## ***Empowering the Indo-Pacific: NETCOM Leads the Charge Toward a Unified, Secure Future***

Last week at LANPAC 2025, MG McPhail highlighted NETCOM's critical role in advancing the U.S. Army's Indo-Pacific strategy. She emphasized how NETCOM is building a unified, secure communications network that underpins joint operations, strengthens regional partnerships, and enables rapid, coordinated responses. Through innovation and global connectivity, NETCOM is ensuring mission readiness across the Indo-Pacific.

## ***7th SIG CMD Advances with PM-IEN Sync for Integrated Enterprise Network Implementation***

To ensure a coordinated approach to modernizing the Army's communication network, the 7th SIG CMD participated in a PM-IEN Sync. This collaboration is essential for the successful implementation of the Integrated Enterprise Network (IEN), formerly DCATS, and its support of multi-domain operations.

## ***Cyber and Signal Brigades Empower Future NCOs Through CHIPS Leadership Seminar***

The Cyber Protection Brigade (CPB) and 15th SIG BDE hosted the CHIPS (Chevron Indoctrination Program and Seminar) to develop junior leaders. The seminar focused on leadership growth, aligning with the NCO Creed, and provided newly promoted Sergeants with tools, mentorship, and real-world insights from senior NCOs to help them become trusted, effective leaders.

## ***39th SIG BN Hosts KLE with 41st French Signal Regiment***

Our 39th SIG BN recently met with the 41<sup>ème</sup> Régiment de Transmissions (41st French Signal Regiment) to explore various opportunities for joint training and interoperability events to ensure our Soldiers are fully prepared for future missions. These discussions underscored our shared commitment to building a more agile and responsive Army, ready to tackle the challenges of modern warfare.

## **304th SIG BN Enhances Combat Readiness with MK-19 Training and Advanced Tactical Care**

While at the range, Soldiers took advantage of a pause in range operations to receive some advanced Tactical Combat Casualty Care training from medics assigned to 168th Multifunctional Medical Battalion; part of the 65th Medical Brigade.

## **COL Luckey Delivers Keynote at Hood College ROTC Honoring Army's Next Generation of Leaders**

COL Luckey, 21st SIG BDE's Deputy Brigade Commander, was honored to provide the address during the Hood College U.S. Army Reserve Officers' Training Corps (ROTC) commissioning ceremony in Frederick, Maryland. The ceremony is steeped in tradition and marks the transition from Cadet to Officer in the U.S. Army.

## **Sharpening Skills for the Fight: Soldiers Train on Engagement Skills Trainer to Perfect M4 Marksmanship**

44th SIG BN is focusing on key fundamentals like sight picture, trigger control, and target acquisition. This simulated training reinforces muscle memory and builds confidence, supporting the unit's commitment to readiness and excellence.

## **Martin Oglesby Recognized for Over 30 Years of Dedicated Support to Our Nation**

The impact of Army Civilians like Mr. Oglesby cannot be overstated; their dedication and expertise ensure the smooth operation of critical functions that support our Armed Forces and the broader mission of national defense. Their contributions are vital to maintaining the excellence and readiness of our military, exemplifying a profound commitment to public service.

## **Spring Bash Brings 7th SIG CMD Together: Team Bonding, Friendly Competition, and Food Fun**

The 7th SIG CMD brings together team members for a day of camaraderie, competition, and celebration. Highlights included a spirited Jeopardy match won by their G-5, award-winning chicken wings by SSG Wilson, and a bake-off victory for SFC Blount's cookies. Events like these are vital for strengthening team cohesion, boosting morale, and reinforcing the bonds that support mission success and unit readiness.

## **Building Lethality: Focused Marksmanship Training Sharpens Combat Readiness and Precision**

1st SIG BDE is enhancing the unit's lethality by reinforcing core marksmanship skills in a controlled, simulated environment. By focusing on fundamentals like sight picture, trigger control, and target acquisition, Soldiers build muscle memory and confidence, ensuring they can engage targets accurately and effectively under pressure. This deliberate preparation directly translates to increased combat effectiveness and mission success.
