OUR WORK CONTINUES

By Brig. Gen. Yvonne L. Mays
The Adjutant General of New Jersey

U.S. Air Force Brig. Gen. Yvonne Mays, The Adjutant General, New Jersey National Guard, seventh from left, and Command Sgt. Maj. Mark Leonard, State Command Sergeant Major, New Jersey Army National Guard, eighth from left, pose for a group photo with Soldiers from Task Force Integrator, 42nd Regional Support Group, at Baghdad, Iraq, Dec. 16, 2025. Mays paid a visit to the U.S. Central Command area of responsibility to meet with New Jersey Guardsmen who are deployed in support of Operation Inherent Resolve. (U.S. Army photo by Sgt. 1st Class Armando Vasquez)

Across our formations, the New Jersey National Guard is training in conditions that prepare us to meet the challenges of tomorrow.

In Alaska, Airmen of the 108th Aircraft Maintenance Squadron executed missions under simulated deployed conditions, working with limited resources while maintaining operational output. These experiences reinforce the fundamentals required to generate and sustain combat power.

At Fort Drum, through Operation Belt Feed, the 177th Fighter Wing demonstrated its ability to deploy rapidly and operate with incomplete information. Airmen adapted, relied on their training, and executed the mission. This is the standard we must meet in future conflicts, where speed, judgment, and coordination will determine success.

In the Indo-Pacific, our participation in REFORPAC placed our Airmen alongside joint and coalition partners in a complex, distributed environment. These exercises strengthen interoperability and reinforce our role in a broader strategic context. They also ensure that our force remains capable of operating across multiple theaters.

Here at home, our units continue to

prepare for missions that directly impact the communities we serve. Training alongside law enforcement and emergency response partners reflects our responsibility to serve the people of New Jersey. We must be ready to integrate, respond, and support when called.

"THE ENVIRONMENT WE FACE IS COMPLEX. THE EXPECTATIONS PLACED ON THIS FORCE ARE HIGH. WE WILL NOT ONLY MEET THOSE EXPECTATIONS AND STANDARDS; WE WILL EXCEED THEM."

Leadership development remains central to our success. Officer candidates continue their progression through rigorous training, preparing to lead Soldiers in demanding environments. Noncommissioned officers are strengthening their skills through partnerships with allied forces, building the foundation for future leadership across the force.

Partnerships continue to define how we operate. Through engagements with the armed forces of Albania and Cyprus, our Soldiers and Airmen are sharing expertise and building relationships that enhance collective capability. These efforts strengthen not only our partners but also our own readiness.

At the same time, we recognize the demands of service. The deployment of the 42nd Regional Support Group to the U.S. Central Command Area of Responsibility demonstrates the commitment carried by this force. Our Soldiers and Airmen continue to perform in complex environments, supported by families whose contributions remain essential to mission success.

The foundation of our success remains unchanged. Leadership. Readiness. Teamwork. A commitment to doing what is right.

We will continue to put people first. We will continue to build ready and resilient teams. We will continue to modernize and strengthen this organization.

The environment we face is complex. The expectations placed on this force are high.

We will not only meet those expectations and standards; we will exceed them.

Our work continues.

108th AMXS participates in Red Flag-Alaska

Story and photo by Staff Sgt. Samuel Earick, National Air and Space Intelligence Center

Red Flag-Alaska 25-2 began June 12, 2025, bringing together approximately 1,500 participants and more than 70 aircraft from across the United States and allied nations for two weeks of multi-service, multi-platform, coordinated exercises.

The two-week exercise, which takes place at Joint Base Elmendorf-Richardson and Eielson Air Force Base in Alaska provides Airmen the opportunity to work with joint and coalition partners, including the Japan Air Self-Defense Force and the Republic of Korea Air Force, simulating what serving in a deployed environment may look like within the Indo-Pacific region.

During those two weeks, participants will train in contested, degraded, and operationally limited environments with missions including defensive counter-air, dynamic targeting, and close air support.

The exercise's unsung heroes, the ones who ensure aircraft are operational and ready to fly, are the maintenance Airmen.

"Operating in a simulated deployed environment, where resources and personnel are limited, is a good chance for many of our Airmen to

train under less-than-optimal situations," said Senior Master Sgt. John Allen, avionics superintendent, 108th Aircraft Maintenance Squadron, New Jersey Air National Guard.

The exercise helps Airmen maintain readiness required to effectively carry out the mission in real-world situations.

"Exercises like these are extremely important for us," said Tech. Sgt. Richard Weaver,

avionics technician, 108th AMXS. "It gives us a chance to practice as if we are in a deployed environment, with the bare bones and being able to generate aircraft to get the mission done."

For some, this exercise offers a first glimpse into what a deployed environment may look like.

For Airman 1st Class Jake Landy, KC-46A Pegasus crew chief, 108th AMXS, this will be his first exercise experience.

"Being here is exciting," said Landy. "It's so cool to see so many different aircraft and see how things would look in a deployed environment."

Despite the difference between New Jersey and Alaska, Weaver said the mission remains the same.

"There has not been much difference in our day-to-day operations," said Weaver. "We need to generate aircraft and get the mission done because the jets are going to need refueling at some point, and we're going to be there to do it."

Throughout the exercise, the 108th maintenance team has been consistently working to ensure the aircraft are ready to ensure mission success.

"The team has been performing exceptionally well," said Allen. "All the maintainers are working together to launch, recover, and fix any issues that arise on the aircraft, they are all of the same mentality that the mission comes first, and we work together to get it done."

"It gives us a chance to practice as if we are in a deployed environment, with the bare bones and being able to generate aircraft to get the mission done."

Operation Belt Feed tests 177th's ability to deploy

Photos and story by
Airman 1st. Class Andrew Relyea
177th Fighter Wing Public Affairs Office

U.S. Air Force Airmen with the New Jersey Air National Guard's 177th Fighter Wing participated in "Operation Belt Feed" a training exercise at Fort Drum, New York, June 24, 2025.

The exercise tested the Airmen's ability to rapidly deploy superior combat airpower with limited details of the mission.

"I want the Jersey Devils to continue to be the sharpest fighter unit in the Air Force," said Lt. Col. Michael Long, commander and exercise lead observer, 177th Operations Group. "This exercise gets everyone out of their comfort zone, adapt to the situation, and get the mission done."

The Airmen did not receive the mission details until after they arrived at Fort Drum. Airmen relied on each other and took instruction from their company grade officer and noncommissioned officer in charge, rather than higher grade officers.

"As an Air Force, we put a lot of emphasis on these large-scale events like 'Flags' and Weapons System Evaluation Programs," said Long. "They don't allow our Airmen to explore the space, think on their feet, truly make risk-assessments, or enhance the "agile" mindset we absolutely need."

Airmen used their knowledge and previous training to complete the mission with unfamiliar equipment. During the exercise, two 119th Fighter Squadron pilots would land their F-16 Fighting Falcons, taxi to the maintenance members for refueling, have their weapons reloaded, and take off again.

In the future, Long plans to vary the scope of exercises, such as this one, to strengthen the lethality and readiness of the wing's Airmen.

"We have the finest people in the United States Air Force – they continually inspire me," said Long.

Above: U.S. Air Force Airmen with the 177th Fighter Wing of the New Jersey Air National Guard, board a Delaware Air National Guard C-130H3 Hercules at the Atlantic City Air National Guard Base, Egg Harbor Township, New Jersey, June 24, 2025.

FIGHTER WING PARTICIPATES IN REFORPAC 2025

BY SENIOR AIRMAN DARION BOYD, 177TH FIGHTER WING PUBLIC AFFAIRS OFFICE

The 177th Fighter Wing of the New Jersey Air National Guard participated in exercise Resolute Force Pacific – REFORPAC – 2025, a first-of-its-kind Department Level Exercise at Komatsu Air Base, Japan, beginning July 10 and running through Aug. 8, 2025. The exercise demonstrates the armed forces’ ability to rapidly deploy personnel, equipment, and aircraft to the Indo-Pacific theater of operations.

The exercise encompasses all branches of the Department of Defense, along with allies and partners, employing more than 400 joint and coalition aircraft and more than 12,000 members at more than 50 locations across 3,000 miles.

“REFORPAC will help solidify Agile Combat Employment concepts and execution among the men and women of the 177th Fighter Wing,” said Lt. Col. Eric Emerson, commander, 119th Expeditionary Fighter Squadron, NJANG. “Lessons learned from this exercise will have a direct effect on how we train, fight, and win our nation’s future conflicts.”

ACE concepts include the ability to rapidly deploy forces, altering enemy understanding of friendly intentions, capabilities, and posture to gain advantages.

“Every lesson learned here, every process refined, directly contributes to making our wing more capable and agile,” said Chief Master Sgt. Grant Holway, quality assurance senior enlisted leader, 177th Fighter Wing.

The exercise’s end goal for the units includes enhanced interoperability and readiness across the Pacific theater.

“This exercise tests our ability to generate airpower with limited support and resources as we repositioned multiple times around Japan,” said Emerson. “We relied on Airmen to step outside of their comfort zones, use their judgment backed up by their training while solving complex problems.”

REFORPAC offers Airmen an opportunity to interface with

service members of various U.S. military branches as well as service members from other allied countries.

“In addition to our State Partnership Program mission, this has been another successful venture in creating relationships with other nations and allies,” said Holway. “Overall, I have met nothing but friendly people overcoming language and logistical barriers to help each other.”

Maintaining strong relationships with allies ultimately enhances combined capabilities for all parties. During these engagements, the 177th FW members had the opportunity to teach as well as learn different tactics, techniques and procedures.

“Everything from refueling aircraft, towing aircraft, providing equipment, and training in emergency procedures, pilot extraction and hydrazine response, has been bilateral adding to mission success,” said Holway.

This iteration of REFORPAC is the largest crisis response exercise in Pacific Air Forces history.

“It is an honor to be part of such a monumental exercise,” said Emerson. “The lessons learned from this exercise will set the foundation of how we fight; projecting power and security throughout the 21st century. We had a part in that, and that’s pretty cool! I’m incredibly proud of what the Jersey Devils accomplished during REFORPAC.”

While the scale of the exercise was historic, it was the commitment and resilience of individual Airmen that drove the mission forward.

“From junior Airmen to senior non-commissioned officers, everyone has stepped up without hesitation, adapting to constant change, long hours, and new environments with professionalism and grit,” said Holway. “Exercises like this test not just our equipment and plans, but our people. It’s about shaping how we fight in the future, and that starts with the groundwork we’re laying right now.”

“REFORPAC WILL HELP SOLIDIFY AGILE COMBAT EMPLOYMENT CONCEPTS AND EXECUTION AMONG THE MEN AND WOMEN OF THE 177TH FIGHTER WING.”

NCO development course enhances SPP Program

Story and photo by
Airman 1st Class Andrew Relyea
177th Fighter Wing
Public Affairs Office

Republic of Cyprus National Guard noncommissioned officers from multiple units met with several representatives of the New Jersey Air National Guard's 177th Fighter Wing for training sessions designed to enhance leadership development of NCOs within the two forces.

The classes, which were held at the Artillery Command of the Cyprus National Guard in Mosfiloti, Republic of Cyprus, July 21–25, 2025, took place as part of the State Partnership Program between the Republic of Cyprus and the state of New Jersey. They also are part of Cyprus's new NCO development course.

"Together we are building a career-long continuum of learning, where NCO skills and leadership abilities are refined and sharpened through continuous development over their span of service," said Chief Master Sgt. Justin Kelley, senior enlisted leader, 177th Fighter Wing. "The NCO Basic Leadership Course was developed jointly with the members of the New Jersey Air and Army National Guard and representatives from the Cypriot Army, Navy, Air, and National Guard team. It is the first step in a series of developmental courses."

The 177th's role was to support and refine the first ongoing class of the NCO Basic Leadership course, Class 001. This course was modeled after the U.S. Air Force's own NCO development courses. Plans on incorporating the other branches' NCO courses were discussed.

"This course is very important; we need to train our NCOs to improve their cognitive and leadership skills," said Cyprus Air National Guard Warrant Officer Andreas Christoforou, NCO Basic Leadership course lead observer and instructor. "We would like to thank the New Jersey National Guard and Chief Kelley

for his help and assistance to reach this goal."

The week's events included daily peer-led instruction and physical training led by Tech. Sgt. John Raebig, alert crew chief, 177th Fighter Wing, and concluded with a visit by U.S. Army Col. K. C. Evans, senior defense official and defense attaché, U.S. Embassy Cyprus.

The focus of the NCO Basic Leadership course is to increase leadership capacity in support of mentoring future NCOs.

"By modeling after U.S. Air Force NCO structure, we are introducing a proven framework that cultivates accountability, initiative, and adaptive leadership at every level of the enlisted force," said Raebig. "As these NCOs grow, they become more than just managers – they become trusted advisors, trainers, and role models."

The State Partnership Program between the Republic of Cyprus and the State of New Jersey began in 2023 and has involved multiple exchanges in both countries that aim to enhance collective security and to improve each country's

capabilities, including disaster response. Through the SPP, the National Guard conducts military-to-military engagements in support of defense security goals. This cost-effective program is administered by the National Guard Bureau, guided by State Department foreign policy goals, and executed by the state adjutants general in support of combatant commander and U.S. Chief of Mission security cooperation objectives and Department of Defense policy goals.

"This NCO development opportunity is very important for me and for other NCOs," said Sgt. Anastasia Giannoukou, course instructor, NCO Basic Leadership, Cyprus Army National Guard. "It's a dream for us to be better as NCOs."

"Together we are building a career-long continuum of learning, where NCO skills and leadership abilities are refined and sharpened through continuous development over their span of service."

177th trains for World Cup Security

*Photo and story by Airman Alex Cadavid
177th Fighter Wing Public Affairs Office*

U.S. Air Force Airmen with the New Jersey Air National Guard's 177th Civil Engineer Squadron participated in a training exercise with the New Jersey National Guard's 21st Weapons of Mass Destruction-Civil Support Team and the New Jersey State Police Hazmat Response Team at Mercer County Park, West Windsor Township, New Jersey, July 31, 2025.

The training is in preparation for the 2026 FIFA World Cup, which begins in June 2026 at MetLife Stadium in East Rutherford.

The exercise included briefings, command coordination, safety procedures, and joint decision-making tasks in a hazardous environment. The training prepared the units for real-world emergencies, whether they involved chemical, biological, or explosive devices.

"We scheduled and prepared the exercise with direct consultation and support from our partners at the 21st WMD-CST, National Park Service, and the New Jersey State Police," said Master Sgt. David Bernal, superintendent, Explosive Ordnance Disposal Team, 177th Civil Engineer Squadron. "The 177th EOD team's objective was to provide explosive hazard support to our law enforcement partners."

During the exercise, the 177th EOD team used a Man Transportable Robotics system in a simulated hazardous material scenario before the 21st WMD-CST sampled and identified the material. In a follow-on scenario near a simulated concert stage, EOD Airmen performed on-site mitigation procedures alongside partner agencies.

"I think the biggest part of this was the interoperability between us, the CST, and the State Police," said Senior Airman Robert Wittig, an EOD technician with the 177th CES.

The 21st WMD-CST and New Jersey State Police Hazmat Response Team will be performing additional training in preparation for security operations at the 2026 FIFA World Cup.

"We want our Airmen and the public to know that we routinely conduct interagency training and joint operations to ensure public safety and security," said Bernal.

FAREWELL CEREMONY HELD FOR RSG

U.S. Army 1st Sgt. Edgar M. Duran, left, holds the 42nd Regional Support Group, New Jersey Army National Guard, guidon as Col. David S. Hampton, center, commander, and Command Sgt. Maj. Jack A. Bowker, prepare to case the IBCT's colors during the 42nd RSG's farewell ceremony at Franklin High School, Somerset, New Jersey, Aug. 1, 2025. More than 80 NJARNG Soldiers will deploy in support of U.S. Central Command's Combined Joint Task Force - Operation Inherent Resolve. As Task Force Integrator, the 42nd RSG provides and conducts base operating support integrator and headquarters and headquarters battalion functions at designated CJTF-OIR locations by enabling coalition and joint partners to maintain the enduring defeat of Da'esh. (New Jersey National Guard photo by Mark C. Olsen)

OCS Class 68 graduates

By Capt. Kyle Marr, Joint Force Headquarters – New Jersey Public Affairs Office

The New Jersey Army National Guard commissioned eight second lieutenants at the Officer Candidate School Graduation and Pinning Ceremony at the National Guard Training Center in Sea Girt, New Jersey, Aug. 3, 2025.

The event was the culmination of months of intense physical and academic training designed to prepare officer candidates to lead Soldiers in the New Jersey Army National Guard. Friends, family members, and mentors gathered to witness the moment their loved ones received the gold bars of a commissioned officer.

"Today represents far more than the culmination of Officer Candidate School; it marks the commencement of a lifelong calling to lead, to serve, and to uphold the highest ideals of our profession," said Lt. Col. Magregoir Simeon, commander, 2nd Battalion, 254th Regiment (Combat Arms), NJARNG. "These graduating candidates have demonstrated exceptional dedication, resilience, and motivation. Through discipline and integrity, they have rightfully earned their commission and stand ready to lead with honor, purpose, and unwavering commitment to those they serve."

Class 68 honor graduate, 2nd Lt. David Bransfield, was the outstanding academic and leadership performance throughout the course. "OCS emphasized the importance of showing up prepared every

time, no matter what was thrown at us over the course of a year and a half," said Bransfield, who will be reporting to Bravo Company, 104th Brigade Engineer Battalion. "The eight of us who commissioned today came out of this stronger together. The whole experience made us all realize that we are capable of a lot more — and that is a great feeling."

Another graduate, 2nd Lt. Ashton Colangelo, echoed the sentiment. "At first, sixteen months seemed like a long time, but once we all started to gel, the time flew by quickly."

The OCS program includes a series of field training exercises, classroom instruction, and leadership evaluations designed to simulate the pressures of command. According to OCS course manager Sgt. 1st Class Franny Tavarez, watching the transformation is one of the most rewarding aspects of the job.

"The growth of these graduates — from their time as officer candidates to the moment they commission — is tremendous," said Tavarez. "This program not only tests the leadership skills and resilience of the candidates, but also to bring out the best in them."

These new officers will now serve in units across the New Jersey Army National Guard and continue their training to fulfill their duties as Army leaders.

The New Jersey Army National Guard's newest second lieutenants have their photo taken after graduating from New Jersey Officer Candidate School at the National Guard Training Center, Sea Girt, New Jersey, Aug. 3, 2025. (U.S. Army National Guard photo by Sgt. Seth Cohen)

Yulija Husak, second from left, both with the NJARNG Honor Guard, present American flags to family members during a interment service at the Brigadier General William C. Doyle Veterans Memorial Cemetery, Wrightstown, New Jersey, Oct. 16, 2025.

ALWAYS READY, ALWAYS THERE

By Brig. Gen. Yvonne L. Mays, The Adjutant General of New Jersey

U.S. Army National Guard photo by Sgt. Derek Vasquez

For more than 130 years, New Jerseyans have stood on this parade field to train and prepare themselves to serve the people of the Garden State. In peace and in war, the New Jersey National Guard has been “always ready, always there.” Today, as our nation faces challenges at home and abroad, we continue that mission. This Military Review gives us, as it gave those before us, a chance to reflect on our achievements and our role in a changing world.

First, I want to thank our Commander in Chief, Governor Philip D. Murphy. It is a privilege to serve as your Adjutant General. Your strong support for those who wear our nation’s uniform has strengthened our force, supported military families, and helped bring veteran homelessness toward functional zero in New Jersey. Sir, throughout your tenure, you saw firsthand the unrelenting pace of operations. From hurricane response to pandemic and election support, to deployments overseas and humanitarian relief, the heavy lift of operations has been matched only by the wide variety of capabilities our Guard provides.

New Jersey’s citizenry and industry have always stood on the front line of national defense. We have it all: human talent, strategic location and a historic track record of excellence in critical missions. New Jersey patriots set the conditions for success and victory.

Today, as night falls in the Middle East, Soldiers of the 42nd Regional Support Group headquarters have marked off the first full month of their year long deployment in support of Combined Joint Task Force, Operation Inherent Resolve. As the sun sets

in the Western Balkans, Soldiers of the 328th Military Police Company are providing force protection and law enforcement at Regional Command East, Camp Bondsteel, Kosovo, in support of NATO’s ongoing peacekeeping mission. To the 44th Infantry Brigade Combat Team, many of whom are here today, last year your absence from this formation and the silence of your howitzers were stark reminders of the sacrifices our service members make when they mobilize. You left your jobs and families to provide mission command, security and sustainment operations in one of the most complex regions of the world. Your professionalism earned the respect of our active duty counterparts and our allies. You took care of your battle buddies downrange while your families held down the home front. You returned home with honor and adjusted back to civilian life. I urge you: keep doing those buddy checks, keep those lines of communication open and talk to someone if you need to. Thank you for your service.

Our Air National Guard also continues to answer the call, flying, fighting and winning alongside our active duty partners anywhere, anytime. Last October, a portion of the 177th Fighter Wing’s 119th Fighter Squadron deployed its F-16 Fighting Falcons to the U.S. Central Command area of operations. The squadron helped defend regional interests and maintain freedom of navigation before returning home safely in January. At the same time, the 108th Wing modernized its aerial refueling capability. Last autumn, Airmen from the 177th and 108th Wings deployed to

Aviano Air Base, Italy, for Operation Pegasus Dawn, sharpening Agile Combat Employment skills and supporting the KC 46 transition; the mission helped the 108th Wing move from KC 135 to KC 46 tankers. This summer, the 177th Civil Engineer Squadron joined the 21st Weapons of Mass Destruction Civil Support Team and the New Jersey State Police to train for World Cup security, demonstrating our commitment to public safety ahead of the 2026 FIFA World Cup. Meanwhile, the 177th Fighter Wing continues its no fail Aerospace Control Alert mission, protecting the skies over the eastern United States every day of the year. Altogether, our Air deployments have supported four geographic combatant commands; NORTHCOM, SOUTHCOM, INDOPACOM and CENTCOM, covering most of the world’s surface.

To the spouses, families and loved ones of our deployed Soldiers and Airmen: you remain in our thoughts and prayers. Your support makes our missions possible, and the entire New Jersey family thanks you for your service.

One more important note: through 62 engagements last year with our state partners, the Republic of Albania and the Republic of Cyprus, you, our Soldiers and Airmen have earned the respect of those we train beside and the gratitude of those we are privileged to serve. Your achievements are extraordinary. Your dedication keeps our citizens safe and helps defend democracy around the world. Our work continues. By pushing ourselves and our units to do better and aim higher, we can carry any load and accomplish any mission.

State Partnership Program '25

LAST PHANTOM AIRMAN RETIRES

Story and photo by Staff Sgt. Bela Vaszlavik, 108th Wing Public Affairs Office

The bright sun pierced through the clouds above McGuire Air Force Base in late September 1987. The roar of the F-4E Phantom II thundered as it waited on the runway. The aircraft moved forward, amping up its speed as it accelerated down the runway.

Master Sgt. James Giquinto, a brand new young Airman, looked up as he saw the aircraft go into full afterburner and lift into the air.

The F-4E Phantom II fighter bomber was a part of the, then, 108th Tactical Fighter Wing, New Jersey Air National Guard.

Thirty-eight years later, Giquinto, the last F-4E maintainer in the 108th Wing, retired Dec. 7, 2025.

“Being the last F-4E maintainer in our Wing’s history seems so surreal,” said Giquinto. “I never thought my retirement would be such a legend. Everything just happened to fall into place.”

He worked on F-4E’s jet engines for four years, starting in 1987, when he began his Air Force career.

“The fighter jets were quick turn and burn where we had to get them ready to fly the next sortie,” said Giquinto. “I loved the pace, and I was eager to lend a hand to get the mission accomplished.”

Working on the F-4E had its difficulties, especially since it was extremely difficult to access some of the engine components while it was in the aircraft.

“Everything was compact to work on; at times you could not even see your hands working on the engines,” said Giquinto. “Whenever somebody got hurt, scratched, or bruised, you used to call them ‘Phantom bites’.”

He took immense pride in his work, even if the job gave him a few ‘Phantom bites’ along the way.

“We had to put the engine on a special stand to assess the engine for leaks in full afterburner,” said Giquinto. “I always had to get underneath the engine while a huge ball of flame was going out the back of the motor to ensure the engine

could uphold the mission.”

Giquinto deployed to the Middle East as part of the first wave of orders that former President George W. Bush issued in December 2001. He was busy around the clock, ensuring the mission stayed on track.

“Working nights, I saw missiles flying overhead with loud sirens going off, it was a ton of chaos,” said Giquinto. “All that training and skills I did my whole career were being put to use, which felt very rewarding.”

Since he enjoyed his work, he found a full time position to work on the KC-135 when he came home. He did that until 2009 when the 108th upgraded to the KC-135R.

“Once we got the R models, I felt like since I was getting older, I needed to get out of the elements,” said Giquinto. “I thought it was a good idea to go into Quality Assurance so that I could still be around the unit and continue to serve.”

He found a position in QA where he would inspect other people’s mechanical

work as opposed to doing it himself.

“I didn’t want to be turning wrenches my whole entire career and getting dirty everyday with fuel and oil,” said Giquinto. “In QA, I got to know more about the aircraft from nose to tail by interacting with all the units associated with the aircraft.”

Being a part of Quality Assurance allowed Giquinto to continue his thirst for knowledge and learn from different mechanical backgrounds. After 38 years and multiple deployments, Giquinto is ready for whatever life has to throw at him.

“As I reflect back, I feel proud I have accomplished so much serving my country,” said Giquinto. “Today, in a different capacity, I will continue to serve my country working in Federal Service as a public servant.”

U.S. Air Force Master Sgt. James Giquinto, right, the last F-4E Phantom II maintainer, salutes the American flag during his retirement ceremony at the Heritage Building at the 108th Wing, New Jersey Air National Guard, Joint Base McGuire-Dix-Lakehurst, New Jersey, Dec. 7, 2025.

was working properly.”

In 1991, the 108th Tactical Fighter Wing became the 108th Air Refueling Wing and with the new mission, came a change in aircraft – the KC-135 Stratotanker replaced the F-4E Phantom II.

“Being a young Airman, it was great having the fighter jets with the higher tempo since I had so much energy,” said Giquinto. “By the time we got the KC-135s I was slowing down. It took a couple of years still, but I found my footing.”

He was in a real groove for several years working on KC-135, but nothing could have prepared him for when tragedy struck the entire nation, Sept. 11, 2001.

“As soon as 9/11 happened, we were called up for one year under presidential orders,” said Giquinto. “We were prepared to take action when we needed to so we

NJNG TRAINS WITH CYPRUS AND NJFFS

U.S. Army Soldiers, with the New Jersey National Guard, met with the Cypriot National Guard and New Jersey Forest Fire Service to train together through the State Partnership Program at the Army Aviation Support Facility at Joint Base McGuire-Dix-Lakehurst, New Jersey Nov. 18, 2025. The training was to enhance major-incident response, wildfire mitigation, and global crisis-management capabilities. The State Partnership Program is a Department of State and Department of Defense joint security cooperation program administered by the National Guard Bureau that links a state's National Guard with the armed forces of a partner country in order to build long-lasting, mutually beneficial relationships with U.S. partners around the world.
