### Secretary of Army visits Pine Bluff Arsenal

PINE BLUFF ARSENAL, Ark. – The Secretary of the Army, Dan Driscoll, visited Pine Bluff Arsenal, a key component of the Army's Organic Industrial Base, March 12. "There is nothing more important than spending our time fixing places like Pine Bluff and investing in the American Workforce. This will allow us to scale at a moment's notice with all the tools of war we need," Driscoll, said.

### AUSA: AMC to talk industrial might, modern feeding

REDSTONE ARSENAL, Ala. – Experts from around the Army and industry will come together to address what the service is doing to "Delivering Victory: Leveraging the Army's Industrial Might," during the Association of the U.S. Army's Global Force Symposium and Exhibition, March 24-26. The symposium will feature a variety of in-depth discussions including an Army Materiel Command-led keynote.

### Panelists to discuss how Army Civilians drive change

REDSTONE ARSENAL, Ala. – The U.S. Army is modernizing to ensure its soldiers are equipped, trained and ready for any environment. Army civilians are central to this modernization. To highlight these efforts, the Army will host a panel, "Leading Department of the Army Civilians Through Continuous Transformation," March 24 at the Association of the U.S. Army's Global Force Symposium and Exhibition.

### 834th Trans Bn and 4th ID Soldiers focus on mission

SAN DIEGO – Chief Warrant Officer 2 Jacob Bunting from the 834th Transportation Battalion is the officer in charge of moving more than 1,000 pieces of equipment, including Strykers, for the 4th Infantry Division whose 1st Brigade is returning from a Korea deployment and needs to reset their equipment quickly at Fort Carson, Colorado, for their next mission.

### SIAD rail team slashes vehicle loading time by 85%

SIERRA ARMY DEPOT, Calif. – A simple, innovative tool designed by the Logistics Support Directorate's Internal Rail team has revolutionized a critical process at Sierra Army Depot. Previously, centering a multi-ton Bradley Fighting Vehicle or M1A1 tank on a railcar was a meticulous, high stakes balancing act. The process required team members to manually push and pull the suspended vehicle.

### SAG-SDT integration accelerates Soldier readiness

ROCK ISLAND ARSENAL, Ill. – "See first, understand first, act first." This doctrinal phrase underscores how information is fundamental to Army readiness and a reminder that readiness doesn't begin on a battlefield or a training range. At Army Sustainment Command, that idea is more than a guiding principle. It's the work of thousands of people whose efforts quietly shape the Army's ability to train, deploy and fight to win.
