# SWASHBUCKLER'S BALL RETURNS TO KWAJALEIN YACHT CLUB FOR FUN, ANNUAL ISLAND TRADITION

### HOURGLASS REPORT

### By Anthony Carnelli, Story Writer

On Sunday, November 2, the Kwajalein Yacht Club transformed into a pirate haven as most of the adults on Kwajalein gathered for the Annual Swashbuckler's Ball. The event, which has been a tradition dating back to the 1970s, saw attendees dressed in pirate costumes of their choice for what has become one of the island's biggest celebrations.

"The Swashbuckler's Ball is easily one of the most anticipated events that the Kwajalein Yacht Club stages every year," said attendee and the island's Aquatics Supervisor Cliff Pryor. "It is an adult-only event that allows us to change our appearance and attitude. It grants us an opportunity to release, refresh, and get rejuvenated."

This year's gathering maintained the event's long-standing format as a large fun celebration on the island. The

tradition, now spanning more than five decades, strongly encourages all attendees to arrive in a pirate costume, which the participants embrace with varying degrees of creativity and commitment. The large crowds of people in fanciful pirate costumes created a distinctive atmosphere at the yacht club, with some attendees taking their costume choices to more extremes than others.

The venue itself was decorated to match the pirate theme. Skulls and crossbones adorned the space, setting the scene for the evening's festivities. A live band provided, which proved to be particularly special for the occasion since they have not had one for a long time, kept entertainment for the crowd, keeping the energy high throughout the night. The combination of music, themed decorations, and costumed attendees created the celebratory atmosphere that has made this event a cornerstone of island social life.

"It's been years since we've had a band at the Swash-buckler's, and it worked out really," said Tim Roberge an organizer and attendee. "The horn section made a huge difference."

For those in attendance, the evening offered opportunities to socialize with friends. The 21-and-up age requirement ensured the event remains an adult-focused celebration, allowing participants to fully embrace the party atmosphere that has characterized the ball since its 40-plus year inception.

The yacht club's approach to the event — making it donation-based like their other functions throughout the year — helps bring the community together and generates funds to cover the costs of putting on the event. This model has sustained the tradition for decades, making it a highlight for many.

As the 2025 Swashbuckler's Ball concluded, it added an-

other successful chapter to this long-running island tradition. The event continues to demonstrate how a simple concept —adults in pirate costumes gathering, can become an enduring and beloved community institution.

The Yacht Club's Annual Swashbuckler's Ball will return next year, continuing its tradition of bringing the Kwajalein community together for pirates and fun. As Pryor puts it — "the event never fails to amaze and entertain with its over-the-top decorating, live band, and general "let your hair down" vibe. It isn't the type of party that you normally find on the mainland. That is what makes it so special. It is uniquely "Kwaj."

### COMMUNITY

# KEEPING KWAJALEIN AND ROI NAMUR FLOWING: THE PEOPLE BEHIND THE ISLAND'S HIDDEN SYSTEM

### HOURGLASS REPORT

### By Annette Monk; Story Writer

Most island residents rarely think about what happens after they flush a toilet or drain a sink. On Kwajalein and Roi-Namur, that everyday action triggers a chain of behind-the-scenes work that's vital to island life — a process guided by the steady hands and cool heads of the Wastewater Management team.

Each day, these professionals quietly safeguard public health and the environment by keeping the island's wastewater treatment systems running — often under conditions that would test even the most seasoned operator.

At the center of this operation is Andre Andrews, Wastewater Management Manager, who has spent nearly two decades managing complex systems from Iraq to Kuwait before finding his way to the Marshall Islands. "I've been in the game almost 19 years," he says with a matter-of-fact ease. "Water, wastewater, fuel, garbage — I've done it all. But this? This is home now."

Andre arrived on Kwajalein five years ago from his hometown of Miami, Florida. He came into a system that was still finding its structure. "When I first got here," he recalls, "there wasn't that full structure yet. Over time, we had to build that — the structure, the program, the discipline. Now we've got it and a team built on trust and training."

Under Andre's leadership, the wastewater team includes technicians like Craig Crofton on Roi and Hayward Turner, a new arrival who joined just three weeks ago. Andre's management style is hands-on but rooted in mentorship. "Coming from the field myself," he says, "it used to be hard for me to delegate. I was used to doing the work. But now I've learned to trust the team — to let them learn, make mistakes, and grow."

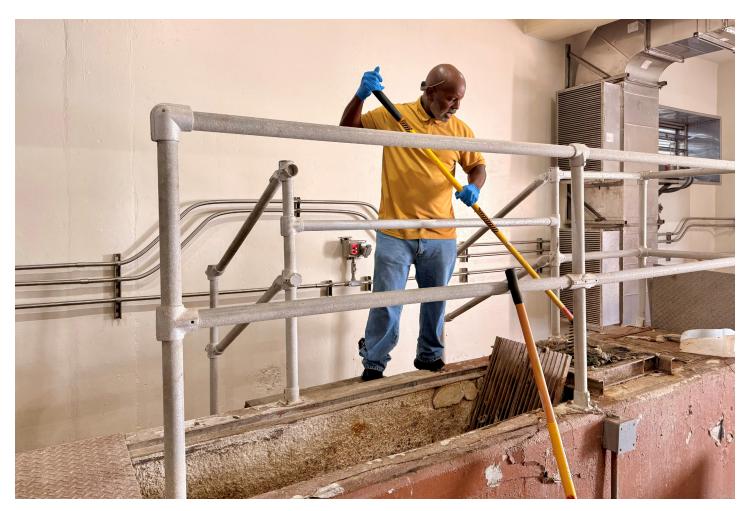

He gestures toward his crew with visible pride. "My job is to make sure everyone can step into anyone else's shoes at any time. If Craig's out, someone else can fill in. Everyone here is cross trained. That's how we stay ready."

That philosophy is what keeps the island's wastewater system — a patchwork of pumps, lift stations, and aging infrastructure — running smoothly despite the chal-

lenges of isolation, limited resources, and harsh marine conditions.

The rhythm of a work-day Roi-Namur begins early. At sunrise, Craig walks the perimeter of the wastewater plant, listening for the low hum of pumps and the soft chug of aerators. Each sound — a hiss, a vibration, a pause — tells him something about the system's health. "They have to listen," Andre explains. "If it doesn't sound right, it's not right. You can't just look. You have to hear the system."

If everything's running smoothly, the team follows its routine: inspecting lift stations, checking manholes, and flushing lines to prevent blockages. Their trucks move across the island, a reassuring sign that unseen work is

being done to keep the island running clean and safely.

"Most of the time, it's routine," Andre says. "But when things go down — a pump, a float switch, or the vacuum truck — it can get chaotic fast. You're talking thousands of gallons of water that still need to move."

That's when Andre's calm demeanor makes all the difference. His crew jokes that his favorite phrase during a crisis is, "Hold on, the world's not about to end."

Craig laughs when asked about it. "We'll have a system alarm going off or a pump down, and Andre just keeps us cool. There's always a plan B or C. You need someone like that when the stakes are high."

The wastewater plant on Roi is more than 50 years old — a system that's been repaired, retrofitted, and reimagined over time. "In the States," Andre notes, "they'd replace a plant like this after twenty years. Here, we've had to keep it alive — piece by piece."

When he arrived, many systems were offline or in need of overhaul. "All we had was Craig and a phone," he recalls with a grin. "No trucks, no tools, not much to work with. But we built it up slowly — trained local staff, repaired what we could, and made it work."

Now, the team oversees everything from wastewater collection and treatment to incineration and medical waste disposal. "It's all under one umbrella," Andre explains. "Our goal is to make sure nothing leaves this island without being handled safely and responsibly."

That stewardship matters on a fragile atoll where the ocean is never far away. Every drop of water must be treated before it reenters the environment, ensuring that the lagoon — the same water families swim and fish in — stays clean.

For Andre, the job is about more than managing a utility — it's about shaping people and leading with purpose. "The most rewarding part?" he says. "Giving the younger guys a chance to grow. Helping them find their confidence. Letting them make mistakes and learn from them without tearing them down."

He smiles as he glances toward Hayward, who nods appreciatively. "Being here has opened my eyes to a better opportunity," Hayward adds. "It's a place to grow, to challenge yourself. Every day, I learn something new."

That kind of mentorship doesn't go unnoticed. Craig, who's worked under Andre for years, calls him a steady leader. "He's passionate and detailed. Even when things get tough, he keeps everyone level-headed. We've all learned from that."

Andre doesn't think much about recognition but more about the legacy he wants to leave behind. In fact, this is the first time in his five years on island that someone's asked to highlight his department's work. "People always ask where the drinking water comes from," he says. "But no one asks where the water goes after. That's our part — the unseen side of keeping the island safe."

He hopes the culture of teamwork and pride he's built continues long after he's gone. "When it's over, it's over," he says simply. "But I hope they keep what I taught them — how to keep cool, keep things running right, and teach others to do the same."

Outside of work, Andre keeps a low profile. "Truthfully," he admits, "I'm a stay-athome person. My joy is seeing these guys thrive. That's why I'm here."

For most island residents, the wastewater team remains invisible — their work hidden beneath manhole covers and behind fenced gates. But their impact is everywhere: in the clean beaches, the safe groundwater, the functioning homes and workplaces.

Every hum of a pump and swirl of aerated water represents a small victory — proof of human ingenuity and care in one of the most remote communities on Earth.

As the sun sets over the lagoon, Andre's team finishes their rounds. They log the day's readings, inspect the pumps one last time, and share a few easy laughs before heading home. Tomorrow, they'll do it all again — quietly, skillfully, and with the

same unshakable calm that keeps Kwaj and Roi flowing.

Author's Note

Visiting the wastewater plant on Kwajalein reminded me how many hands and hearts quietly sustain our island life. What struck me most wasn't the machinery or the technical detail — it was the people.

Andre, with his calm leadership and deep sense of purpose, speaks of his work not as a job but as a trust. Craig's quiet dedication and Hayward's enthusiasm as the newest member show what pride looks like when no one is watching. Together, they carry a responsibility that's both scientific and profoundly human — to protect the place we all call home.

Out here, surrounded by ocean, there's no "away" for our waste to go. Everything cycles back through the same fragile ecosystem we depend on. Watching this teamwork — methodically, patiently, with a sense of duty and care — reminded me that environmental stewardship isn't just policy or infrastructure. It's people.

Every clean drop of water that returns safely to the sea is a small act of guardianship — one that makes Kwajalein and Roi not only livable, but sustainable.

Beyond the day-to-day operations, the details tell a larger story — one of innovation, care, and teamwork that helps sustain life on a small island surrounded by sea.

Did You Know? - Quick Facts About Roi and Kwajalein's Wastewater System

Nothing goes to waste: Each island's wastewater plant treats all residential and industrial wastewater on-island, returning clean effluence safely back to the environment.

Local stewardship: Operators perform daily sampling and testing to ensure water meets environmental standards before discharge.

Smart design: The system uses aeration basins where naturally occurring bacteria break down waste — a process that mirrors how nature cleans water in wetlands.

Small footprint, big impact: Despite serving a small population, Roi's facility handles 25,000 -30,000 thousands of gallons per day while Kwajalein handles 250,000 - 300,000 thousands of gallons per day, ensuring the lagoon and groundwater remain healthy.

Recycling water: Portions of treated water are sometimes used for non-potable applications, reducing freshwater demand on the atoll.

Continuous improvement: Maintenance teams regularly inspect pumps, motors, and clarifiers — keeping the system running efficiently in a harsh salt-air environment.

Shared mission: Every operator plays a role in protecting Roi and Kwajalein's

delicate marine ecosystem — where clean water truly connects everyone. ▼

### **Kwaj Grief Support Group**

The journey through grief can feel overwhelming, especially when faced alone. Our **Grief Support Group** offers a safe, understanding space for anyone who has experienced the loss of a loved one. Here, you can share your story, listen to others who are walking a similar path, and find comfort in knowing you are not alone.

Register open now through for the fall session

Session runs Sept 22<sup>nd</sup> -Dec 22<sup>nd</sup> 2025

Day/time: Monday evenings 6 to 7:30 pm

Location: George Seitz Elementary School~ Coconut Room

Email: Amy Blakey blakeya@kwajaleinschools.org

# COMMUNITY FINDING HER FOOTING: NEW SCHOOL READING SPECIALIST EMBRACES ISLAND LIFE, WHILE LENDING A HAND

### HOURGLASS REPORT

By Anthony Carnelli; Story Writer

After arriving on Kwajalein, reading specialist Jill Spagnolo is embracing the adventure, which involves pitching in wherever she's needed at her work home George Seitz Elementary School.

It's Spagnolo's first time here, and she's already enthusiastically embracing the community feel where people help each other in a caring manner. Her primary role is assisting students experiencing challenges keeping up with the class reading curriculum and their peers. She notes that it's not necessarily because a child has a learning

disability. "A lot of times it just takes a little longer," she said, "and sometimes there are kids who just have to study a little harder."

Spagnolo joined the school this fall as a K-12 reading specialist, also known as a reading interventionist supporting students who need extra time to build skills and confidence. She will also be helping teachers implement the new Core Knowledge Language Arts/Amplify (CKLA) (K-5) English curriculum that the school recently purchased. On a small island where many people sometimes must wear more than one hat in their role, her mission is both simple and

intentional — keep reading progress moving and jump in where an extra set of hands keeps the day on track.

Spagnolo notes that even though some children that may be struggling to keep pace with grade-level expectations, this doesn't always signal a disability, but it does require targeted support and patience. "It can be hard for the parents because they don't know what to do," she said. "It's also hard for the kids because if they know they're behind, they don't feel smart. A lot of times it just doesn't have anything to do with intelligence."

However, she finds even the small wins with them

very rewarding, "I specifically love working with kids who have reading difficulties and seeing the gains they make," Spagnolo says. Those gains, she adds, are often quiet and cumulative: stamina during a longer passage, a smoother read-aloud, a smile when comprehension clicks. For families balancing work and school, even small wins matter."

Spagnolo finds fulfillment with her work, but like others who move to more remote locations like Kwajalein, Spagnolo is quickly learning that outside factors can delay things like supplies shipments and staffing. While the school waits for an additional teaching staff, she has been stepping into the classroom to teach fifth and sixth grade students. This directly draws on her 15-plus years of teaching experience along with a bachelor's degree in elementary and middle school education from the University of Wisconsin. "I've heard more than one person say they came for a specific role but were asked to help in other areas," she said. "When I'm in that situation, I keep a positive outlook and I'm absolutely happy and willing to

step in."

The support, she adds, has been consistent. "I have to say that Amy Blakely and Jerrod Gertsema have been great," Spagnolo noted of the district's superintendent and school's principal. "They're seeing what I need and they're happy that I'm here. They've been extremely positive, and that's been really nice and refreshing. I feel like I have their support, and they

want me to be successful."

Spagnolo also mentioned that she has a strong sense of adventure and an open mind about island living. She quickly found more to do than she had expected on land and in the water. "I was very surprised with all the different things you can do and resources available on the island," she said. "They seem to make things easily accessible for people who live

here. I also love being in the water — doing things like swimming and snorkeling. I'm looking forward to being outside quite a bit."

For Spagnolo, Kwajalein renews her sense of adventure. It is not her first overseas chapter: she served two years in the Peace Corps in Malawi, Africa working with the national parks and wildlife department on resource management and environmental education. Reflecting on that service, plus visits to her brother in Vietnam and seeing her two daughters live independently in college, reignited her desire to step outside her comfort zone and be more independent.

For now, Spagnolo is focused on steady progress one student, one chapter at a time. "I feel like I only have so many years left to really go overseas and do these kinds of things," she said. So, I wanted to have a year to experience this and live life to the fullest. This time will help me decide what my priorities are." On Kwajalein, that looks like showing up, pitching in, and making sure every student gets help with a path forward, regardless of the hat she wears on any given day.

## **COMMUNITY**

# THE ART OF STEEL: A WELDER'S JOURNEY FROM CALIFORNIA TO KWAJALEIN

HOURGLASS REPORT

### By Isaiah Matthews; Story Writer

When most people think of art, they picture canvases, brushes, and galleries — not torches, steel, and sparks. But for Daniel Davis, a seasoned welder from California, every weld tells a story, and every project reflects craftsmanship, pride, and purpose.

"Welding is definitely a form of art," he said. "You [a welder] take abstract pieces of metal, map out a vision. There is an aspect of craftsmanship. Even people who know nothing about it can look at a well-laid structure and weld and appreciate the integrity of the structure."

Originally from the California Bay Area and later Florida, Davis spent years in the automotive world before

discovering another craft to add to his repertoire: metalwork. As a heavy line technician and car restorer, he was already used to grease, grit, and long hours under the hood — but welding brought something new: versatility. He found not only was he naturally inclined toward the craft, but his certifications would be internationally recognized — an incentive for a man with plans to travel the world.

"There's a therapeutic aspect to it," he said. "I get into a flow; it's quiet. You get to process things. The way I do my work — that's how I carry myself in life, to a standard. And within that, this craft is a form of self-expression. A lesson my first instructor taught me, that I now teach — 'You lay bad welds and people get

hurt."

His first welding project wasn't in a shipyard or industrial plant — it was a seat bracket for a Nissan 240 S14 conversion, a job he completed while apprenticing at a custom shop. That small start launched a career that would eventually take him across the globe, welding everything from classic car frames to maritime and Navy vessels, as well as commercial structures on earthquake fault lines.

"When I look back at a project and know the inspector's coming, I feel proud. That's my art. That's my signature."

With a shelf full of welding certifications — from dual-shield and arc welding to aluminum, stainless, and pipe — he's built an arsenal of skills that few in his trade can match. But even with his

expertise, Kwajalein offered a new kind of challenge - and opportunity.

He first heard about the island through a friend he met on a job site. Like most good welders, word of mouth is the bridge to the next adventure. He was hesitant at first, unsure about uprooting again. But fate had other plans.

"A recruiter kept calling, and finally I just said, alright, let's do it," he said with a laugh. "I packed up my apartment, put everything in storage, and came out here. I figured I'd see where it takes me."

His first impression of Kwajalein was a mix of curiosity and calm. "It's small," he recalled, "but really cool. I've been all over — Everett, Honolulu, San Diego — so I just wanted to fall into my groove here and get to work."

Today, he's part of the Marine Department, a mission-critical team that maintains the island's fleet of U.S. Army Watercraft, one of the largest in the Army — the lifelines that keep Kwajalein running. From transporting supplies and personnel to ensuring the base's infrastructure remains operational, these ships are the unseen heartbeat of the atoll.

"When those vessels go down, half the island stops," Davis explained. "If the Marine Department doesn't move, the Dining Facility doesn't get food, the stores can't open — everything shuts down. So what we do, it matters, even if most people don't see it."

"People ride the ferry and have no idea I helped rebuild it," Davis exclaimed proudly. "Sometimes people will tell me in passing that they took the catamaran or ferry to another island. I laugh and tell them — yeah, I built that. That's my work right under vour feet."

He's worked on U.S. Navy carriers, destroyers, barges, ferries, catamarans, and cargo vessels, often rebuilding hulls and reinforcing structures that keep the island connected. His craftsmanship supports not just the mission — but the daily life of everyone on Kwajalein.

Beyond the welding bay, found camaraderie among his team — a bond forged in struggle, heat, and

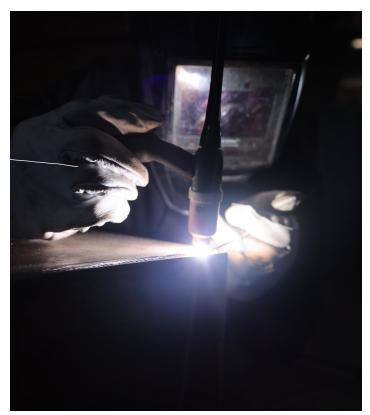

As for what's next, he's transitioning to sustaining his livelihood in finance. In the meantime, as opportunity has presented itself, he's setting his sights on underwater welding certification — something that blends his technical skills with his newfound love for diving.

"The dive team's been great — they've already let me suit up and go under," he said. "That's the next level for me."

After years in the trade, his goals have evolved beyond the spark and steel. He's looking toward teaching, inspecting, and eventually earning his welding educator certification. But even as he dreams forward, his gratitude remains grounded.

"God is good," Davis stated simply. "This craft gave me everything - peace, purpose, and the chance to build something that lasts."

PETS - We continue to engage with higher headquarters to resolve the current pet travel policy issues. The government shutdown slowed things down, but we remain engaged. Updates will be pushed as soon as we have them.

Added Ferry Runs - The Marine Department will be doing a test of added Ferry Runs to Ebeye Starting Dec 1<sup>st</sup> till Dec 20<sup>th.</sup> The two added runs will be at 9am and 1 pm going to Ebeye. Once the test runs are complete, the Marine Dept will do an appraisal to see if they will be permanent.

Green Water - The water treatment plant has assured us that the green water being seen in the toilets and other non potable areas is normal. They are shifting water from some outside tanks which have some algae buildup, leading to the green water.

Newcomers – The next Newcomers Orientation is scheduled for mid-January time frame. We are working to refine and further develop the Newcomers program to ensure much needed information is presented and passed on to those on their way and currently living on Kwajalein Atoll. More details to follow.

Next Vet Visit - Will be in January, until then the Vettech can still be reached at: 480-2017 for pet questions or concerns.

# Flu Season and Shots - The flu clinics are

scheduled for Sat Nov 15, 2025 and Tue Nov 18, 2025 from 2pm - 6pm for 18 years and older. Flu clinics for ages 17 years and under will be scheduled at a later date. Flu shots by appointments can also be made for 2pm-4pm Tues through Sat. Call 480-2223/2224

**Private Boats -** Owners of Private boats need to call the Small Boat Marina 480-3643 to ensure they are aware of your boat and IF you have a mooring. If you have a boat, it is prudent to make sure they have it registered.

Airfield Stops - The airfield stop signs on the perimeter road are there for a reason! Come to a full stop look BOTH ways before proceeding.

Vehicle Safety - Make sure your TDY and personal visitors know and follow the safety rules when it come to carts and other vehicles.

Oceanside Marine Survey - The Ocean Voyager will be conducting Marine Surveys off the shoreline on ocean side.

AAFES is Hiring - Details at

www.applymyexchange.com

BQ Inspections - USAG-KA will be conducting a 100% DOW Mandated BQ inspection. Inspections will begin Tuesday Nov 18<sup>th</sup> with Sands BQ.

ARMA - If you need something fixed in your housing, BQ or Office use the ARMA system: <u>ARMA</u>
<a href="https://www.armymaintenance.com/arma">https://www.armymaintenance.com/arma</a> or call 480-3550

Boat Cpt Class - The next MWR Boat Cpt Class will be Nov 17<sup>th</sup> - 18<sup>th</sup> 5:30pm MWR Library Register at the Small Boat Marina.

Private Boat Mooring Lines - Are you a private boat owner and have your boat on a mooring? Please ensure your mooring lines are doing their jobs and keeping your boat in place.

HAZMAT Items - Household hazardous waste:

Separate out household hazardous waste (flammables, corrosives, aerosols, etc.) and place in an individual containers next to the trash bins.

DSC ATM - The DSC ATM issues are still being worked to get the machine back online.

# Mosquito Fogging- Fogging is scheduled for

5:30pm -7:30pm on 18, 19, and 20 Nov on Kwajalein and 21 Nov on Roi-Namur. Avoid the area for up to 30 minutes after.

Caring for Carlos - The KHS National Honor Society is currently working to obtain solar energy supply for Carlos. Keep an eye out in the community for more info.

Outrigger Kitchen - The Outrigger kitchen will soon be getting an overhaul—prepare your tastebuds!!

Surfway Repairs — Cooler and freezer repairs in the Surfway. Keep moving forward and you should see the results soon.

Containers - Do you have a container on the Atoll?

Matson, Company Storage, or even boat yard. DPW needs to know.

Email: <a href="mailto:usarmy.bucholz.smdc.list.shipping-receiving@army.mil">usarmy.bucholz.smdc.list.shipping-receiving@army.mil</a>

**Dental** - If you have been putting off getting dental done due to the x-ray issues, the replacement of Panorex X-ray complete.

New Bike Racks - Are being built for various locations around the community.

**Events** - As always, Kwajalein events can be found on the Kwajalein Community Events FB Page. Some things coming up are:

- Fall Craft Fair is this Sunday the 16<sup>th</sup> in the CRC Gym from 12 3pm
- Commander's Call 22 Nov 4pm at the Ocean View
- KSS Event Turkey Bowl at the MP room Nov 27, 9 1130am
- Marshallese Trade Fair will be Nov 30<sup>th</sup> 3-7pm Dec 1<sup>st</sup> 9am-2pm in the CRC Gym. More details to follow soon.
- Pallet Trees Pallet Tree Lot Opens Dec 1<sup>st</sup>, Voting for best decorated "trees" ends on 19 Dec. Lot will be located on Lagoon Road, in front of Brandon Field.

If you know of other upcoming events that you would like to share, please email me at <a href="mailto:sherman.hogue.civ@army.mil">sherman.hogue.civ@army.mil</a> so it can be added here.

### **Kwajalein Reclaimed Water Standard Violation**

The Reclaimed Water System Document of Environmental Protection (DEP) requires public notification when the standards for reclaimed water are not met. On 12 and 13 November 2025, the 7-day rolling turbidity average in the reclaimed water system entry point of distribution and within the distribution system measured above the 2.0 Nephelometric Turbidity Units (NTUs) standard. Turbidity is the cloudiness or haziness of a liquid caused by particles that are generally invisible to the naked eye. Due to maintenance activities on the reclaimed water storage tanks, the non-potable water may slightly appear with a green tint. Since reclaimed water is non-potable, no health-based restrictions on the normal use (irrigation, vehicle washing, etc) of reclaimed water are necessary. There is no threat to public health or the environment resulting from this turbidity exceedance. Questions? Contact V2X Environmental at 480-0722.

# Notary services are Available!

Documents for notarization must generally be of U.S. origin or intended for use within the United States, with limited exceptions.

Only one appointment is required for multiple documents.

The fee for each notarial service (notarial seal) is \$50 USD.

Please email consmajuro@state.gov for an appointment.

# **ALWAYS CALL...**

...if your building's Fire Alarm is sounding

### **E-wareness: Stormwater Pollution Prevention**

Stormwater discharges are a significant source of pollutants. Stormwater can become polluted as it flows over contaminated surfaces. This leads to contamination of lagoon waters and potential damage to corals and other marine species.

What can you do?

- Good housekeeping
- Preventive maintenance on vehicles and equipment
- Maintain spill prevention and quick response supplies
- Preserve sediment erosion control
- Manage storm water runoff
- Employee training

For more information on stormwater pollution prevention or training opportunities, contact V2X Environmental at 480-0722.

### Do your part to eliminate mosquitoes:

- · Check for standing water where mosquitoes breed
- Dump any accumulated water at least weekly
- Manage vegetation and eliminate accumulated leaves

### Do your part to eliminate flies:

- Do not add food waste directly into open trash cans such as the Emon Beach trash containers, large black trash cans, or residential green trash receptacles.
- Always seal food and animal waste inside trash/plastic bags before adding to trash cans.
- Periodically clean outdoor trash receptacles.

Dump standing water

### Fogging Schedule

- 5:30-7:30 P.M.
- Roi Namur: Nov. 21, 2025, Dec. 19, 2025
- Kwajalein: Nov. 18, 19, & 20, Dec. 16, 17 & 18, 2025
- Weather dependent
- Avoid fogged area for ~30 minutes

### Fogging with Eco-friendly EcoVia EC Insecticide

- Liquid botanical oil insecticide
- Active ingredients include Thyme Oil & Rosemary Oil
- Safe to use in and around homes and near water
- Safe to use around children and pets

# Kwajalein Community!!

Surfway is recalling all butchered pork sold at the store on 7 October 2025. We have been made aware of a cut of meat from a pig that was affected by some sort of infection and want to ensure no other cuts of meat from this animal are consumed. Affected product is pork that was cut from and packaged at the store and not retail packaged pork from the frozen section. All returns will be accepted with or without receipt.

# **RECALL NOTICE!!**

Kwajalein Community, the Hillshire Brands Company, a Haltom City, Tex. establishment, is recalling approximately 58,000,000 pounds of corn dog and sausage on a stick products that may be contaminated with extraneous material, specifically pieces of wood embedded in the batter. This includes State Fair Beef Hot Dogs Wrapped In a Honey Sweetened Batter sold at Surfway. All affected products have been pulled from the store. Please check your freezers at home. If you have any product with the following expiration dates; 1/20/2026, 1/27/2026, 2/12/2026, 3/2/2026, 3/4/2026, 5/20/2026, 5/25/2026, please return to Surfway for a full refund, no receipt required.

## Kwajalein Island Trash & Recycling

 Residential Trash Collection
 480-1760

 Yard Vegetation Collection
 480-1890

 Hazardous Waste Pickup Line
 480-8858

#### TRASH & RECYCLING PICKUP SCHEDULE

The Green Residential TRASH receptacles are collected every Tuesday and Friday.

The blue RECYCLE bins are also collected every Tuesday and Friday.

The large black General Solid Waste Community Containers are emptied on Monday, Wednesday, Thursday, and Saturday.

Safety First! Please keep any curious children away from the Compactor Truck as it feeds contents into the truck.

Recyclable materials are also collected by both solid waste and horizontal maintenance personnel, in conjunction with general trash collection. Currently the island only recycles glass, aluminum, metal, and bulk organic materials. Cardboard and plastics are not recycled materials on Kwajalein. These items should be placed into the general trash stream for disposal/incineration.

Residential users will be given a green trash receptacle and a smaller blue receptacle for recyclable materials. It is requested that residences place their recyclable items into the blue containers, and stack larger materials next to the bins. Lawn clippings and leaves should be bagged and placed next to bins. Palm fronds and occounts should also be stacked up next to the bins for removal by horizontal maintenance personnel.

## FLU SEASON

- The Medical Team has two flu clinics scheduled for Saturday November 15, 2025 and Tuesday November 18, 2025 from 2pm - 6pm for 19 years and older.
- Flu clinic for ages 18 years and under will be scheduled at a later date, pending receipt of supplies for pediatric population.
- Flu shots can also be scheduled by appointment from 2pm-4pm Tuesdays through Saturdays. Call 480-2223/2224

Now Available by Appointment...

## PASSPORT PHOTO SERVICES

Located on the 2nd floor of Bldg. 805 on Kwajalein. When taking your photo, remember the following guidance for a successful shoot:

- · Directly face the camera without tilting your head.
- Have a neutral facial expression with both eyes open and mouth closed.
- Take off your eyeglasses, headphones or wireless hands-free device.
- Do not wear a uniform, clothing that looks like a uniform, or camouflage.
- Remove hats or head coverings or submit a signed statement or doctor's note that says you must wear it for religious or medical purposes.

To schedule an appointment, contact IMD/AVD personnel at:

KwajaleinHourglass@gov2x.com

# **OPERATION: "Santa"**

Effective 15 Sept 25, USPS will begin accepting letters at Post Offices as part of the 2025 USPS Operation Santa Program. USPS Operation Santa is a program where individuals can adopt letters written to Santa Claus and fulfill the wishes of the letter writers. Participants simply write a letter to "Santa", put in an envelope with their return address, affix First-Class Postage to the envelope, and mail it to Santa's official Postal Service Address:

Santa Claus 123 Elf Road North Pole, 88888

Stamped envelopes mailed to Santa's Postal Service address, or even stamped envelopes addressed simply to "Santa", are processed at a central location where the letters are opened, reviewed for content, redacted, and uploaded onto the USPSOperationSanta.com website.

# **COMMUNITY CLASSIFIEDS**

# Submit Announcements to the Roller Channel and The Kwajalein Hourglass

OPEN CALL FOR ANNOUNCEMENTS The island community is invited to submit listings for events and for sale items; announcements; department trainings; safety updates; public service messages; and thank-you messages.

Preparing Your Message

For questions about your messaging, please reach out to the USAG-KA Public Affairs Office at 480-4848.

Ads should always include a point of contact, phone number and/or email address.

Private parties, fundraisers and events requesting and/or accepting donations are typically not allowed for publication per AR 360-1. Fundraisers and support activities for private and schools-based organizations, scouting groups, civic clubs and other listings may be subject to a legal counsel review to determine their eligibility for publication.

Formatting Your Listings
It is recommended that graphical adver-

tisements and announcements intended for the Hourglass and the AFN Roller Channel be formatted as PowerPoint slides.

Graphic designers are asked to maintain a generous margin (.75-1-inch) around all sides and to size fonts no smaller than pt. 20.

If your Roller Channel advertisement requires a special expiration date, please note this for the Roller team in the body of your message.

Deadlines for Submissions

Send advertisements for the Kwajalein Hourglass and the AFN Roller Channel to kwajaleinhourglass@gov2x.com on Wednesdays by close of business/Thursday morning.

Roller Channel ads are accepted on a rolling basis by 4 p.m. for a mid-week and late-week update. Ads received after 4 p.m. will be loaded in the next update. Please ensure you submit ads in good time to ensure timely upload.

For more information, reach out to the USAG-KA Command team through the USAG-KA Facebook page.

### **ANNOUNCEMENTS**

AFH Construction Is Ongoing. Nan, Inc. Construction is scheduled to commence the telecommunication scope of work for the Kwajalein Army Family Housing project in our community. Residents and commuters should be aware of possible changes in traffic patterns and to plan their routes accordingly. Nan, Inc. Construction is committed to minimizing any inconveniences, and we will strive to ensure a smooth and efficient construction process.

ArMA. Log in to ArMa, the Army Maintenance Application, to report issues for all buildings maintained by the Department of Public Works. Contact Public Works at 480-3550.

CAC Office. Before your visit to the Common Access Card Office, ensure all paperwork is completed by your human resources representative before making an appointment. Bring two forms of government-issued IDs with you. Walkin appointments are welcome, but there may be a wait. CAC Office Hours, Bldg. 835, are Tuesday – Saturday, 8 a.m. – 4 p.m.; (Lunch: noon - 1 p.m.). Call 480-8496.

Demolition at the Capt. Louis S. Zamperini Dining Facility. Phase three of the Zamperini DFAC demo has begun and is projected to be finished March 2026 for the dining and serving area. Be careful around the dining facility during the phases.

Do Not Take Cultural Artifacts. It is illegal to remove cultural resources from the atoll. This includes any protected species, unexploded ordnance, WWII-era artifacts and ancient Marshallese artifacts. These resources are protected under U.S. federal and RMI law. Contact the Kwajalein Archaeology Office at 480-8867.

# **WEEKLY TROPICAL WEATHER THREAT OUTLOOK**

RTS WEATHER STATION STAFF

### **Discussion**:

At this point in November, we have received 1.4 inches putting us 2.7 inches below normal. So far in 2025, we have only received about 67 inches of precipitation, which is just over 12 inches below normal for the year. Expect greater shower coverage starting tomorrow heavy at times with ENE-E-ESE troughing in the winds and elevated shower coverage running through the weekend. We experienced no thunderstorm days last week. A thunderstorm day is defined as an "in situ" lightning strike within five miles of the weather station or thunder heard. We are looking at a more elevated thunderstorm risk tomorrow early morning, the overnight on Saturday with the greatest risk through Sunday evening due to good upper-level conditions. The Madden/ Iulian Oscillation's (MIO) remains well established on the positive side and will be conducive to greater shower coverage. The Intertropical Convergence Zone (ITCZ) is well established across the southern RMI and is contributing to the higher winds and the east to west troughing across the area. The El Nino Southern Oscillation (ENSO) is in la Nina conditions for our part of the Pacific. This means sea-surface temperatures (SST) between the RMI and the Date Line are cooler, having a negative impact on the RMI's rainfall coverage. A strong MJO will counteract some of the negative impact.

### **Tropical Cyclones**:

None for the RMI. Guam saw a TC pass to the southwest of the island last night.

### <u>Damaging West Winds /</u> <u>Westerly Swell</u>:

Low risk.

### Swell / Tide Inundation for Kwajalein Atoll and Wake Island:

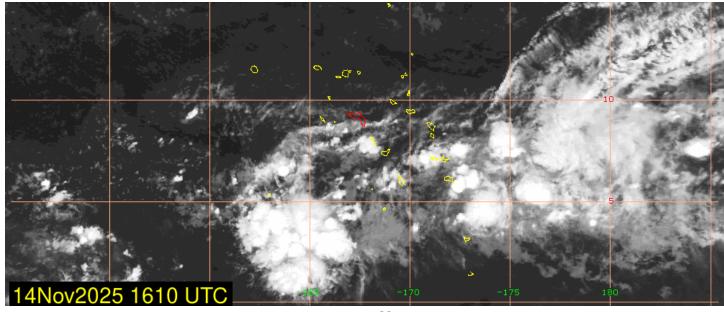

The waning half-moon was yesterday with its neap tide which will see high tides below four feet until the 18th. Winds: will be higher than what one would expect in November and stronger on the open lagoon, mostly out of an ENE-E-ESE in the middle teens, lower when out of the southeast. Monday and going into the early workweek will see the highest winds into the low 20s for periods leading to a possible SCA. During peri-

ods of heavy showers, gusty outflow winds are possible, leading to the possible issuance of a Small Craft Advisory (SCA) in the lagoon for a short period. High Surf Advisory (HSA) are not anticipated for the next seven days.

### Purpose:

This weekly briefing is delivered Thursday mornings to island leadership. The intention of this briefing is to provide situational awareness of weather events that may interrupt operations and transportation around Kwajalein, to/from Hawaii and Guam, and in the Wake vicinity. The main threat assessed in this brief is existing and potential development of tropical cyclone activity. This brief also provides an outlook of abnormal winds, sea state, and precipitation guidance for next 7 days around the Kwajalein Atoll. The distribution list will also receive updates on any developing tropical cyclone activity in the Kwajalein region that occur between the weekly outlook product.

# WEATHER

### RTS WEATHER STATION STAFF

### WEATHER DISCUSSION

Relatively dry weather can be expected across the atoll as we wrap up the workweek today. Heading into the weekend, occasional showery weather is likely and will begin as early as tonight with a trade wind trough that will approach from the east. Sunday afternoon into Sunday night is expected to be the wettest stretch with improving conditions by Monday. Heavier showers will be possible with the passage of the trough. Thunderstorm risk will also be a bit more elevated due to a favorable upper-level environment created by a nearby Tropical Upper Tropospheric Trough (TÛTT). Winds during this stretch will remain northeasterly in the low-mid teens. Drier weather will take over by Monday afternoon, making for a pleasant end to the weekend. Next week is likely to start off relatively dry before a northward shift in the Inter-Tropical Convergence Zone (ITCZ) brings us back to unsettled weather by Wednesday and through the middle of the week. WInds will still generally be in the low-mid teens on Tuesday, with a potential brief surge into the upper-teens with the approach of the ITCZ associated trough on Wednesday. Moderate to fresh winds can be expected next week, a sign of our windy season approaching.

### **SATURDAY**

Partly sunny with stray showers. Winds NE-E at 10–15 knots with higher gusts possible near showers.

### **SUNDAY**

Partly to mostly cloudy with widely scattered showers and stray thunderstorms. Winds NE-E at 9-14 knots with higher gusts possible near showers.

#### **MONDAY**

Partly sunny with isolated showers in the morning, decreasing to stray showers by noon with a possible stray thunderstorm. Winds NE-E at 10-15 knots with higher
