Composite manufacturing of UH-60 tail fins at CCAD

CORPUS CHRISTI, Texas – Corpus Christi Army Depot pioneered the use of 3D printing to manufacture replacement tail fins for the UH-60 Black Hawk's Crashworthy External Fuel System. The fin frequently becomes damaged during loading, removal or landing. If damaged, the part is deemed destroyed, and the aircraft is inoperable. Composites are the future in Army Aviation, and CCAD has about 30 composite artisans.

ANMC completes armor tile maintenance mission

ANNISTON, Ala. – The Anniston Munitions Center has completed an almost decade-long mission to refurbish three types of reactive armor tiles for combat vehicles. RATs play a vital role on a wide range of Army wheeled and tracked platforms, providing essential protection against credible enemy threats and safeguarding the Soldiers who operate them.

AIAM tool making strides in FY26

ABERDEEN PROVING GROUND, Md. – After a highly successful initial fielding to Department of the Army Common Access Card holders, the Artificial Intelligence-Assisted Maintenance tool is now officially going live. This move will expand its availability to other branches of the armed services and introduce a suite of powerful upgrades poised to redefine maintenance support at the point of need.

Enterprise contracts make the Army more agile

ABERDEEN PROVING GROUND, Md. – The U.S. Army is optimizing its procurement strategy to leverage enterprise-wide buying power through the expanded use of enterprise contracts, while maintaining a competitive environment where vendors still compete for Army requirements. Enterprise contracts allow the government to purchase large quantities of tech or services under a single unified contract.

Port operations support Korean Rotational Force

BUSAN, Republic of Korea – At the port, readiness begins with movement. Lines of military vehicles, containers and equipment drove down the ramp of the U.S. Naval Ship Watkins and onto the pier as Soldiers carried out port operations supporting the Korean Rotational Force mission. The operation ensures a smooth transition between rotating U.S. Army brigade combat teams on the Korean Peninsula.

WCAP athletes, coaches show competitive spirit

CORTINA D'AMPEZZO, Italy – The U.S. Army was well represented on the international stage in the 2026 Winter Olympics. Eight Soldier-Athletes, two of whom were alternates and three Soldier-Coaches from the U.S. Army World Class Athlete Program competed for the U.S. in the following competitions: biathlon, bobsled, Nordic combined and pairs figure skating.
