Army's R2E program paves way for future excess removal

ROCK ISLAND ARSENAL, Ill. – While the U.S. Army Sustainment Command is primarily known for its capabilities in providing Soldiers clothing, equipment, food, and more, they're also responsible for the removal, storage and maintenance of many of those same pieces of equipment.

R2E - Rapid Removal of Excess - helps alleviate the burden of excess and obsolete equipment, allowing units to focus their time and energy on training. (Click to read more)

U.S. Army Europe and Africa deputy commanding general visits APS-2 Coleman

MANNHEIM, Germany – In the past few months several high-ranking military officials and distinguished visitors have conducted key leader engagements and site visits to the Coleman Army Prepositioned Stock-2 worksite in Mannheim. And for good reason. The Coleman APS-2 worksite is a critical component to U.S. Army Europe and Africa's power projection and warfighter readiness mission. (Click to read more)

Army's storage experts secure gear to protect Soldiers

ROCK ISLAND ARSENAL, Ill. – Imagine this: You've stashed away a few treasured items, trusting they'll be safe and sound for when you need them. Fast forward to the moment you open the storage, only to find your belongings ravaged by critters, invading insects, or relentless moisture. It can leave you not only frustrated but also reaching deep into your wallet to replace what's been lost. Proper storage isn't just about stashing things away – it's about safeguarding them against the unexpected. (Click to read more)

ASC GLOBAL ELINE

The faces behind ASC's curtain

ROCK ISLAND ARSENAL, Ill. – U.S. Army Sustainment Command provides logistics capabilities and materiel readiness to Army leaders around the globe in support of the warfighter. At home, the ASC serves as the senior command at Rock Island Arsenal. Given the commander's extensive responsibilities, a master coordinator is essential to ensure seamless operations.

Innovation in APS Technology: Preparing for Future Warfare

The ongoing conflict in Ukraine has provided essential lessons in logistics and supply chain management, including agility, flexibility, and real-time visibility. As the Army reduces its forward troop presence globally and the primary and secondary threats remain high, modernizing Army Prepositioned Stocks is crucial to keep pace with Army 2040 and maintain deterrence relevance amidst increasing global projection requirements. Army uses 'Culinary Outposts' to help feed Soldiers

ROCK ISLAND ARSENAL, Ill. – Whether you call it the “gut truck” or “food truck” there is no denying that the sight of one pulling up to the battalion area makes every Soldier smile.

While mobile kitchens were utilized frequently in war zones to provide warm food to Soldiers, they are now being employed to feed Soldiers on military bases.

ASC AACA expedites delivery of readiness drivers and saves the Army millions

REDSTONE ARSENAL, Ala. – The Army's supply chain is massive...and global. Whether delivering pallets of repair or replacement parts or major end items like tanks, the Army's (and more broadly, the Department of Defense's) transportation system is continually ensuring that "readiness drivers" are moved through the system expeditiously.
