RIDER VIGILANCE

As Mike approached, the pickup pulled out, turning left directly in front of him. The truck and boat now obstructed both lanes. Mike, positioned in the left lane, took immediate corrective action by steering toward the center turn lane. However, the truck did not stop, effectively blocking any remaining escape route. Mike laid his bike down to try and reduce the force of the collision, but due to the speed of both vehicles, the slide did little to mitigate the impact. He struck the truck's bumper face-first.

AIRSPACE DECONFLICTION

The SWT proceeded to identify friendly and enemy positions. Suddenly, the trail aircraft collided with the Raven at about 3,250 feet MSL, shattering the left side windshield and damaging the left side of the glare shield, a digital camera and an M4 carbine.

SPORTS INJURIES

My ankle looked and felt horrible. I worried I would be released from active duty, or REFRAD, after just arriving and wondered if I should ever play basketball again. Thankfully, the conditions allowed me to stay on the deployment.

PRODUCTS & TOOLS

Learn the safety culture and climate within your organization.

A family of information technology systems that underpins the Army Safety and Occupational Health Management System.

A great resource for motorcycle information and learning to be a safe rider.

An interactive, easy-to-use, automated system designed to assist users with the application of risk management.

Make your Soldiers aware of the off-duty hazards they'll face with the Off-Duty Safety Awareness Presentation.

A collection of resources to aid commanders and leaders in the management of range operations and safe weapons handling.

DID YOU KNOW?

RISK MANAGEMENT is always looking for contributors to provide ground, aviation, driving and off-duty safety articles. Don't worry if you've never written an article for publication. Just write about what you know and our editorial staff will take care of the rest. Your story might just save another Soldier's life. Click the **Submit An Article** tab below to share your story.

WHAT'S NEW

SPRING-SUMMER SAFETY CAMPAIGN

Spring and summer are the Army's deadliest times of year for mishaps both on and off duty. Of the 73 off-duty fatalities in FY25, 40 of them occurred between March and September. The USACRC's spring-summer safety campaign provides tools and products focusing on important seasonally appropriate topics to help Soldiers and civilians counter the hazards that come with rising temperatures. **Click here to learn more.**
