New microelectronics facility shapes future for warfighters

TOBYHANNA, Pa. – With the snip of the scissors, Tobyhanna Army Depot celebrated the official opening of its Microelectronics Manufacturing Facility June 5, enabling the organization to lead the Department of Defense into a new era of warfighter readiness – one microchip at a time. The depot's new capability will directly address current supply chain hurdles faced by U.S. Armed Forces.

Modernization of Multipurpose Range Complex complete

FORT HUNTER LIGGETT, Ca. – The Fort Hunter Liggett Multipurpose Range Complex modernization project is complete after two years of extensive upgrades. The complex provides cutting-edge facilities, supporting warfighter readiness.

LEAD experts successfully conduct virtual repair

CHAMBERSBURG, Pa. – When 11th Air Defense Artillery Brigade deployed, they notified Letterkenny Army Depot of a severe leak on a critical Patriot weapons systems component. LEAD artisans came together to successfully repair the leak, without ever having to leave the depot. If LEAD had to go to the deployed location, it would take two artisans with multiple days of travel, plus at least two days on the ground.

World's best munitions: 8th TSC knows JMC's capabilities

ROCK ISLAND ARSENAL, Ill. – After three years away, Maj. Gen. Gavin Gardner paid a visit to one of his former duty stations. From 2020 to 2022, the 8th Theater Sustainment Command's commanding general served as the commander of Joint Munitions Command. Gardner emphasized to JMC's workforce the crucial role they have played in the past, continue to play in the present and will play in the future.

Logistical readiness builds combat power

FORT JOHNSON, La. – The main task of the 734th Regional Support Group is to operate as the logistical backbone of the Iowa Army National Guard. During Joint Readiness Training Center rotation at Fort Johnson the group provided oversight and accountability of Soldiers on the ground, coordinated rail and freight transport of military vehicles, barracks, food service and medical aid for possible real-world injuries and treatment during the exercise.

Picatinny Arsenal recognized as one of Army's "best garrisons"

PICATINNY ARSENAL, N.J. – Picatinny Arsenal was awarded "best garrison" within Installation Management Command, and fifth overall within IMCOM, a recognition the northern New Jersey military installation received for the second time in three years. The Army's Best Garrison competition is one piece of the overall Commander in Chief's Annual Award for Installation Excellence that's organized by the Secretary of Defense.
