Established on 3 October 1951, as Headquarters, Support Activities, Naval Support Activity (NSA) Naples began its mission to support NATO's Allied Forces Southern Europe and the U.S. Sixth Fleet. After two years, the unit was renamed Commander, Subordinate Command, U.S. Naval Forces Eastern Atlantic/Commander, Headquarters Support Activities. It saw another redesignation in 1957 to U.S. Naval Activities, Italy. On 8 August 1966, it received its current and final name: U.S. Naval Support Activity, Naples. The installation now serves as the headquarters for U.S. Naval Forces Europe–Africa and the U.S. Sixth Fleet, hosting more than 50 commands and roughly 8,500 military and civilian personnel.

NSA Naples challenges itself daily to be the flagship base in Europe, and will strive to do so every day in support of the fleet and families.

Radon Awareness: How Radon Enters Homes

On-base residential and non-residential units, including off-base Government leased units are in compliance with the Navy Radon Management Program.

Radon can build up to harmful levels in any home or building anywhere in the world.

People can be exposed to radon in their:

www.cdc.gov/radon

By NSA Naples Public Affairs

Radon is a naturally occurring, radioactive gas that is odorless, colorless, and tasteless. Radon gas is released from rocks and soil and can move to air, groundwater, and surface water. It is normally found at very low levels in outdoor air and can be found in water used for cooking and drinking.

Radon can build up in the air in any home or building, whether it has a basement, is sealed or drafty, or is new or old. Take action this month to reduce the risks of radon in your home by opening windows and using fans to circulate air. This increases airflow and mitigates the buildup of radon.

In compliance with the Navy Radon Assessment and Mitigation Program (NAVRAMP), NSA Naples on-base residential and non-residential units, including off-base Government leased units are either tested or mitigated or currently being tested.

Personnel that live off-base have entered into a private contract with their landlord, therefore limiting the scope with which the U.S. government may intervene or have control over said contract. However, DoD personnel living off-base can work with their landlord to test for and mitigate radon, if desired, at their own expense.

The lessee may work with the lessor to address any identified issues, as outlined in Section 19 of the NSA Naples housing lease.

Information about finding an at-home radon test kit is available through the Environmental Protection Agency: [Link Here](#)

While NSA Naples has a known overall potential for elevated radon levels, classifying the installation as a Radon Potential Category (RPC) 1 according to the NAVRAMP, the installation is complying with NAVRAMP testing and mitigation policies at government owned/controlled units.

RPC1 is simply the level assigned when even one unit or building is found on the installation with a radon level over the minimum threshold of 4.0 picocuries per liter (pCi/L).

Update On Radon Test Results at NSA Naples Non-Residential Facilities

This public notification provides an update on the recent radon testing conducted at NSA Naples' non-residential facilities, as required by the Navy Radon Assessment and Mitigation Program (NAVRAMP). As part of this year-long effort, radon detectors were deployed from August 2024 to September 2025.

The results, which the base received in January 2026, underwent a thorough quality review. Due to a failure to meet NAVRAMP's strict quality assurance standards, NSA Naples has formally rejected the entire set of test results and will conduct a re-test.

Naples Public Health Evaluation

In-Focus: Air Quality in Naples

By Todd Folts and Josephine Schneider

Checking Air Quality Outdoor

The website hyperlink below provides real-time data on Naples' Air Quality Index (AQI) to help residents understand pollution levels and potential health implications. AQI is a measure of air pollution on a scale where higher numbers indicate poorer air quality. The AQI levels are divided into categories: Good (0-50), Moderate (51-100), Poor (101-200), Unhealthy (201-300), Severe (301-400), and Hazardous (401-500).

[Naples Air Quality Index \(AQI\) and Italy Air Pollution | IQAir](#)

The dashboard displays AQI readings across various locations in Naples, showing areas with higher pollution. Additional insights like health recommendations (e.g., wearing masks, using air purifiers) and historical AQI trends are also included, helping residents make informed decisions about outdoor activities. This is not an endorsement of this website, but an effort to keep our community here in Naples informed on the environmental conditions where we live.

Air Quality in Naples – Sources

Vehicle emissions are among the primary contributors to Naples' air pollution. The city's dense traffic and reliance on cars and motorbikes result in high levels of NO₂ and other harmful pollutants that affect air quality, especially during peak travel times.

In addition, less frequent, natural events, like wildfires in Naples, contribute to air pollution and environmental damage.

Addressing these issues requires coordinated efforts between local authorities, industries, and the community to reduce pollution and to mitigate its long-term environmental impacts. It is also important to note the U.S. Naval Hospital Naples does not test or monitor the outdoor air quality across the region.

If at any point you feel your health is being or may be impacted by the environment, please contact your primary care physician. If you have questions about any of NPHE enduring processes, or any other environmental life, health or safety issue, send an email to Naples_LHS_questions@us.navy.mil

What Is Naples Public Health Evaluation (NPHE)?

The Naples Public Health Evaluation is a comprehensive study of the health risks associated with potential exposure to chemicals in the environment resulting from the area's waste disposal practices. The Campania region of Italy has experienced numerous challenges associated with trash collection, open burning of uncollected trash and illegal waste disposal practices. In response to health concerns expressed by U.S. Navy personnel in 2007, the Commander, Navy Region Europe, Africa, Central (CNREURAFCENT) contacted the Navy and Marine Corps Force Health Protection Command (NMCFHPC) to conduct a comprehensive public health evaluation to assess the potential health risks for U.S. personnel living in the Naples area. The NPHE was conducted from January 2008 to June 2011.

What did the Navy learn from NPHE?

Through the Public Health Evaluation, the Navy has been able to identify and address public health risks for U.S. personnel living in the Campania region. The Navy established new health-protective policies and took immediate action to protect the health of U.S. personnel and their families. **Many of these health-protective policies remain in place, as enduring processes, to ensure continued health protection beyond the life of the study.**

Where are the results of NPHE and where can I read more about this evaluation?

The NPHE results are located on the Health Awareness section at NSA Naples website: [Read More About NPHE](#)

The Teen Employment and Volunteer Opportunity Fair, held on March 18, 2026, connected motivated teens with local organizations, offering a jump-start on summer jobs, part-time work, and meaningful volunteer positions.

Pest Prevention on Support Site

To help prevent pests in your apartment, please follow these key steps:

- Inspect for gaps: Check for any gaps or openings to the outside, especially those ¼ inch in diameter or larger. These small gaps can allow pests to enter. If you find any, contact our maintenance team for immediate assistance in sealing them.
- Seal Food Properly: Store all food in airtight containers to avoid attracting pests.
- Dispose of Trash Correctly: Ensure that trash is placed in appropriate bins and regularly taken out to prevent pest problems.
- Do not leave pet food outside or feed stray animals: This can attract pests, as they are drawn to the food left out for pets or strays.

Help Us Help You: Promptly Report Maintenance Issues

To ensure all residents have a safe and comfortable living environment, it is crucial that you report any maintenance issues to the Unaccompanied Housing (UH) staff as soon as you notice them. Prompt reporting of problems such as mold, mildew, lack of hot water, or inoperable washers and dryers allows our team to address these concerns quickly and effectively. Your cooperation helps us maintain the quality of our facilities for everyone.

Pets in UH

For the health, safety, and comfort of all residents, please be reminded that pets are strictly prohibited in Unaccompanied Housing. The only exception to this policy is for goldfish kept in a small fishbowl. Please note that large aquariums are not permitted. We appreciate your understanding and cooperation in this matter. Violation of this policy may result in disciplinary action.

NSA Naples: Interactive Customer Evaluation (ICE) System

Every feedback is welcomed, good or bad, that's the surest way to help the installation improve services and quality of life in the community

By NSA Naples Public Affairs

The Interactive Customer Evaluation (ICE) system is a web-based tool that collects feedback on services provided by various organizations throughout the Department of Defense (DoD) including here at NSA Naples. Feedback can be positive (give a shout-out) or negative (report an issue). A combination of both is what helps us improve our services to better serve you.

Benefits of ICE:

- Allows community members to quickly and easily provide feedback to service provider managers on the installation.
- Gives NSA Naples leadership timely data on service quality.
- Allows service provider managers to benchmark their performance against like services in other DoD organizations.
- Saves money by providing an enterprise-wide capability to manage the resources necessary to collect and report on customer feedback and satisfaction ratings.

Do I get a response after submission?

Generally, if you provided contact information at the time of submitting an ICE Comment, it will be responded to within two weeks.

Reel Time Movie Theater

I have been meaning to leave this for some time. The young man who works at the theater is excellent. I am sorry I am not sure of his name. He is tall and thin with dark hair; possibly of Asian descent. He is always friendly and personable and does an excellent job. To whomever he is, keep up the great work. You make our lives here better. You rock!

MVRO

Daniela was very helpful to me and my family. I was very impressed with the speed she worked to get our cover plates and new licenses. She is very kind.

FFSC

I would like to thank Lynn for the exceptional care that she provided me on such short notice. Also, a huge thank you to the entire Naples team and Chaps Riley for just being so available and attentive. Thanks for the great care for the families and Service members.

Housing Warehouse

We just received our loaner furniture and the team that came into today was incredibly professional! Thank you all so much.

Emergency Management

I reached out to Sean Quinn late at night regarding my issue, and he responded so quickly. By the very next day, everything was resolved. Victorio (I hope I have his name correct) handled the arrangements and was very polite and professional. Mr. Alfredo was also extremely respectful and kind. He assisted me from my SS site to the hotel and then back to base. He helped carry all of my bags and even waited until I was fully checked in at the Navy Lodge to make sure I got my luggage safely to my room. I am currently pregnant and have a 6- and 9-year-old, I was experiencing a lot of anxiety. Having such a supportive and compassionate team truly put me at ease. Thank you all so very much. I cannot fully express how grateful I am for your kindness and help during this time. Thank you for having such a amazing community to help us out on such short notice.

Local Lens: After Easter, Spring in Full Bloom

By Paolo Cutillo, Contributing Writer

April in Campania often begins with Easter, one of the most meaningful traditions of the year. In the days leading up to the holiday, churches fill, processions move quietly through historic streets, and families gather for moments that blend faith, culture, and community.

But once Easter passes, something shifts almost immediately. The atmosphere grows lighter, routines loosen, and life moves back outdoors. If winter belongs to quiet evenings and early nights, April is when the piazza returns to the center of everyday life.

In cities like Naples, historic squares begin to fill again with people meeting after work, students gathering on church steps, and families enjoying the longer evenings. Cafés expand their outdoor seating, and conversations stretch later into the night — a simple ritual that defines social life across southern Italy. In Caserta, the same energy spreads through the streets around the Royal Palace. Locals stop for an aperitivo, meet friends after dinner, or simply linger in the mild spring air. Around this time, the first outdoor cultural events of the season begin to reappear, from open-air concerts and small festivals to evening gatherings in courtyards and historic squares.

Along the coast near Gaeta, April weekends bring the first real sense of the approaching summer. The harbor becomes livelier, seaside cafés reopen their terraces, and the town often hosts outdoor events tied to the season - including celebrations connected to Gaeta Fish Festival, where locals gather along the waterfront to enjoy music, community, and the sea breeze.

What makes this moment special is its simplicity. There are no major tourist crowds yet, just the quiet return of everyday life lived outdoors.

What Do You Need To Do?

1. If you have recently submitted your paperwork for a first-time application or a renewal application, you do not need to take further action now. We will notify you via email on the next steps, according to instructions from the Immigration office.
2. If you already have a current paper Sojourner's Permit, you do not need to take further action now. You will be contacted by our office when it is time to begin the process to convert it into an electronic permit, according to instructions from the Immigration office.
3. If you have a paper Sojourner's Permit that expires between now and June, you must contact RLSO EURAFCENT at napleslegalassistance@us.navy.mil for a renewal request appointment. Our specialist will collect the required paperwork for the application, but you will hold onto your paper permit until your appointment with the immigration police.
4. **KEEP YOUR SOJOURNER PERMIT APPLICATION RECEIPT!!** Upon submitting an electronic Sojourner's Permit application (first-time application or renewal) to the Italian Immigration Police, you will be issued an official receipt (small piece of paper). This receipt contains your PROTOCOL NUMBER (application number) which is **ESSENTIAL** to check the status of your Sojourner's Permit online. The protocol number always begins with the reference year and the abbreviation of the city where the application was filed:
 - For Naples: begins with 26NA + six digits
 - For Caserta: begins with 26CE + six digits
 This receipt, along with your passport and your expiring/expired sojourner's permit (if any), is **REQUIRED** to pick up your sojourner's permit once it is ready. If you do not bring the original receipt, you will **NOT** be allowed to collect your electronic sojourner's permit. If the receipt is lost or stolen, you must first file a formal loss report with the Italian Police or the Carabinieri, which can be used in lieu of the original receipt to pick up your permit. Without the receipt or a proper Italian police report, you **CANNOT PICK UP** your electronic Sojourner's Permit.

CENTRAL MEAT PROCESSING PLANT SERVING COMMISSARY CUSTOMERS IN *10 Countries* SINCE 1998

The Central Meat Processing Plant's state-of-the-art facility features highly efficient meat processing and vacuum machines, metal detectors and X-ray machines, a flash freezer, and high-tech cleaning systems. USDA Beef is cut, ground, packaged, vacuum sealed, and shipped from Kaiserslautern Cold Storage to our overseas locations. Fresh pork is sourced locally from German locations and processed under the same strict guidelines. Commissaries receive shipments an average of every two to three days, depending on the size and sales volume of the location.

Special Orders
FOR YOUR SINGLE-SERVING OR PARTY-PLANNING MENUS

Just as you can go to a stateside commissary and place a special order for pork or beef, you can do the same here in Europe. You can simply request a special order from the commissary at the meat department or front-end department by filling out a special-order form if you are looking for a large quantity or a special cut.

Special order lead times vary depending on the request but a majority can be filled within days. Large quantity requests may take up to eight weeks. Whole pigs require a 10-day lead time. Check with your commissary for details.

www.commissaries.com

Where does the Commissary get its meat products?

Shoppers are amazed to learn that the USDA-approved Natural and Choice beef we sell in the commissaries in Europe and the Middle East are shipped here from the U.S. Even more surprising, is that the retail cuts of beef are fresh, never frozen. This is accomplished through the use of vacuum packaging.

What are the advantages of vacuum packaging?

- ▶ Because oxygen is removed, the shelf life of vacuum-packaged red meat increases from a matter of days to at least two weeks.
- ▶ Vacuum packaging allows natural enzymes to act as a natural tenderizer and enhances quality/palatability of beef.
- ▶ Without the vacuum technology, most locations would have only frozen meat products.

VACUUM SEALED FOR FRESHNESS!

Beef gets its red color from exposure to oxygen. In our vacuum packing process, we remove over 99% of the oxygen from the package. The lack of oxygen turns the meat a darker color but the meat will return back to the usual red-color once the package is opened and is, once again, exposed to oxygen.

The vacuum package does not allow for any air in or out. This can cause naturally occurring lactic acid to build up inside the package. Shortly after opening the package, the initial off-odor will dissipate. This process does not affect the quality of the meat or taste and acts as a natural meat tenderizer.
