## SDDC, 21st TSC expand power projection in the Mediterranean

KAVALA, Greece – For the first time, U.S. Army units launched vehicle convoys from the pier at the Port of Kavala, which rolled onto the nearby national highway enroute to conduct training in support of the DEFENDER 25 exercise May 7. The Port of Kavala is now the newest port across the span of the European continent that provides North Atlantic Treaty Organization with the capability to deliver fighting forces and resupply combatant commanders.

## AFSBn-Benelux issues APS equipment, vehicles for DEFENDER

EYGELSHOVEN, Netherlands – The Eyselshoven Army Prepositioned Stocks-2 worksite in the Netherlands is one of the most active APS worksites on the planet, but recently activity levels at the site reached new highs. Soldiers from Fort Drum, New York, arrived at the Eyselshoven APS-2 worksite and Army Field Support Battalion-Benelux began the process of issuing more than 200 APS-2 major end items, including several Stryker vehicles and more.

## AMC EDCG leads review, discusses role in Army transformation

REDSTONE ARSENAL, Ala. – Liz Miranda, executive deputy to the commanding general of Army Materiel Command, led a Management Business Review Level III meeting at Aviation and Missile Command headquarters last week, advancing AMC's role at the forefront of the Army's transformation. The visit was part of Miranda's broader effort to conduct these critical reviews across various commands within the AMC enterprise.

## Equipment operations, maintenance with CECOM ILSC

ABERDEEN PROVING GROUND, Md. – The Communications-Electronics Command Integrated Logistics Support Center has a mission to deliver Command, Control, Communications, Computers, Cyber, Intelligence, Surveillance, and Reconnaissance power through logistics and sustainment solutions to enable warfighter dominance. A rigorous series of developmental test and evaluations are performed on all items used by the Army and other military services.

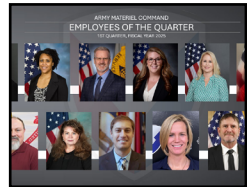

## Experts complete first phase of MEDLOG in Campaigning effort

FORT BRAGG, N.C. – Medical logisticians and Army stakeholders recently convened to conduct an after-action review of "wave one" and final planning conference for "wave two" of Medical Logistics in Campaigning, or MiC, a major initiative to integrate medical logistics into the broader Army sustainment enterprise. AMLC was tasked by the Army to act as the lead agency for MiC implementation effort.

## AMLC embraces special designation

FORT DETRICK, Md. – Army Medical Logistics Command unveiled its special designation of "Gemini" during a ceremony May 12. "The name 'Gemini' pays homage to the AMLC's balance of roles, rooted in both medicine and sustainment," AMLC Command Sgt. Maj. Gabriel Wright said. "AMLC's complex mission sets can be likened to the 'twin' duality of the astrological sign, which represents versatility, adaptability and the ability to see multiple perspectives."
