

Applications for Decision Advantage

Mike Foster
Chief Data Officer
20 Feb 2024

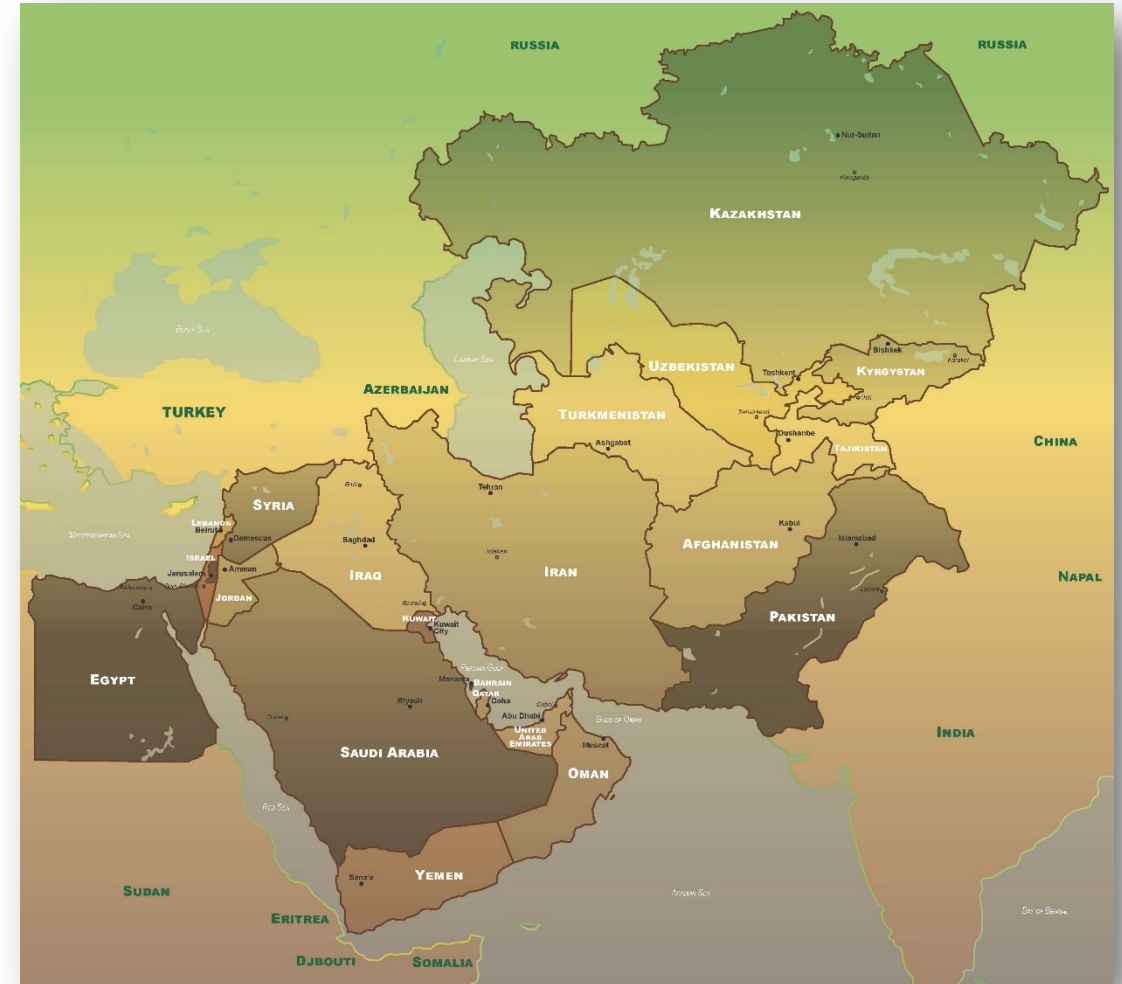

Setting the Stage

U.S. Central Command (CENTCOM) sits at the crossroads of key economic, diplomatic, and military global interests.

- Critical trade routes
- Energy and connectivity hub
- Diversity of security challenges

Engagement across these interests requires, joint, all-domain, cross-echelon, cross-classification operations and coordination

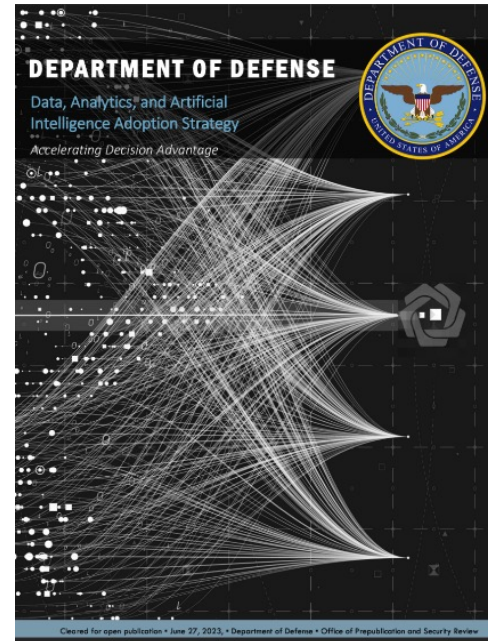

Diversity of Security Challenges

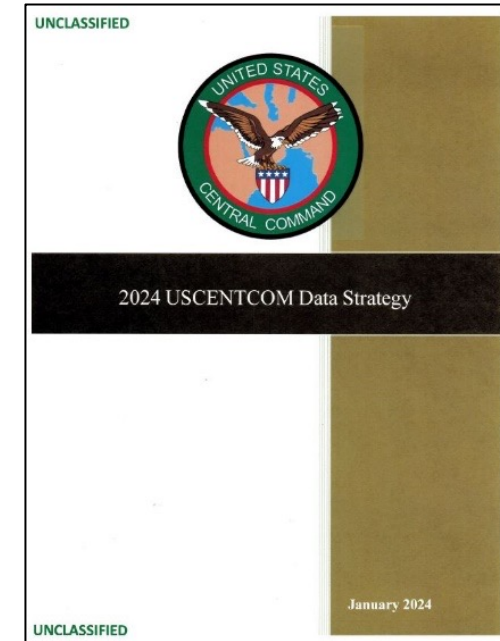

Data Strategy

- **Data-centric Operations**
 - Governance principles via **VAULTIS**
 - Centralized data stores
 - Unit Testing via **Data Dimensions**
- **Data Resiliency**
- **Smart Tools & Infrastructure**
 - Workflow Automation
 - Artificial Intelligence

**2023 DoD Data,
Analytics & AI
Adoption
Strategy**

**2024

Data Strategy**

Primary Apps for JADC2 Decision Advantage

Features in use by CENTCOM				
	Heterogeneous Bulk Ingest	Synchronized Situational Awareness	Automated Workflows	Artificial Intelligence
Maven Smart Systems	★	★	★	★
Advana 	★	★	★	
VJOC		★		

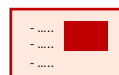

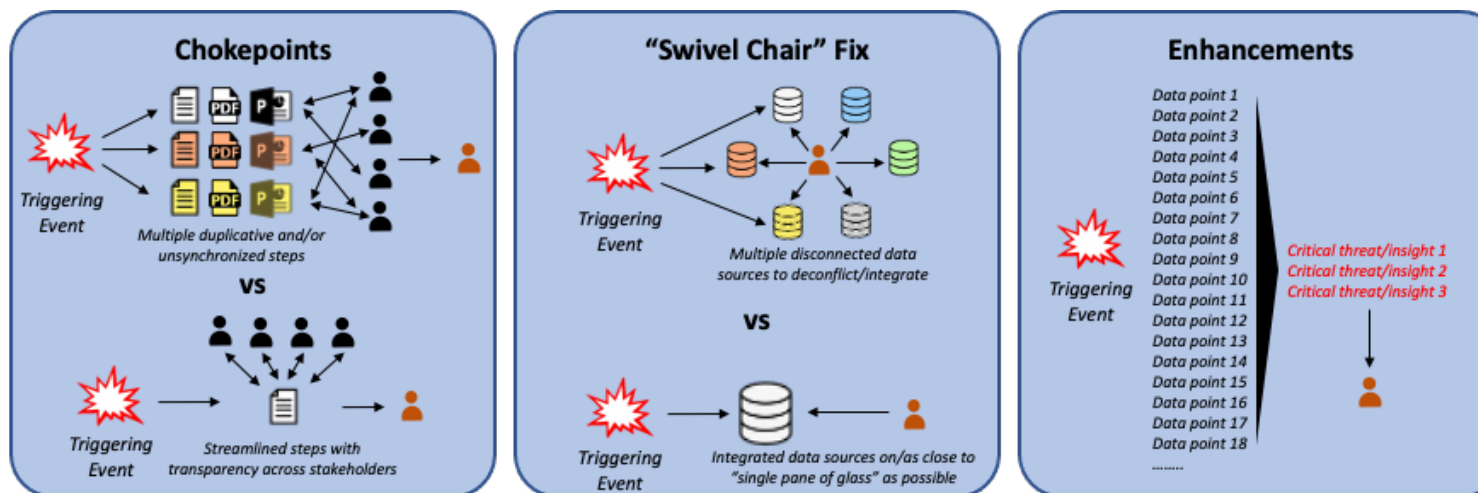

JADC2: Synchronized Situational Awareness

Effective fusion, synthesis, and presentation of data to a commander requires a cloud environment (multi-classification), a robust data integration & visualization tool, and heavy coordination of technologies and policies with the entities feeding in data

JADC2: Targeting Workflow Case Study

Targeting: Previous Method

Mediums with **manual version control** (e.g., excel)

Mediums with **limited, static data layers** (e.g., PPT)

SA requires **active outreach** (e.g., phone/email)

Lack of process transparency (e.g., who made change/why)

Targeting: Enhanced Method

Collaborative platform **eliminates need for version control**

Platform with **large number of live data layers**

Enhanced SA persistently maintained by platform

Updates & changes **tracked and easily accessible**

By leveraging workflow automation tools with common/widely-accessible data layers, teams were able to reduce time for nomination, submission, and approval of a dynamic target from days to hours

JADC2: Workflow Automation

CENTCOM has developed tools to automate the target-refinement process, expediting approval and reporting

JADC2: Artificial Intelligence

INITIAL STATE: Cluttered, difficult-to-decipher picture

Seabed to Space

Jordanian Navy & AF
manned system imagery

MarineInstruments UAS

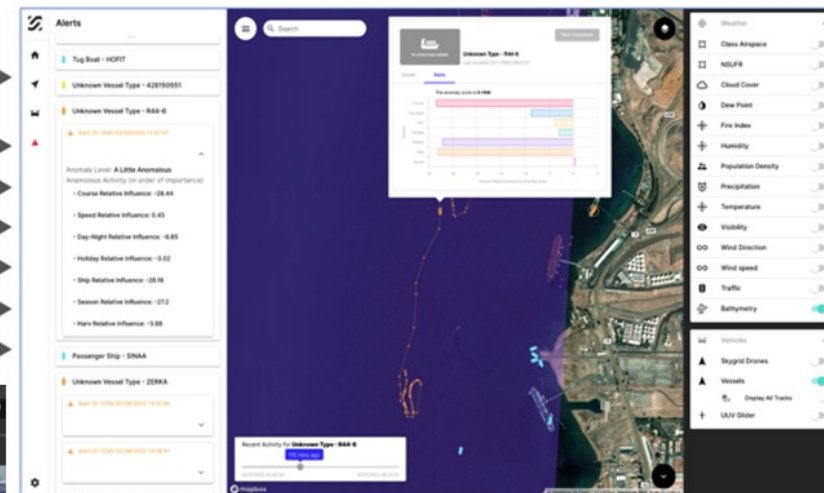

Various DARPA Buoys

Various Saildrone USV

Teledyne/L3Harris UUV

Blue Hotel Navy Cloud

Local ad-hoc networks

Capabilities & Outcomes

Advance beyond
commercial/synthetic data
to train AI/ML tools

Hardware agnostic Open-
Architecture (OA) preferred

Seabed to Space edge-
deployed Ocean of Things

AI-based Pattern of Life
(POL) anomaly detection
and classification

HQ workload advantages

Enhanced multi-domain
awareness

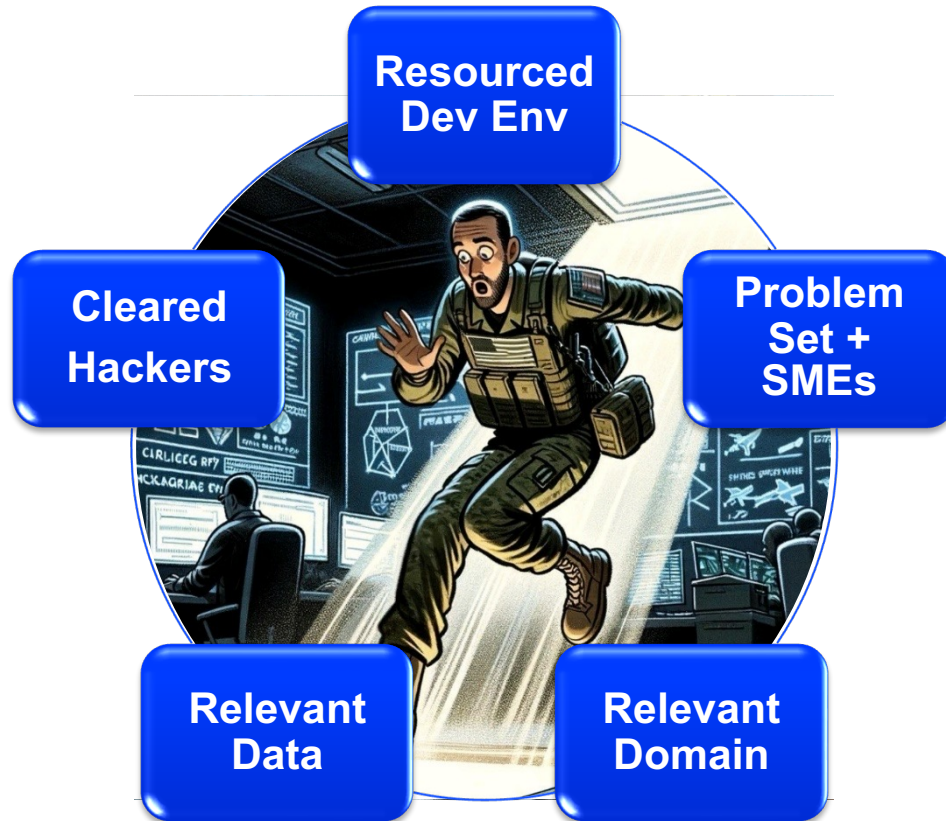

- Computer Vision via Maven
- Anomaly Detection for Streaming Tracks
- Recommendation Engines

Metrics matter! Speed wins!

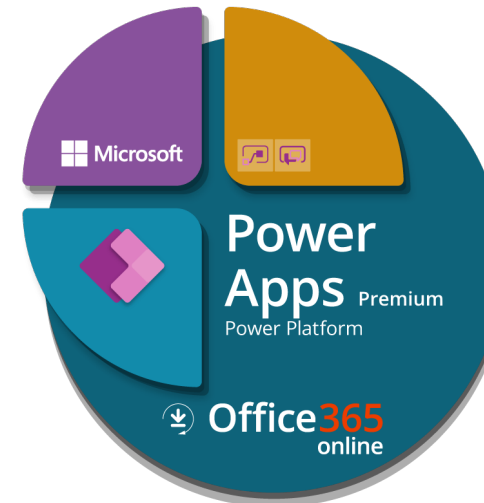

App Incubation

Dev Prototyping: SANDTRAP

No Code / Low Code

Operational Validation

Decision Advantage via Partnerships
