Army awards AMC units for maintenance excellence

REDSTONE ARSENAL, Ala. – Several Army Materiel Command units and organizations were recently recognized by the Chief of Staff of the Army for their exceptional support to warfighters in the Army Logistics Award Program for fiscal year 2025. The Army Award for Maintenance Excellence program recognizes exceptional maintenance programs implemented by the Army. The winners and runners up were recognized during the 2025 Sustainment Week in May at Fort Lee, Virginia.

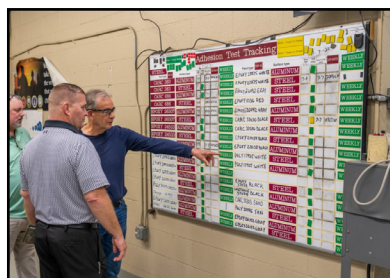

Command ceremony brings new faces to ASC

ROCK ISLAND ARSENAL, Ill. – With the crack of cannon fire filling the air and passing of the colors as a crowd of spectators watched, U.S. Army Sustainment Command welcomed a new command team. Maj. Gen. Eric Shirley formally assumed command of ASC during a ceremony held July 10 at Rock Island Arsenal, the location of ASC's headquarters. The event also marked the change of responsibility for Command Sgt. Maj. Jason Gusman, who now serves as ASC's command sergeant major.

AMC leadership commends USASAC on FMS work

NEW CUMBERLAND, Pa. – U.S. Army Security Assistance Command provided an organizational update to Lt. Gen. Chris Mohan, Army Materiel Command deputy commanding general and acting commander, July 9. In his opening comments, Mohan said he was looking forward to the briefing and discussing the “significant issues that face our country and the Security Assistance Enterprise, because countries who want our equipment become our allies, and they become closer allies, but they also have options.”

TYAD first federal entity to earn corrosion accreditation

TOBYHANNA, Pa. – Tobyhanna Army Depot is the first government organization to earn accreditation through the Association for Material Protection and Performance. After an audit from Jul. 9-10, Tobyhanna obtained AMPP's QP1 accreditation, which certifies excellence in steel work and field coating applications; the QP3 accreditation, which certifies excellence in shop coating applications; and the AS3-ITO accreditation, which certifies excellence in training courses and facilities.

CECOM answers the call for continuous transformation

ABERDEEN PROVING GROUND, Md. – In December 2024, U.S. Army Communications-Electronics Command established the CECOM Transformation Directorate, a new headquarters element with a two-pronged overarching focus: identifying transformative efforts within CECOM and interpreting the Army's continuous transformation strategy to predict how CECOM's expertise can make an impact for the Army. With over 9,000 Soldiers, civilians and contractors, CECOM works globally as the Army's integrator of C5ISR and medical materiel.

Irvine visits Fort Belvoir to champion Warfighter Wellness

FORT BELVOIR, Va. – July 10, Chef Robert Irvine, longtime advocate for military health and wellness, visited Fort Belvoir to engage with Service members on issues of nutrition, fitness and quality of life. A longtime partner with the Department of Defense, Irvine has traveled extensively across the Army to speak with Soldiers, assess on-post dining programs, and help reimagine how the military fuels its most important asset – its people.

EBS-C goes live, modernizing Army ammunition

FORT BELVOIR, Va. – The Army's Enterprise Business Systems – Convergence program achieved a major milestone July 9th, delivering distribution and supply planning capabilities for Class V conventional ammunition to pilot users at the Army's Joint Munitions Command and Installation Management Command. The EBS-C team delivered the capability more than two and a half months ahead of schedule.

Magazine depth wins wars: the future of NATO's arsenal

WIESBADEN, Germany – A strong defense isn't solely about the quantity of weapons stockpiled, but the ability to adapt and rapidly produce what's needed, experts asserted at the LANDEURO 2025 conference today. A panel discussion focused on the critical need for broadened production within NATO to secure global supply chains, enhance interoperability, and bolster strategic flexibility.

Fort Benning bolsters security with installation technology

FORT BENNING, Ga. – Across Fort Benning, Mobile Security Units are deployed as dynamic force multipliers for the Directorate of Emergency Services. Equipped with 360-degree cameras, flashing lights, two-way audio systems and more, these agile units serve as the eyes and ears of DES, providing visibility and awareness in areas where traditional patrols may not always be present.

Sustainment Warrant Officers celebrate 107 years

FORT LEE, Va. – Sustainment warrant officers, the technical foundation of the Army for 107 years, celebrated their heritage July 9. The United States Army Warrant Officer Corps was officially established on that date in 1918, though its lineage extends to the medieval and renaissance eras. The U.S. Army Combined Arms Support Command celebrated with a team building event, professional development discussion and birthday cake cutting.

Transforming sustainment for the future fight

REDSTONE ARSENAL, Ala. – We live in a world marked by rapid technological advancements and increasingly complex threats, and the Army stands at a critical juncture as our nation enters an accelerated rebalancing of competitiveness and resources. To maintain our military dominance, we must continuously transform and evolve to deliver ready combat power to the joint force.
