VOL. 2, NO. 18 ROCK ISLAND ARSENAL, ILLINOIS Friday, September 10, 1965

Arsenal Cited for Safety Record

For the fifth consecutive year, Rock Island Arsenal has earned recognition of the National Safety Council for outstanding achievement in safety.

This time it's the Award of Merit, earned by 1,900,789 consecutive man hours of operations during fiscal year 1965 without a disabling injury.

John LeFever, safety director, received the award from Lt. Col. John M. Gilligan, executive officer, at a meeting of the Arsenal Safety Committee.

"I accept on behalf of all of the employees of Rock Island Arsenal, who earned this award," LeFever said.

In the fiscal years 1961 through 1964, the Arsenal received the Safety Council's Award of Honor. In each case, the award symbolized more than 3,000,000 consecutive man hours without disabling injury.

The Arsenal's safety record was an important factor in achieving top ranking for Army Weapons Command. The command has the best safety record in Army Material Command, which in turn boasts the best record in the Department of the Army.

See story on page 14.

Bigger Checks For 120 Military

Some 120 officers and enlisted men stationed at Rock Island Arsenal will receive pay hikes in their checks the end of this month under the military pay bill signed by President Johnson.

The hikes in active duty basic pay are a flat 6 per cent for officers and warrant officers and 11 per cent for enlisted men.

These rates apply to personnel with two years or more of service. Men with less service will receive increases ranging from 12.7 to 33.7 per cent.

In the case of officers, increases, according to Capt. Charles Preetorius, Arsenal finance officer, will range from around \$20 for lieutenants to more than \$75 in the general rank, depending on years of service.

Enlisted men's hikes will vary from about \$10 for a private (recruit) to some \$30 for a sergeant first class.

SAFE PLACE TO WORK—John LeFever, Rock Island Arsenal safety director, accepts National Safety Council award from Lt. Col. John M. Gilligan, Arsenal executive officer.

Famed Woman Psychologist To Address AMETA Seminar

Dr. Lillian Gilbreth, "the world's greatest woman engineer," will visit the Army Management Engineering Training Agency at the Arsenal Sept. 22 and 23.

She will be the featured speaker at the Top Management Seminar on Thursday, Sept. 23.

Dr. Gilbreth, now 87, earned her title in a lifetime of work to promote more efficient and productive relations between labor and management.

Dr. Lawrence Wallace of AMETA, conference leader of the seminar, is a longtime friend of Dr. Gilbreth and invited her to participate.

In 1904 she married Frank Gilbreth, a construction engineer. It was a time when top educators and executives were beginning to recognize the importance of the human element in regard to employer and employee relationships.

Gilbreth utilized his wife's experience as a doctor of psychology and combined it with his knowledge of chemical engineering in a new field, and industrial engineering had its start.

For many years the Gilbreths have been identified by the public with the book, "Cheaper by the Dozen," the story of their life with their 12 children. Industry, however, recognizes the Gilbreths for their contributions to American productivity.

Set Graduate Study Program

Nine graduate level resident-extension courses will be offered by the University of Iowa during the fall semester, with classes to be held in the Arsenal training area, Bldg. 60.

The Quad-Cities Technical Advisory Council, Inc., is co-operating in the course offering.

Approximately three-quarters of the required credit for a master's degree in business administration and engineering can be acquired through these off-campus evening courses.

Registration will be on the first class period, in each course. The fee is \$38 per semester hour. The first course, numerical analysis for computers, opens Monday at 6 p.m.

At the Arsenal, information may be obtained from E. M. Vaughan, physical science administrator for AWC Research and Development.

R & D Briefing Planned for 500

Army Weapons Command will conduct advanced planning briefings for some 500 of the nation's industrial leaders Sept. 21 and 23.

The briefings, sponsored by AWC and the American Ordnance Association, will provide the executives with outlines of the long-range research and development programs related to the command's future weapons requirements.

The sessions will be held at Deere & Co.'s new Administrative Center on John Deere Rd., south of East Moline.

All industrial leaders attending are required to have "secret" clearance. Both sessions will be identical, with 250 at each.

Willis M. Hawkins, assistant secretary of the Army, will be the keynote speaker. Maj. Gen. Roland B. Anderson, commanding general of AWC, will speak, as will Maj. Gen. E. P. Mechling (retired), executive vice president of the American Ordnance Association.

Discussions Set

Presentations will be made by division heads of Weapons Command. Maj. Ernest E. Forrest Jr., research and development coordinator for the command, is project officer.

Question periods and panel discussions are planned.

The industrialists invited represent firms that do business with Weapons Command.

Each day's activities will end with a buffet at the Le-Claire Hotel, Moline.

Flu Vaccine Schedule Will Be Announced

Notices of the influenza immunization schedule for employees at the Arsenal will be sent out soon by the office of the post surgeon, Capt. Gordon A. Gress.

The injections will be given without charge to any employee at the installation who signed the special IBM cards distributed last month.

Only one injection will be given this year.

Council Pays Record Picnic Net, \$11,488

The 20th annual Rock Island Arsenal family picnic last month cost a net of \$11,488.71 in money of the Non-Appropriated Funds Council.

Over-all the costs totaled \$22,367.47. Receipts totaled \$10,878.76.

The difference is the amount paid by the council out of its fund—built of profits earned by the post restaurant.

Food was the biggest item, costing \$14,200.74. Entertainment cost \$6,187.50. Miscellaneous items accounted for the remaining \$1,979.23.

Food, Fun

Major items in the food budget are \$7,525 to the post restaurant, \$2,250 for ribs, \$1,512 for chicken and \$1,000 to Wes Cooper for the barbecue.

Entertainment's large items were \$2,200 for carnival rides and \$2,175 for fireworks.

The miscellaneous category is composed of \$822 for rain insurance, \$587 for workers and \$255 for tent rental.

With all of the bills paid, the council had a cash balance Sept. 1 of some \$8,500.

Eying the record crowd and budget of this year's picnic, the council has set a net budget of \$15,000 for the 1966 outing. It will be held the first Saturday in August.

Smile!

Who's the man behind the camera? For a clue, turn to pages 8 and 9. You'll find him among the people pictured there.

ZD Program Produces Possible \$\$ Winners

Impending retirement has done nothing to halt the flow of improvement suggestions from Carl W. Ohline of Arsenal Quality Assurance.

The latest from Ohline is a gauge improvement proposal tied in with the Arsenal's Zero Defects program.

He utilized the ZD program's Form O, designed for error cause removal proposals, to explain his

gauge improvement. The action may lead to a cash award.

For the Zero Defects Committee last week evaluated Ohline's proposal as applicable to the regular suggestion program. H. T. Ahlberg, Quality Assurance chief and committee chairman, said the members recommended submission of the idea as a suggestion.

Ohline, combat vehicle inspector foreman, designed and made at his home an easy-reading indicator attachment for the star gauge used to check the diameter of gun tubes.

Number 20

The foreman has until the end of next month, his age 70 retirement time, to prepare the suggestion form. It will be his suggestion number 20.

The other 19 won him

FASTER, BETTER—Carl W. Ohline, left, shows his boss, H. T. Ahlberg, Arsenal Quality Assurance chief, the indicator attachment he designed and made for the standard star gauge used to check accuracy of barrels. It's the latest in a series of innovations by Ohline, combat vehicle inspection foreman. Gauge device is in barrel of 4.2-inch mortar.

cash awards of from \$14 to \$85.

In addition, he has designed and made several fixtures that save many man hours of labor. He holds two letters of appreciation for excellent presentations as instructor in Quality Assurance training.

Additional recent Error Cause Removal submissions reported by the Zero Defects Committee are as follows:

Keith Wiese of SWERI-QA submitted two Form O's, each highlighting two distinct problems. In effect he identified four error causing conditions.

One recommended that a shop order be sent to the pattern maker when a pattern is made. This would assure inclusion of adequate

and proper target points for machining purposes thereby eliminating pattern rework and costly tooling problems.

The Zero Defects Committee recommended this idea, like Ohline's, be submitted through the regular suggestion plan.

Another of Wiese's problem identifications disclosed possible confusion and incorrect inventory by improper use of move tickets. This has been corrected.

Communications

The other problems identified by Wiese related to the identification of material to assure correct status and count and in the proper execution of move tickets. These problems also have been corrected.

William J. Walker of SWERI-QA defined a prob-

lem relative to communications between his department and another division which resulted in duplication of effort and sometimes lost or forgotten information. As a result communication channels and responsibilities have been sophisticated and redefined thereby eliminating the problem.

Carl Zimmerman of SWERI-QA defined a manufacturing problem and recommended a change in process to eliminate manufacture of defective shoulder screws. His recommendation was concurred in and the processing change was requested.

Capt. Stewart Takes Post of Judge Advocate

Army Weapons Command's judge advocate has departed for duty in Germany, from which his successor recently came.

Capt. David O. Wentz, judge advocate the last two years, will serve at Heidelberg in the judge advocate division of Hq., U. S. Army in Europe.

Captain Ronald B. Stewart, the new AWC judge advocate, had Stuttgart, Germany, as his last station.

Capt. Wentz and his wife resided in Moline. She will accompany him to Germany. He was assigned to AWC in June, 1963, after being graduated in 1962 from the University of Iowa College of Law.

During three years in Germany, Capt. Stewart was on the staff of the judge advocate of Hq., 7th Army. He served at various times as defense counsel, prosecutor and acting chief of military justice.

Capt. Stewart is serving his second hitch in the Army. He first served from Feb. 1954 to January, 1956, seeing duty as

CAPT. WENTZ

LEGAL OFFICER CHANGE—Capt. David O. Wentz, AWC judge advocate, has left for duty in Germany. His successor in the legal office is Capt. Ronald B. Stewart.

a tanker with a recon company in the 5th Infantry Division at Munich, Germany. He left the Army to return to the University of Kentucky where he received the

bachelor of science degree and later, in 1962, the bachelor of laws degree.

Capt. Stewart, his wife and two sons, 8 and 6, are living in Davenport.

MEL FOSTER CO., INC.

By RICHARD GAGE

The smug always get theirs. After chortling about wandering through the Canadian bush alone, armed with a .22 rifle, I was introduced to the facts of life by Life.

For a frightening account of what an aroused mother bear does to people, read the magazine's story about the mauling of three vacationers in Montana's Glacier National Park. I am a cured wanderer.

They tell me a guide in the Sioux Narrows region of Canada shoots bear with a .22 rifle as a regular thing. They don't mention it, but he no doubt has a grenade launcher in reserve.

* * *

Katie Schrempf of the Command quality assurance office has gotten the Non-Appropriated Funds Council its money back for that box of pig tails that showed up with the picnic ribs.

Katie read the tale of the tails in Target and, before the council took action, she kidded a meat company friend of hers. Turned out he was the right gent to kid. Because his company had furnished the ribs.

He is picking up the tails and giving the council its \$30 back.

* * *

Another tale out of the north woods—full of pathos. A hunter who really couldn't afford the trip went to Canada anyway. All alone, he bagged a beauty of a moose. With his little pocketknife, he removed the head and laboriously dragged the prize, all by himself, out to civilization.

And when he showed the head to a local pro in the business, he was told the sad news. He had nothing more than a horn hat stand. He'd cut the neck off a half-dozen inches too short.

It really happened.

Maj. Zumwalt To Ethiopia

A 15-month tour of duty in Ethiopia will begin early next month for Maj. Charles B. Zumwalt, the departing chief of Rock Island Arsenal's Comptroller and Programs Office.

After 10 days of schooling at Ft. Gordon, Georgia, Maj. Zumwalt will report in Ethiopia by Oct. 7 on assignment with the U. S. Military Assistance Advisory Group. He expects to leave the Quad-Cities about Sept. 25.

On Sept. 22, he will be honored at a farewell luncheon at noon at the Rocket Room. Reservations for the \$1.75 affair should be made by next Friday in the Comptroller and Programs office.

ROTC Grad

The officer came to the Arsenal in August, 1962, as chief of plans and programs. During the last year-and-a-half he also was comptroller.

Maj. Zumwalt entered the Army in 1943, and left in 1946, returning to class at Oregon State College. After graduation and receiving an ROTC commission in 1949, he re-entered the Army in 1949.

He served with the 1st Cavalry Division in Korea, 1950-51, and wears the combat infantryman's badge.

Mrs. Zumwalt and the couple's daughters, 6 and 12, will remain in Davenport during the major's overseas tour.

WAY OUT FRONT IN THIS EVENT!

America's standing in the world is something we all think about. So it's good to know that our nation is way out front in a very important measure of strength — electric power.

Take the top six nations of the world ranked in terms of the electricity they produce. The U.S.A. heads the list, with more electric power than the other five combined. And we have more than 2½ times as much as the Soviet Union.

Why are we so far out front?

You are one of the reasons—your interest in new things . . . your desire to live in a more satisfying way . . . your hopes for the future! This helps spur every business onward, including more than 300 American, investor-owned electric light and power companies — like Iowa-Illinois.

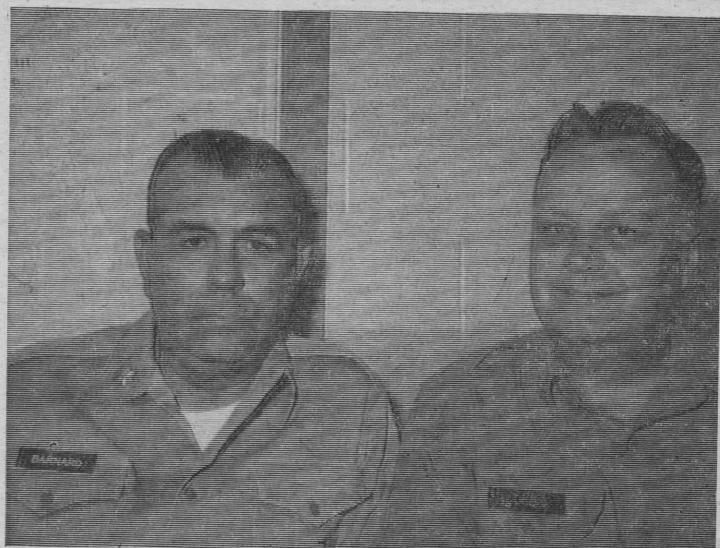

It is not by chance that Americans enjoy the greatest abundance of electricity in the world. The wants and wishes of people—provided for by business management working in a free economy — make a winning combination.

This way of doing the job assures you of plenty of dependable, low-priced gas and electric service now and in the years to come.

yours for better living

IOWA ILLINOIS
Gas and Electric Company

A Tax-Paying Investor-Owned Company with

TAKE P & P POSTS—Lt. Col. John M. Barnard, left, is chief of production planning in AWC Procurement and Production Directorate, while Lt. Col. Gladdon Loring is new chief of the procurement division.

Procurement Unit Officers Recent Returnees from Korea

Two officers who recently returned from Korea have assumed duty assignments with the AWC Procurement and Production Directorate.

Lt. Col. John M. Barnard, who received a direct commission in Europe during World War II, is chief of the directorate's production planning division.

Lt. Col. Gladdon Loring, veteran of two tours in Korea, is new deputy chief of the procurement division.

Japan, Germany, Too

Col. Barnard spent a year in Korea, where he was chief of the ammunition division of the 8th Army Support Command. Before that, in 1962-64, he was executive officer of the Cincinnati Procurement District.

In 1962, he received the MBA degree at the University of Chicago, at the conclusion of two years of study. During the preceding three years, he was ammunition officer for the U. S. Army, Japan.

He served at an ordnance supply depot in Germany, 1951-54.

A native of Waterloo, Iowa, Col. Barnard entered

the Army in 1942 as a private (first class). He was serving in Europe with an ordnance group when commissioned in March 1945. He left the Army later that year to complete studies for the BA at Iowa State Teachers College. In 1947, he returned to active duty with a regular Army commission.

Col. Barnard, his wife, son and two daughters reside in Davenport.

Bronze Star

Col. Loring spent the last two years as MAAG advisor in the Pusan area. During his first tour in Korea, 1951-52, he was awarded the Bronze Star for service with the 314th Ammunition Group.

During an assignment with the Defense Atomic Support Agency, Albuquerque, N. M., he performed quality assurance auditing and studied at the University of California, New Mexico and Connecticut. He served three years in missile procurement work in Germany, was officer in charge of the Charlotte, N. C., Ordnance Missile plant in 1956-57, and commanded the Twin-Cities Arsenal Minneapolis, before that.

Col. Loring entered the Army in 1941, was graduated from Officer Candidate school in 1942 and served in Europe with the 10th Armored Division. He left the Army in 1945 and returned to active duty in 1948.

Col. Loring lives in Bettendorf with his wife, daughter and son, who will resume studies at Fort Lewis College, Colorado.

Due on TV

Robin Harker, 11-year-old daughter of Herbert Harker, shop M tool grinder, will compete on the Ted Mack Amateur Hour Oct. 24 on Channel 4, WHBF-TV.

Robin, a dancing student since she was 4, was taped for the appearance on Sept. 1. She's a member of the Star Dusters dance team, which has appeared several times at functions at the Arsenal.

She is a sixth grader at McKinley School, East Moline.

Council Plans First Excursion To Pro Contest

The first pro football excursion to be sponsored by the Arsenal Non-Appropriated Funds Council is scheduled for Nov. 7.

A bus will take a maximum of 40 persons to St. Louis Cardinals-Pittsburgh Steelers game.

Everette Wildermuth, council chairman, said the price, \$12.50, includes bus fare and a reserved sideline seat.

The bus will leave the post restaurant at 6 a.m. and return to the Quad-Cities at 11 p.m. Game time will be 1:05 p.m.

Reservations can be made with any council member or Ray Reese, council fund custodian.

RIA Career Beckons to Moline Youth

For young Bob Mitchell, a Youth Opportunity job at Rock Island Arsenal proved to be the guidepost to a career in federal service.

The Moline youth last week left his summer job in the Comptroller's general accounting office. He's returning to the University of Iowa, where he is a senior in the College of Commerce.

But before he left, Mitchell checked into the possibilities for a regular job at the Arsenal after graduation. From the Personnel office he obtained information about the Federal Service Entrance examinations.

"I have the exam schedule and I'm pretty sure I'll try for a regular job here," he said. "I've checked into the possibilities and the benefits, and it looks pretty good to me."

Likes Computers

One thing that looks especially good to young Mitchell is the Arsenal use of computers, for that is the field he is aiming for. Computer programming will be one of his principal subjects during his final year at Iowa.

Bob was referred for one of the \$1.25-an-hour Youth Opportunity jobs by the Illinois State Employment Service. Because of his school background, he was put to work at basic chores in the accounting unit on the third floor of Bldg. 390.

A graduate of Moline High School, the youth attended Blackhawk College for two years before enrolling at Iowa. He is a son of Mr. and Mrs. Arthur E. Mitchell, 1611 12th Ave., Moline.

'WELL DONE'—Harold Sedrel, civilian personnel director, and Youth Opportunity Workers pause outside Bldg. 60, where Sedrel commended the young people for their work on the

Island during the summer. Youths gathered at a farewell meeting as the program neared its end.

Youths Praised for Jobs Well Done

Several dozen workers who sharply reduced the average age of Arsenal employees this summer are leaving the Island with words of praise for tasks well performed.

These are the "YOTS," the Youth Opportunity trainees hired under President Johnson's program to provide summertime work for youths.

Commends Efforts

By the time the last depart on Sept. 30, some 135 young people—ages 16 to 21—will have labored for the Arsenal or tenant agencies.

Appreciation for their efforts was voiced at a recent farewell ceremony attended by a group of the

youths in the Arsenal Personnel and Training auditorium. Harold Sedrel, civilian personnel director, commended the young workers.

At the same time, he noted that the Youth Opportunity program was timely for the Arsenal.

"We had no difficulty providing truly meaningful work," Sedrel said. He observed that the Mississippi River flood left plenty of cleanup work to be done on the Island.

A substantial number of

youths were put on cleanup detail in the roads and grounds branch of Installation Facilities.

500 Hours

Others worked in simple, light labor jobs for Depot Activity or Operations Divisions. Some worked in Arsenal offices or in offices of Army Weapons Command headquarters, or for AMETA, or PEQUA, or the AMC Installations and Facilities agency.

All received \$1.25 per hour. Those who work the

full term log between 500 and 525 hours.

As often as possible, the Youth Opportunity spaces were filled with boys and girls who needed work because of "economic or educational disadvantage," as requested by President Johnson.

All applicants were screened by the Illinois and Iowa state employment offices. Each side of the Mississippi provided about the same number of Youth Opportunity workers.

Mission of Photo Lab - - Help Everybody

Services Give Assist to All Island Tasks

It had to be a writer, of course, who first jotted down the observation that a picture is worth a thousand words. Photographers will insist they are too busy taking pictures to do much writing.

At the Arsenal photo lab, there is ample evidence to support the claim.

Henry Priebe's staff produces 114,000 photographic prints a year (fiscal 1965), as many as 9,000 of them in full color. Some special prints are as big as an open newspaper, and some even bigger.

The prints are made from some 54,000 negatives and transparencies exposed yearly (again, 1965).

There's much more in the way of "worked statistics" like for instance 255 100-foot rolls of microfilm shot and processed yearly, and several thousand feet of movies.

Staff of Nine

Virtually every phase of Arsenal activity - research, training, testing, planning—gets a vital assist from the photographic services.

It all represents the production of nine photo lab specialists headed by Priebe, who started as a labor boy on Labor Day 29 years ago at \$2.88 per day.

Things have progressed some distance since the photographic department was established before World War I.

Priebe recalls that as recently as 1949, the department had two photographers—him and George Kopp, now dead. In those days, Bill Pamperin was an off-set pressman in the printing and reproduction section. Pamperin now heads central reproduction, of which photo lab is a part.

But now in shop G quarters there is a lab staff of nine, and 15 cameras and 10 darkrooms. The facilities are capable of handling any photographic chore except processing of color movie film.

Extra Bit

Sooner or later, everybody at the Arsenal meets a man from photo lab — if only for the taking of an identification badge picture.

Badging this year required some 10,000 prints. But this was only an extra bit of production sandwiched into the day-to-day mission of the lab, which is to support all Arsenal and Weapons Command Hq. divisions as they pursue their own mission of developing the best in arms for American soldiers.

Drawings and prototype concepts are reproduced by the hundreds for research and devel-

READY TO SHOOT—Photographer Elmer Metzger of the Arsenal photo lab is ready to begin shooting "human engineering" studies of weapon loading techniques for prototype

branch of Research and Engineering Division. Camera is an Arriflex 16mm that can "slow down" action at 50 frames per second.

opment work. Movies provide means of analyzing actions of machinery parts and "human engineering" studies of men using machines. Weapons are photographed in action at the firing range.

Photo lab techniques can produce in three days tracings of drawings that used to take from 30 to 90 days by hand.

With a special "bore-scope" camera, the photographers obtain pictures of the interior parts of machines and guns, recording evidences of wear and potential failure. This camera technique was developed by Priebe and Monroe Fennel, former central reproduction chief, now retired.

The Weapons Command Information office draws heavily on the photo lab's resources to provide news pictures of command activities. Target photos, including all of those with this story, are photo lab products.

Close Behind

With his 29 years, Henry Priebe is the senior man in the department, but only slightly. Ed Schluez is close behind with 29 years.

Schluez is a specialist in operating the huge process camera which, with its 1220 mm lens and 40-by-50-inch back is capable of unusual feats. Used as a projector, the camera can throw an image 80 inches high by 12 feet long on wall-mounted photographic paper. Big pictures mounted in the post restaurant were made with this camera.

Elmer Metzger and Bob Adams are the veterans of the lab's "outside" photographers, with 15 years' service each. These two got the call when aerial shots were requested dur-

TEAM PLAY—Ray Culley is the photographer, second from right, in shooting of pictures for a manual on the .50-caliber machine gun. At right is Steve Peters, chief of the Test and Evaluation shop, scene of the work. Others are, from left, Morris Colehour, technical writer; Hollis Mordhorst, equipment specialist, and Jerry Pearson, technical illustrator.

ing the record Mississippi flood last spring.

The flood labors intervened in the lab's regular schedule to the tune of 800 negatives in color and black and white, 200 color slides, 2,500 feet of movies and perhaps 3,000 8-by-10-inch prints.

All lab photographers joined in the flood coverage, including Frank Stokes, who has 10 years at the lab; Bob De Vore, with 5 years and Ray Culley, 4 years.

Rounding out the force are Phyllis Quinn, with some 3 years' service, and Bill Ritter, microfilm specialist, with two years.

First Woman Wins Big Bore Rifle Match

Camp Perry, Ohio (AFPS)—Second Lieutenant Margaret Thompson (WAC) set a record here at the National Rifle and Pistol

'LOOK PLEASANT, PLEASE'—Frank Stokes is ready to fire the shutter of view camera used in studio section of photo lab. It's also Stokes on page one.

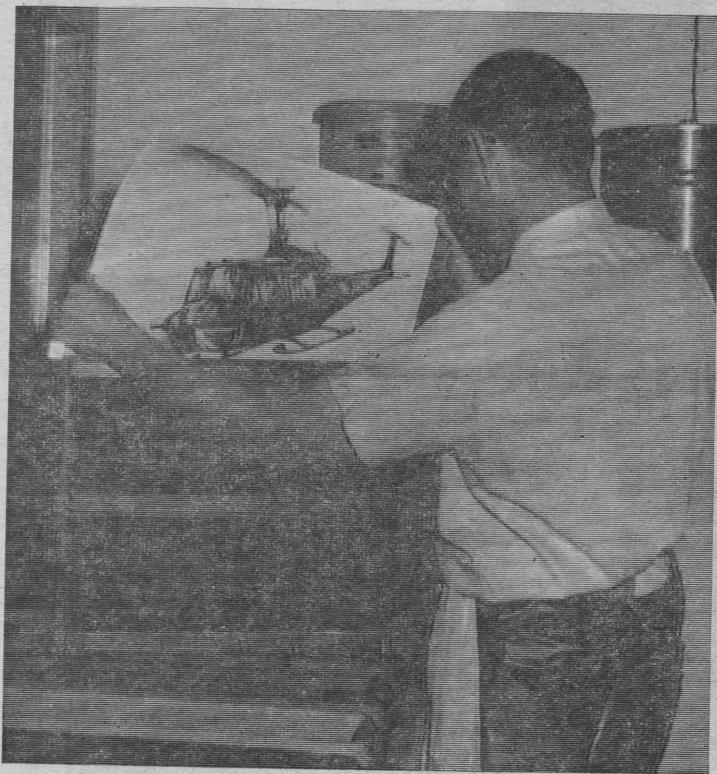

Matches when she became the Army Marksmanship the first woman to ever Training Unit, Ft. Benning, Ga., took top honors in the win the high power rifle match, now in its 61st year. Navy Cup Match with a Lieutenant Thompson, of score of 100-05V

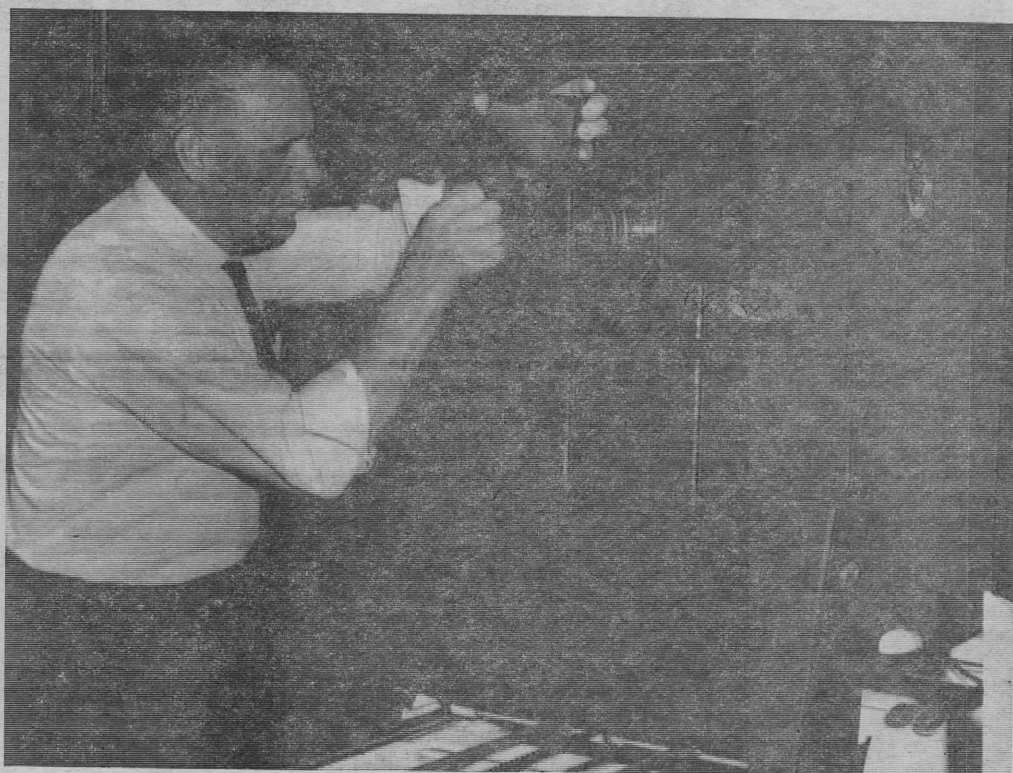

PRINT COMING UP—Phyllis Quinn slips negative into Omega enlarger in one of the photo lab's darkrooms. She's the only gal on lab staff.

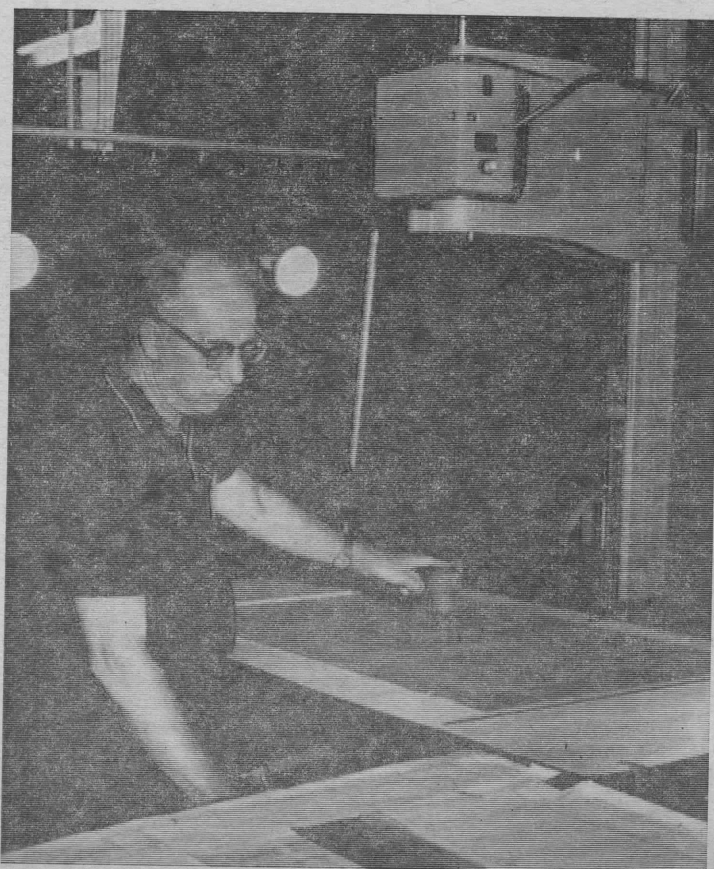

COLORFUL AND BIG—Henry Priebe, left, chief of the Arsenal photo lab, and his boss, Bill Pamperin, chief of central reproduction, examine a copy of helicopter painting from Research and Engineering.

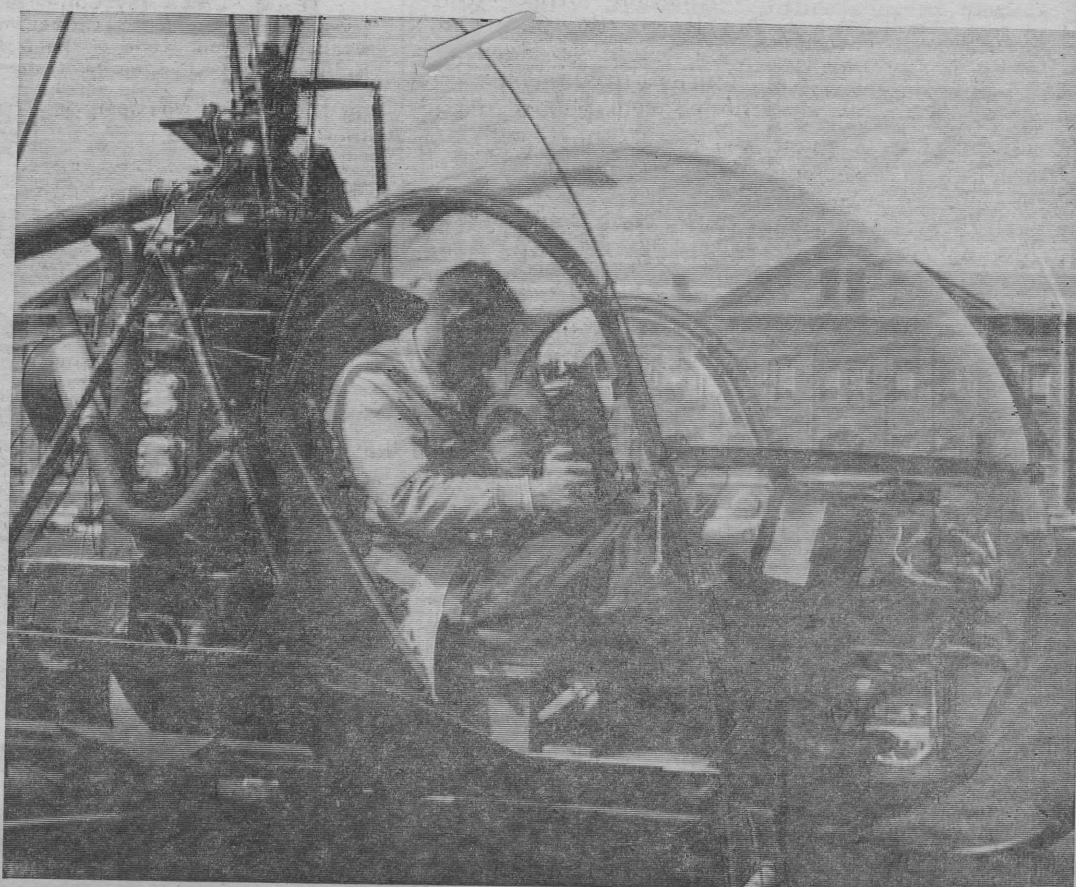

COLOR DEPARTMENT—Bob Adams examines a print in color processing darkroom. Print is a picture of a painting by Research and Engineering Division artist.

THE MONSTER—Ed Schluenz slips a filter over the 1220mm lens of huge apochromatic process camera. The negative back of the camera can accommodate film measuring 40-by-50 inches.

60,000 SHOTS—Photo lab's microfilm camera is operated by Bill Ritter. Some 60,000 drawings and documents are copied each year.

FOR THE HIGH VIEW—Elmer Metzger clutches his camera as helicopter is about to carry him aloft for aerial pictures of water-logged Arsenal Island during the flood last spring.

C. P. Simpson, Service Unit's Chief, Retires

One of Rock Island Arsenal's best known unit chiefs, Clifford P. "Sailor" Simpson of Depot Activity, retires today with 25 years service on the Island.

As head of the depot's service unit, Simpson has called the signals for operation of more than 100 pieces of materials handling equipment. His crew runs 74 fork lifts, for instance, and 28 tractors, plus a truck-mounted crane.

Simpson started in 1941 in supply work in Shop A. He came to the Depot Activity about five years later as chief inventory clerk, got into materials handling in 1948.

A resident of Green Rock, Simpson plans a trip to Oregon later this month.

One of the longer service records of August retirees was the 36 years-plus of Sylvester Mohr, procurement agent for the Arsenal. He ended duty officially on Aug. 31.

Thirty-Plus

Jesse G. DeReusse, bridge crane operator, retired on the same date with more than 30 years' service. Thirty-one years was posted by Donald Roberts of the Supply and Maintenance Directorate before his Aug. 15 retirement.

Other August retirees who topped the quarter-century mark in service are Joseph M. DePorter, rubber products fabricator, 25 years-plus, and David E. Berg, chauffeur for Arsenal transportation, and Clarence A. Olson, machine repairer, more than 25 years each. Walter S. Good, machine tool operator, hit 26 years.

The August list also includes:

Everette R. Hamilton, production controller, 23 years; Burl T. Yeager, machine tool operator, 20 years; Elma B. Viner, optical elements cementer, Robert O. Short, cabinet abrasive blaster, and James R. Schneider, production machine operator, 17 years each; Lillian M. Smith, supply clerk, 16 years; Oliver H. Jones, warehouseman, 15 years, and Walter W. Taylor, painter, 13 years.

Autumn's in Arsenal Air, Plans Afoot

With the fall season formally welcomed by the "Aloha Autumn" dinner dance, plans are being perfected for other social events in busy coming weeks at Rock Island Arsenal.

The Rocket Room will once again be the scene when Arsenal Research and Engineering Division is host for a dance Sept. 25.

Officers club members and guests will dance to the music of the Classics. The affair will be one of the series of 10 held monthly in the fall and winter, with organization in the hands of the Officers Open Mess.

Still in the planning stage is the autumn highlight, the Arsenal fall formal to be held Oct. 16 at the Golf Club. Col. Paul A. Nilsson, arsenal commanding officer, and Mrs. Nilsson will be host and hostess.

Earlier, the Officers Wives Club will open its autumn activities with the first luncheon of the season Sept. 21 in the Rocket Room.

Hostesses will be Mrs. John M. Gilligan and Mrs. C. E. Fowler. The program

WELCOME AUTUMN—Dorothy Pate of the graphics branch of AWC Comptroller's office captured in pen and ink the fun of the "Aloha Autumn" dance held at the Rocket Room Aug. 28. The affair was a colorful beginning for the round of fall social events on the Island.

will feature presentations on the many social, cultural and civic activities available in the Quad-Cities.

Bull's Eyes

Kay Baggott of Arsenal transportation is back in circulation after a week of treatment at Mercy Hospital, Davenport.

Bob Oberhaus of typewriter repair will be in the Chordbusters chorus when the Davenport chapter of the Society for the Preservation and Encouragement of Barber Shop Quartet Singing in America sponsors the Holiday in Harmony quartet show Sept. 25 at the Masonic Temple.

Wedding bells have been ringing in the Supply and Maintenance Directorate for the following:

SFC W. B. Eastin, of small arms division, NMP, and Wilma Hall, general supply assistant in the mutual security office; married Aug. 21.

Janet Young, clerk-steno in the program budget of-

fice, and B. Verschoore, Rock Island; married Sept. 4.

Cleo McClure, supply clerk, and John Sobin, Carbon Cliff; married Aug. 31.

E. C. Westerdahl, supervisory general supply specialist, NICP, had surgery at Moline Public Hospital this week. He'll be recuperating at home in Moline for four weeks.

Mrs. Helen Kellog's mother, Mrs. Henry Meckel of Davenport, passed away last week. Mrs. Kellog works in the financial inventory management office, NICP, of the Supply and Maintenance Directorate.

Rock Island Arsenal is losing its Sweetheart. Cay

Dannacher, Sweetheart winner at the 1964 spring dance, leaves the AWC Comptroller's office next week to take a new job in Chicago. She'll work for the vice president of an insurance company.

Ruby Gilmore of the post restaurant office left Saturday on a 4-week trip to Europe and the Middle East, including the Holy Land.

Eva Schaeffer of Mail and Records is proving to friends she really got around during a week in Washington, D. C. She produces a copy of the "Washington Observer" that carries a picture of her and "Mr. President." It's a photo of Eva and traveling companions with a rather stiff likeness of LBJ, in the National Wax Museum. The "newspaper" is printed there, too.

THE SUBJECT: SAFETY—Directors of safety at arsenals of Army Weapons Command huddle to study sketches during their annual conference at Rock Island Arsenal. Seated in center is Fred Bishoff, Washington, D.C., safety director for Army Materiel Command. He is flanked by James R. Sampson, AWC safety chief, right, and Frank McGinnis, director at Watervliet Arsenal. Standing are, from left, John Campbell, assistant to Sampson; Lyman Pevey, director at Springfield Armory, and John LeFever, RIA safety director.

—Frank Stokes Photo

What to do until an emergency happens

Emergencies have practically no sense of fair play. And almost always pick the worst possible time to happen.

People seem to prefer the day your insurance lapses to trip on your sidewalk, for example.

And the car usually waits until your bank account registers empty before demanding expensive repairs.

There's no fighting it. But you can be ready. By tucking away some reserve funds in U.S. Savings Bonds.

Bonds, themselves, are emergency proof. You can't lose the money you invest in them, even if fire, flood,

robbers or plain carelessness causes you to lose the Bonds.

And when something expensive happens, you can just take them in to any bank and get yourself solvent again.

In the meantime, Uncle Sam uses your Bond dollars to handle other urgent matters, like taking care of your freedom.

Buy Bonds where you bank or on the Payroll Savings Plan where you work. Get yourself really prepared and you might even discourage a few emergencies from ever happening.

Keep freedom in your future with

U. S. SAVINGS BONDS

AWC Tops in Safety, But Goal is, Improve

The outstanding safety record of Army Weapons Command, best in the Army, is the tough target handed to AWC safety directors for the year ahead.

Fred Bishoff, safety director for Army Materiel Command, spelled out the Weapons Command goal at meetings at Rock Island Arsenal:

Improve by 10 per cent during fiscal year 1966.

To do this, AWC people will have to reduce accident injuries to less than one for each million man hours of operations.

Bishoff attended the fourth annual Weapons Command safety conference, called by James R. Sampson, AWC safety director. Sessions were held last week in Building 60.

During a meeting with Maj. Gen. Roland B. Anderson, AWC commanding general, Bishoff reported that Materiel Command had the best safety record in the Department of Army, and Weapons Command's record was the best in AMC.

No Let Up

Nevertheless, Bishoff said, the 10 per cent reduction goal applies to AWC as well as all other subcommands of Materiel Command.

Gen. Anderson declared that the record was accomplished by command-wide efforts and that there would not be any letting up.

The AWC injury frequency rate for fiscal

1965 was 1.0, according to Sampson. This represents one injury per million man hours of operation.

Materiel Command had a frequency rate of 1.3.

In all government activities combined during the year, the rate was 7.0. All U.S. industry had a combined rate of 6.2.

Cost Yardstick

Measured in dollar cost, AWC's safety record was equally impressive. The command accident cost per person was \$1.88. In Materiel Command it was \$26.41.

The conference discussions featured reviews of the past year and recommended programs for FY 1966. Special plans were outlined for training, education and general promotion of the safety effort.

In the review, emphasis was placed on the safety of AWC mission end products. Sampson said the command could take particular pride in the safety built into the weapons produced and managed by the three AWC installations.

Bishoff's discussions with the command and arsenal directors laid stress on acceptance of greater responsibility in safety work by subcommands of AWC. This is in line with Materiel Command's program of decentralizing safety management.

All-Arsenal Golfers Swinging to Trophy Rounds Sept. 19 at Club

With the 109 starters cut to 20, the second annual All-Arsenal Golf Tournament is rolling toward a showdown Sept. 19.

That's the Sunday finals matches will be played at the Arsenal Golf Club course.

Chairman Bob Schertz of the tournament committee said finalists in the four men's flights and the women's division will begin teeing off at 2 p.m.

Trophy Ceremony

Trophies will be presented in a ceremony at the commanding officer's office at 10 a.m. the next day, Sept. 20.

Quarterfinals matches were to be played by yesterday, Sept. 9, and the semifinals deadline is Sept. 16—next Thursday.

In the championship flight, the four semifinalists were logged on the chart a week ago, with young Sp4 Jerry Cochran labeled as the man to beat.

Winner of the 1964 Arsenal Military Tournament, Cochran nudged aside quarterfinal opponent Will Veroveen of the Arsenal lab, 1-up.

In the semifinals, Cochran was matched against Bob Martin of Supply and Maintenance Directorate.

The flight's other semifinals match paired two S & M men, Tom Maas and Marvin Anderson.

Playing a four-round schedule, 18-holes less than the others, the championship flight reached semifinals while flights A, B and C were at quarterfinals.

Four Gals Left

C flight posted one semifinalist—Allen Gustafson of the Sheridan project manager's office. He defeated Dan Seeley of operations divisions in his last outing.

In the women's handicap tourney, however, four rounds also are the rule, and semifinalists were known early.

Ethel Pickerel (9) of Arsenal Operations Division was matched against Mary Haubeil (8) of the Arsenal lab., Virginia Champion (10) of Combat Vehicles was to meet Wilmina Edwards (16) of Supply and Maintenance.

Of the flight winners in last year's All-Arsenal tourney, only one survived into quarterfinals play. Charles Woolverton, who was C flight champion, was still alive at the Target's deadline, competing this time in B flight.

The hard-hitting Cochran, winner of the Saukie Golf Course championship a month ago, was the only military survivor. Lt. Col. John M. Gilligan, Maj. Herbert Underwood and Lt. Bob Garretson lost in first-round play.

Watching Now

All members of the tournament committee likewise have been sidelined.

Hitters and a Miss

Top golfers of the AWC Management Science League reach for trophies held by Charlene Vaccaro, whose dad couldn't be present for the picture. The winners are, from left, Bill Vaughn, champ of the MS tournament; John A. Kerman, first runnerup in the league's regular season, and Bob Pruden, regular season champion. Charlene, secretary to the AWC information chief, Lt. Col. Wm. W. Hutt, stood in for her father, Charles Vaccaro, M-60 project manager's representative, who was second runnerup in the league. Duane Freking, tournament runnerup, also was absent. —Bob DeVore Photo

Chairman Bob Schertz extended Norman Teter to the 19th hole before losing in a second-round match in B flight.

Other committeemen contestants, all in the championship flight, were Will Veroveen, dropped by Cochran; and Fred Novekoff and John Post. Novekoff was eliminated by Post in the first round, and Bob Martin defeated Post a few days later.

Here are results posted by Target's deadline:

CHAMPIONSHIP CHAMPIONSHIP

First Round

J. Cochran over W. Babb, 2-up.

W. Veroveen over P. Palos, 1-up.

J. Post over F. Novekoff.

B. Martin over J. Kahlke, forfeit.

T. Maas over J. Cline, 1-up.

C. Adams over B. Hansen, 2 and 1.

A. Palos over A. Rose, forfeit.

M. Anderson over R. Larson, 4 and 3.

Second Round

Cochran over Veroveen, 1-up.

Martin over Post.

Maas over Adams, 3 and 2.

Anderson over Palos, 7 and 6.

Core over Hensley, 3 and 2.

Employees' Best

Winners of the RIA Employees Golf Club League are a happy trio as they get together for a picture. From left, they are Warren Peterson, Frank Zecchini and Ed Venckus.

Study Pairings For Military Golf Tourney

Play will begin late this month in the Arsenal military handicap golf tournament.

At the Target's deadline for this issue, the tournament committee was studying pairings. Fifteen entries had been received and more were considered certain.

The tournament will be a combined match play-handicap affair. There'll be trophies for first and second places and for consolation.

In addition, a medalist trophy will be awarded for the low score for the first 18 holes, handicap not considered. The medalist's name will be engraved on the AWC-RIA rotating trophy.

Members of the tournament committee are Lt. Col. Arthur E. Detrick, chief of the AWC transportation office; Lt. Col. John M. Gilligan, Arsenal executive officer, and Lt. Col. Charles W. Martin, secretary of the AWC general staff.

Golfers without a handicap, or without any basis for a handicap, will be assigned one that fits their stated golf experience.

Peek at Pluto Is Scheduled in 2000

AFPS—Dr. Robert Gilruth, director of the National Aeronautics and Space Administration Manned Spacecraft Center, believes that man may land on Mars in the late 1970s or early 1980s.

In the meantime, NASA experts are studying ways and means of reaching other planets in the solar system on a schedule that extends to the year 2000.

The Timetable

An unmanned fly-by of Venus is projected for 1970 to 1971; a manned flight to Mars from 1979 to 1980; an unmanned fly-by or landing for Mercury from 1975 to 1980; and unmanned fly-by of Ceres, largest of the asteroids, in 1976; an unmanned fly-by of Jupiter from 1981 to 1982; an unmanned fly-by of Saturn from 1986 to 1988; an unmanned fly-by of Uranus from 1987 to 1988; an unmanned fly-by of Neptune from 1996 to 1998 and an unmanned fly-by of Pluto in the year 2000.

Wittrock over Vaccaro, 3 and 2.

Third Round

Gustafson over Seeley, forfeit.
