### CARBON MONOXIDE POISONING

The Soldiers in the containerized kitchen continued to prepare food without giving the alarm another thought. After all, why would it go off if there was no smoke or fire? Fast forward 30 minutes, and there is a mass casualty event at the Role 2. Eight Soldiers arrive complaining of headaches, nausea, dizziness and breathing difficulties. Seven of those are immediately evacuated to higher levels of care to combat the effects of carbon monoxide poisoning.

### HEAT ILLNESS PREVENTION

Hot weather operations demand vigilance, discipline and planning. By integrating heat illness prevention into all phases of training and operations and promoting a safety-first mindset off duty, the Army preserves its most vital resource — its Soldiers.

### OVERLANDING

Have you ever tried airing down your tires in a sideways rain while standing ankle-deep in moss-covered mud with a raccoon staring at you like you're an idiot? I have. Welcome to overlanding in the Pacific Northwest, where the margin for error is paper thin.

## PRODUCTS & TOOLS

Learn the safety culture and climate within your organization.

A family of information technology systems that underpins the Army Safety and Occupational Health Management System.

A great resource for motorcycle information and learning to be a safe rider.

An interactive, easy-to-use, automated system designed to assist users with the application of risk management.

Make your Soldiers aware of the off-duty hazards they'll face with the Off-Duty Safety Awareness Presentation.

A collection of resources to aid commanders and leaders in the management of range operations and safe weapons handling.

### DID YOU KNOW?

Do you want to start receiving U.S. Army Combat Readiness Center safety products — such as the weekly **RISK MANAGEMENT** newsletter and Preliminary Loss Reports — via email? If so, just click the **subscribe to safety products** box at the bottom of this newsletter and select which products you'd like to receive.
