Army leaders chart path to transform, sustain OIB

REDSTONE ARSENAL, Ala. – Army Materiel Command brought together leaders from the Organic Industrial Base and the broader sustainment and acquisition communities to ensure the OIB remains viable and ready to meet the demands of future conflict. “We are at a pivotal moment for the Army’s OIB,” said Lt. Gen. Gavin Lawrence, AMC deputy commanding general, during opening comments. “Never have I seen so much focus and attention on the Army’s OIB, all for the right reasons, and right now we have a real window of opportunity.”

Campus-Style Dining comes to Fort Carson

FORT CARSON, Colo. – Stack Ivy Warrior Restaurant closed its doors Dec. 8, 2025, for renovations in preparation for Army’s Campus-Style Dining Venture pilot which will provide Soldiers with a more flexible eating schedule and healthier food options. “Campus-Style Dining is an initiative to provide warfighters the healthiest meal options possible in an environment that’s different than any other Ivy Warrior Restaurant,” said Sgt. Maj. Kevin Rainey, Fort Carson food program manager. The initiative aims to solve common challenges with the Soldier dining experience.

JRTC brings industry, experts together to support TiC

FORT POLK, La. – Fort Polk and the Joint Readiness Training Center hosted their first Innovation Industrial Conference, January 14-15, bringing together defense industry vendors and Army modernization experts to support efforts to modernize JRTC’s Transformation in Contact initiative. Representatives from several Department of War organizations also attended, including Army Materiel Command, Army G-3, Army Reserve Command G-3/4, First Army Training and the Joint Counter-Small Unmanned Aircraft Systems University. More than 40 defense industry vendors from across the country participated.

Fort Buchanan's infrastructure upgrades advance readiness

FORT BUCHANAN, Puerto Rico – Construction of a modern operations center is underway at Fort Buchanan, representing a significant investment in infrastructure that further develops command-and-control capabilities and enhances mission readiness across the Caribbean. The approximately \$30 million operations center will provide critical facilities to support units assigned to the 1st Mission Support Command and improve the installation’s ability to enable, sustain and deploy forces. “It’s important to mention the economic investment for two reasons,” said Col. John Samples, commander of Fort Buchanan, during a recent interview.

CECOM enhances ILSC with new Medical Systems Directorate

ABERDEEN PROVING GROUND, Md. – Embracing its role as the life-cycle management command for medical materiel, Communications-Electronics Command’s Integrated Logistics Support Center added the new Medical Systems Directorate to its portfolio on October 1, 2025. As part of the Secretary of War’s initiative to enhance organizational design, increase capability, and improve efficiency, the Army Medical Logistics Command ILSC was realigned to the CECOM ILSC as the Medical Systems Directorate. MSD personnel will continue to execute life cycle management of medical systems.
