Indo-Pacific Command exercises and Defense Support to Civil Authorities missions for Northern Command.

Army civilian wins first place on 'Tough as Nails' TV show

Lia P. Mort from Weapons of Mass Destruction Coordination Team 1 won the grand prize of \$200,000 and a Ford Super Duty truck on the "Tough as Nails" competition television series on CBS. Photo: Screengrab/CBS ©2021 CBS Broadcasting, Inc. All Rights Reserved

ABERDEEN PROVING GROUND, Maryland – A U.S. Army civilian won the Season 3 championship on the competition series "Tough as Nails" on CBS.

Lia P. Mort from 20th Chemical, Biological, Radiological, Nuclear, Explosives (CBRNE) Command prevailed in the finale to take home the grand prize of \$200,000 and a 2022 Ford Super Duty truck.

During the 10-episode competition, the contestants also took on a series of team tasks in pursuit of awards equaling \$60,000. Serving as team leader, Mort led her "Dirty Hands" team to victory over the "Savage Crew" team.

"Leadership has taught me to value every team member," said Mort, a self-described "Jill-of-All-Trades" who is originally from Lititz, Pennsylvania, and now lives in Richfield, Pennsylvania. "A team's success relies on each member knowing where they fit and how they are making a positive contribution."

In addition to serving in the military, Mort has been a firefighter, health care worker, warehouse worker, commercial tractor trailer driver, chicken hatchery worker, horse farm laborer and retail hardware clerk. She has also worked in various construction trades.

In September 2021, Mort reported to 20th CBRNE Command, the U.S. Department of Defense's premier deployable all hazards formation, as an Army civilian in Weapons of Mass Destruction Coordination Team 1.

She previously served as a civilian at the 20th CBRNE Command from 2010 to 2017.

Command recognizes retired generals with Defender of Liberty Award

BELCAMP, Maryland – The U.S. Department of Defense's premier all hazards command recognized two retired U.S. Army major generals with the Defender of Liberty Award at a ceremony at the Water's Edge Event Center, Oct. 14, 2021.

The 20th CBRNE Command selected retired Maj. Gen. John C. Doesburg as the 2020 Defender of Liberty and retired Maj. Gen. Keith R. Wendel as the 2021 Defender of Liberty.

The Defender of Liberty Award is presented to leaders who have made a significant impact on the U.S. military's only multifunctional deployable CBRNE headquarters.

Retired Maj. Gen. John C. Doesburg (center), the former commanding general of U.S. Army Research, Development and Engineering Command and U.S. Army Soldier and Biological Chemical Command, is named the 2020 Defender of Liberty Award recipient. U.S. Army photo by Marshall Mason.
