Sustainment vision becoming an operational reality

HUNTSVILLE, Ala. – A year after outlining a vision for a more agile and modernized sustainment enterprise, Army Materiel Command leaders say that vision is rapidly becoming reality. During his keynote address at the Association of the United States Army Global Force Symposium, AMC Commander Lt. Gen. Chris Mohan detailed significant progress in AMC's three main priorities.

Army highlights OIB transformation at Global Force

HUNTSVILLE, Ala. – Leaders from Army Materiel Command detailed a new, integrated strategy to transform the Army's Organic Industrial Base into a more agile, resilient and responsive force multiplier during a Warriors Corner at the Association of the United States Army's Global Force Symposium. The discussion highlighted a fundamental shift in how the Army plans to manage workload across its OIB.

Army highlights Army Food Program overhaul

HUNTSVILLE, Ala. – Army leaders and industry partners say the service is in the midst of a transformation of how Soldiers are fed on installations, calling the effort long overdue and essential to readiness. Army leaders highlighted the momentum at the Association of the United States Army's Global Force Symposium, during a forum on "Partnering with Industry to Revolutionize Garrison Feeding."

Apps put supply chain power into Soldier's hands

HUNTSVILLE, Ala. – The future of Army logistics will be driven by data analytics and applications that put powerful tools directly into the hands of Soldiers. Army supply chain officials detailed a suite of new technologies designed to streamline everything from property accountability to vehicle maintenance during a Warriors Corner at the 2026 Association of the United States Army Global Force Symposium.

Printing the future fight

HUNTSVILLE, Ala. – To outpace the complexities of modern warfare, the Army is accelerating the adoption of advanced manufacturing to get equipment back to the fight faster than ever before. Army experts detailed how they are leveraging new qualification authorities and partnerships with private and academic sectors to get advanced manufacturing from the Organic Industrial Base and the tactical edge.

AUSA Global Force through the lens of ACC-RSA

HUNTSVILLE, Ala. – Behind the displays of advanced weaponry and next-generation technologies at Global Force, one underlying message cut through the noise: the Army cannot modernize without a strong, agile and deeply connected contracting enterprise.
